PROFILE SUMMERY

Full-Stack Developer has around 5+ years of experience in designing, developing, and deploying scalable web applications. Proficient in front-end and back-end technologies, including Java, Spring Boot, ReactJS, Redux, and TypeScript, with hands-on expertise in HTML, CSS, JavaScript, and database management systems like MySQL, PostgreSQL, MongoDB, and Oracle. Skilled in leveraging cloud platforms (AWS, Azure) to deliver secure and scalable solutions. Demonstrates strong problem-solving abilities, agile development experience, and a track record of delivering user-centric applications that align with business objectives. Passionate about innovation, collaborative teamwork, and driving impactful results in fast-paced environments.

SKILLS

-
- **Programming Languages** : Java, JavaScript, Python, C, C++, TypeScript, HTML, CSS.
 - **Frameworks & Libraries** : ReactJS, Redux, Node.js, Spring Boot, Express.js.
 - **Front-End Development** : Responsive Design, Material-UI, Bootstrap.
 - **Back-End Development** : RESTful APIs, Microservices Architecture, GraphQL.
 - **Databases** : MySQL, PostgreSQL, Oracle, MongoDB.
 - **Cloud Platforms** : AWS, Azure.
 - **Performance Monitoring** : New Relic, AWS CloudWatch, JMeter.
 - **Testing Tools** : Selenium, Junit, Postman, Jest.
 - **Version Control** : Git, GitHub
 - **Development Tools** : Eclipse, IntelliJ IDEA, Visual Studio Code.
 - **DevOps Tools** : Jenkins, GitHub Actions, Docker, Kubernetes.
 - **Operating Systems** : Windows, Linux.

EXPERIENCE

Vision2020 IT Services

May 2023 – Present

Software Developer

- Designed and developed scalable web applications using ReactJS, Node.js, and Spring Boot, enhancing performance and user experience.
- Built reusable components in ReactJS, significantly reducing development time for new features.
- Developed RESTful APIs to ensure secure and efficient data communication between front-end and back-end systems.
- Integrated TypeScript into the front-end codebase to improve code reliability and maintainability.

- Deployed and managed applications on AWS using services like EC2, S3, and RDS, ensuring high availability and scalability.
- Performed unit testing with JUnit and Jest, ensuring robust application components.
- Automated regression testing with Selenium, reducing the need for manual testing.
- Monitored and optimized application performance using New Relic and AWS CloudWatch, enhancing response time.
- Documented technical designs, API specifications, and testing procedures to improve team onboarding and knowledge sharing.
- Collaborated with cross-functional teams to implement CI/CD pipelines with GitHub Actions, speeding up deployment processes.
- Supported troubleshooting efforts, providing technical solutions and resolving critical issues efficiently.

Environments:

HTML, CSS, JavaScript, ReactJS, Node.js, Spring Boot, AWS, TypeScript, PostgreSQL, GIT, GitHub, JUnit, Jest, Selenium, GitHub Actions, New Relic, AWS CloudWatch, CI/CD, RESTful APIs.

Texas Tech University

Aug 2022 – May 2023

Graduate Student Assistant (Web Application Developer)

- Developed responsive web applications for academic and administrative projects using ReactJS, Redux, and Spring Boot, Angular 9
- Built backend services with Node.js and Python, optimizing data processing and system integration.
- Designed and optimized database schemas in PostgreSQL, improving query performance and data reliability.
- Automated browser testing using Selenium to ensure cross-browser compatibility and UI consistency.
- Conducted integration testing to ensure seamless interaction between front-end and back-end systems.
- Collaborated with faculty to identify requirements and deliver user-focused solutions, improving application adoption.
- Created CI/CD pipelines using Jenkins and GitHub Actions, streamlining the deployment process.
- Wrote comprehensive documentation for applications, APIs, and testing processes to facilitate future maintenance.
- Provided technical troubleshooting support to faculty and students, resolving issues effectively.
- Analyzed application performance metrics and implemented optimizations to improve load times and efficiency.

Environments:

HTML, CSS, JavaScript, ReactJS, Redux, Spring Boot, Node.js, Python, UI, API, CI/CD, PostgreSQL, Selenium, Jenkins, GitHub Actions, Angular 9

K-Soft Tech**Jul 2019 – Jul 2022****Java Full-Stack Developer**

- Designed and implemented full-stack web applications using Java, Spring Boot, and ReactJS, following agile methodologies.
- Built RESTful APIs for secure and efficient communication between front-end and back-end systems.
- Improved application reliability by implementing automated testing frameworks like JUnit and Mockito for backend validation.
- Integrated TypeScript into front-end projects, reducing runtime errors and enhancing code quality.
- Developed SQL queries and optimized database performance for MySQL and MongoDB, ensuring scalability.
- Conducted thorough system and end-to-end testing to ensure seamless user experiences.
- Automated front-end testing with Jest and Enzyme to increase test coverage and reduce manual effort.
- Collaborated with the QA team to create and execute detailed test plans, addressing critical bugs effectively.
- Participated in code reviews, ensuring adherence to best practices and maintainable codebases.
- Deployed applications using Jenkins to achieve automated build and release pipelines.
- Supported application performance optimizations to enhance user experience and operational efficiency.

Environments:

HTML, CSS, JavaScript, Java, Spring Boot, ReactJS, MySQL, MongoDB, JUnit, Mockito, TypeScript, Jest, Enzyme, Jenkins, PostgreSQL, RESTful APIs.

EDUCATION**Texas Tech University**, Lubbock, TX, USA**MAY 2024***Master of Science in Computer Science***GPA: 3.42****Certifications**

- Python programming
- GIT & GIT hub
- Meta Back-End Developer

- Full-stack JavaScript developer.
- IBM Full Stack Software Developer

COLLEGE PROJECTS

TEXAS TECH UNIVERSITY, Lubbock, TX

- RFID based attendance system using Arduino UNO.
- University Vehicle parking management system.
- Student Assistant intelligent agent.
- Implemented voting system to prevent phishing attacks by using visual cryptography.

SAI TIRUMALA NVR ENGINEERING COLLEGE, NARASARAOPET, AP

- Implemented Smart Agriculture System using Arduino Uno by using Embedded system.
- Implemented Digital clock USING Micro-Controller 8051 which is AT89S51.
