

Venkata Sai Mandava

DATA ANALYST

mandavavenkatasai93@gmail.com | 940-242-7108

PROFESSIONAL SUMMARY:

- I have around 9 plus years of extensive experience working on Data Analysis, Data Profiling, Data Cleansing, Data Blending, Data Preparation and Data Visualization **using top-rated BI (Business Intelligence) tools** available in market.
- Worked on analyzing heavy data sets, consolidating the data, and providing a way to visualize and drill down into the data.
- My expertise in data collection, cleaning, transformation, and statistical modelling, using tools such as **T-SQL, Python, R, and SAS**, has enabled me to extract valuable insights from complex datasets
- Mastery in **SQL, NumPy, Pandas, Scikit-learn** for data analysis, model development, and working with relational databases.
- My work includes designing and implementing ETL processes, optimizing database queries for performance, and creating visually engaging reports and dashboards using tools like **Power BI and Tableau**.
- Highly skilled and experienced Data Analyst with 6 years of hands-on experience in utilizing machine learning techniques,
- **Python programming, and SQL** queries to extract valuable insights from complex data sets.
- Collaborated with cross-functional teams, gathering, and documenting business requirements, and proposing data-driven solutions aligned with strategic goals.
- My ability to communicate complex data findings in a clear and understandable manner has been instrumental in driving informed decision-making across organizations.
- Proficient in creating solution-driven views and dashboards in **Power BI, Tableau, and Big Query**.

TOOLS AND TECHNOLOGIES:

Data Management and ETL: T-SQL, ETL (Extract, Transform, Load), Data Quality, Source Control (GitHub, TFS), Cloud Services (Microsoft Azure), Database Management Systems.

Data Analysis and Statistics: Data Analysis, Statistical Analysis, Regression Analysis, Predictive Modelling, Statistical Modelling, Data Mining, Data Analysis Libraries (Pandas, scikit-learn), Statistical Software (SAS, R), Data Mining Tools (Weka, RapidMiner, KNIME).

Document Management: Visual Source Safe 6.0, Share point, Ultra Edit, Documentum, Google Sheets

Tool And Utilities: Jupiter, GIT, RStudio, Tableau, PyCharm, SAS 9.4, SAS Enterprise Miner 15.2, JMP, PostgreSQL, MySQL, SQLite, Microsoft SQL Server, MS Access, Mlib , Excel Power Pivot

Libraries: NumPy, SciPy, Pandas, Scikitlearn , TensorFlow, Keras, Py Torch, Caret, Stats model, XG Boost, NLTK, dplyr, nnet, Glmnet, transformer, m boost.

Data Visualization and Reporting: Tableau, Power BI, Matplotlib, Seaborn, Microsoft Office Suite.

Programming and Software Tools: Python, R, SAS, SQL.

Other Tools: MS Office 2003/2007/2010 and 2013, Power pivot, Power Builder, GIT, CI-CD, Jupyter Notebook.

WORK EXPERIENCE

Data Analyst

Nov 2022 - Present

Lowes, US

- Performed data analysis using SQL queries on source systems to identify data discrepancies and determine data quality.
- Developed detailed ER diagram and data flow diagram using modeling tools following the **SDLC** structure.
- Gathered the various reporting requirements from the **business analysts**.
- Conducted one-on-one sessions with business users to gather **data warehouse** requirements.
- Developed a Conceptual model using Erwin based on requirements analysis with data warehouse objectives.
- Used forward engineering to create a Physical Data Model with **DDL** that best suits the requirements from the Logical Data Model
- Leveraged requirements and solution design documents to inform development of testing strategies, plans, and cases.
- Implemented robust data governance policies within **SharePoint**, ensuring data accuracy, security, and compliance with industry regulations.
- Managed different data migration projects, transferring large datasets into SharePoint while maintaining data integrity and minimizing downtime
- Designed and implemented basic **PL/SQL** queries for testing and report/data validation.
- Skilled in working with **SAP** tools and technologies, ensuring seamless migration by leveraging expertise in SAP Data Services, SAP Landscape Transformation (SLT), and other relevant platforms.
- Executed successful data migration initiatives, ensuring the accurate transfer of data from legacy systems to the new **SAP** environment.
- Developed and maintained data dictionary to create metadata reports for technical and business purposes.
- Created a Data mapping document after each assignment and wrote the transformation rules for each field as applicable, ensuring accurate data flow within the data warehouse.
- Demonstrated expertise in designing efficient and scalable ETL workflows within the **Informatica** environment.
- Successfully performed analysis and design activities to ensure seamless data migration from legacy systems to **Informatica**-based solutions.
- Created **Tableau** reports and worked on Ad-hoc reporting using Power BI.
- Created **Tableau** Dashboards and Visualizations to answer business questions.
- Prepared complex T-SQL queries, views, and stored procedures to load data into staging area.
- Monitored the Data quality and integrity of data was maintained to ensure effective functioning of department.
- Developed **Star and Snowflake schemas** based dimensional model growing the data

warehouse.

- Involved in requirement analysis and understanding of business analysis and creating a design workflow.
- Designed Dashboards using Filters, Parameters and Action Filters
- Worked on Normalization and De-Normalization techniques for OLAP systems.
- Used forward engineering approach for designing and creating databases for OLAP model.
- Used **Teradata** utilities fast load, multiload, pump to load data into the data warehouse efficiently.
- Designed and generated various dashboards, reports using various Tableau Visualizations.
- Designed data flows that (ETL) extract, transform, and load data by optimizing SSIS performance.

Data Analyst

Jan 2021 - Oct 2022

AbbVie, TX

- Cleaned, transformed, and structured data for analysis, employing skills in data cleaning, transformation, and structuring, with tools like SQL for data transformation, data cleaning scripts, and the use of data transformation libraries.
- Implemented **Agile Methodology** for building an internal application.
- Conduct exploratory data analysis, quick analytic prototyping, and creative concept presentation to exploit data and produce deeper insights.
- Use Pandas, NumPy, Matplotlib and ggplot2 in Python for developing data pipelines and various machine learning algorithms, integrating data from data warehouses.
- Develop and maintain Dashboards to take monitoring and reporting time from two weeks/ month to two days/month.
- Generated detailed report after validating the graphs using R.
- Built **Tableau** dashboard to visualize core business **KPIs** (e.g., Monthly Recurring Revenue), saving 10 hours per week of manual reporting work.
- Reviewed and modified **SAS** Programs, to create customized ad-hoc reports, processed data for publishing business reports.
- Utilized **SharePoint** capabilities for data visualization, transforming complex datasets into clear and compelling visual representations for improved understanding.
- Skilled in utilizing the scripting languages (e.g., Python, JavaScript) to automate the JSON-to-SQL translation process, streamlining repetitive tasks and reducing manual effort.
- Developed interactive and visually appealing dashboards using Google Data Studio to present key performance indicators (KPIs) and trends.
- Use Python and SQL to manipulate data, construct data models, and validate them.
- Assisted with automating reporting functionality using **Power BI**
- Configured and implemented subscription, scheduled refresh, data alert using **Power BI Gateway**
- Designed, developed, and implemented reporting and analytics solutions using Power BI by integrating cloud platforms.
- Experience in implementing data quality processes to cleanse, standardize, and enrich data for

improved accuracy and reliability using **Informatica IICS**.

- Utilized **Informatica** PowerCenter to validate and troubleshoot ETL workflows, ensuring data accuracy and integrity during the conversion process.
- Integrated MDM with data integration and ETL processes for real-time data updates and synchronization.
- Improve efficiency and accuracy by evaluating model in Python and R.
- Create **database objects (tables, views, procedures) using MySQL** to provide definition, structure and to maintain data efficiently.
- Redesigned data model through iterations that improved predictions by 12%.
- Performed data analysis and data profiling using complex SQL queries on various sources systems including SQL Server.
- Performed Data Cleaning, features scaling, features engineering using pandas and NumPy packages in python and build models using deep learning frameworks.
- Understand the data visualization requirements from the Business Users
- Create **Source to Target Data mappings** for individual reports.
- Create Pivot tables in **Excel** to analyze data across several dimensions.
- Created visually engaging data visualizations with Tableau/Power BI to communicate complex insights.
- Utilized problem-solving, project management, and communication skills to lead and coordinate complex projects.
- Collaborated with peers, managers, and compliance teams to ensure successful project implementation.

Data Analyst.

Nov 2017 - Dec 2020

Syntel, India

- Proficiency in statistical techniques involving the analysis of data, making projections, and assessing market conditions by tools and software include programming languages like Python or R, along with libraries like **Pandas, NumPy, and scikit-learn** for mathematical and statistical analyses.
- Statistical software like **R, SAS, or SPSS** are utilized for detailed analyses.
- Identified and presented trends and patterns in data visually, data visualization tools like **Matplotlib** and **Seaborn** are employed, while collaboration platforms like Microsoft Teams or Slack facilitate communication with other business units.
- Utilized data mining tools like **Weka, RapidMiner, or KNIME for data mining tasks**, alongside data analysis libraries in Python, such as Pandas and scikit-learn, to create statistical models and simulations.
- Created detailed reports and conclusions and translated data findings into actionable insights using business acumen.
- Proficiency in data analysis, statistical modelling, and problem-solving skills is necessary to identify areas of opportunity and risk using Python or R, along with relevant libraries, for statistical modelling and data analysis.
- Used **Python, SQL for Data parsing and Data extraction** from application logs which are stored in blob storage.
- To identify the pattern of user-actions from the data we used n-grams and to find what are the most

common user scenarios of non-graceful and graceful exits between the sessions.

- **Designed, developed, and maintained complex SQL codes** for extracting and feeding data into repositories from various sources, which included flat files, Json files and Oracle tables and SQL server Tables
- Worked closely with other departments, such as product development and marketing, to share insights and collaborate on decision-making.
- Extracting data from various sources using the **SSIS** to create the workflow and data flow activities to get complex data.
- Used **Excel** for various functionalities at most for **data transformations, charts, Pivot tables, Lookup functions. Even used Power queries.**

Statistical Programmer.

June 2015 - Nov 2017

Covenant, India

- Conducted data analysis on large data sets, identified trends, and patterns to drive business insights and support decision-making processes.
- Ensured that all outputs met quality standards and project requirements, maintaining a commitment to quality and accuracy.
- Conducted validation programming and collaborated with **Statistical Programmers, Biostatisticians, and project team members** to resolve discrepancies and address findings.
- Adhered to applicable **Standard Operating Procedures (SOPs), Work Instructions (WIs), and relevant regulatory guidelines** (e.g., ICH) to ensure compliance and data integrity.
- Maintained well-organized, complete, and up-to-date project documentation, verification/quality control documents, and programs to facilitate inspection readiness.
- Efficiently managed scheduling and time constraints across multiple projects, setting goals based on management priorities and adapting to timeline or priority changes by reorganizing daily workload.
- Collaborated effectively with team members, demonstrating a willingness to work together and assist with projects and initiatives to meet the business's needs.
- Successfully completed project programming activities within the specified period outlined by the Lead Statistical Programmer and/or management.
