EDUCATION

2016

FAIRLEIGH DICKINSON UNIVERSITY

- Masters in Computer Science

2014

J.N.T.U KAKINADA, INDIA

- Computer Science & Engineering

SKILLS

- Angular
- React JS
- Responsive Web design
- TypeScript
- Figma
- Node JS
- Vue JS
- PCF, AWS, Azure
- MySQL

LANGUAGES

- English (Fluent)

YASASWI SYKAM

Sr. UI Developer

PROFILE

Experienced Front-End Engineer with over 9 years of expertise in designing and developing high-performance, scalable, and accessible web applications using React, Angular, and Node.js, with deployments on PCF and cloud platforms like AWS. At Fidelity Investments, improved cloud account workflows for AWS and Azure, built reusable UI components with Angular Material, automated infrastructure provisioning using Terraform, and enhanced accessibility following WCAG standards. Skilled in optimizing web performance with Lighthouse, ensuring cross-browser compatibility, and delivering high test coverage using Jasmine, Karma, and Cypress. Adept in Figma for creating wireframes and prototypes, driving seamless user experiences. Passionate about adopting and mastering emerging front-end technologies to deliver innovative solutions.

WORK EXPERIENCE

Oct 2024 - Present
Fidelity Investments
Sr. Cloud & UI Engineer

Collaborated with stakeholders and product owners to gather functional and technical requirements, streamlining cloud onboarding and account management workflows for AWS and Azure. Designed and developed responsive, accessible UI screens using Angular, adhering to WCAG standards, and built scalable, reusable components with Angular Material. Integrated front-end applications with Node.js services backed by MongoDB and AWS DynamoDB, and developed serverless microservices using AWS Lambda to support cloud-native architecture. Contributed to AWS fire call capabilities, automating temporary, elevated access to services like SSH, SSM, IAM, and S3 while ensuring compliance and security. Practiced Test-Driven Development (TDD) with Jasmine, Karma, and Cypress for unit, integration, and end-to-end testing. Managed CI/CD pipelines through Jenkins with quality gates and handled Blue-Green deployments via Helm charts for zero-downtime releases. Additionally, delivered operational dashboards for visibility into cloud resource usage and proactively optimized performance across cloud management workflows as part of the Cloud Integration Experience Squad.

Dec 2023 - Sep 2024
Subaru Of Indiana Automotive
Sr. UI Developer

Collaborated with stakeholders to gather requirements and design interactive wireframes and prototypes in Figma for a Steel Management System, optimizing inventory workflows and data tracking. Developed responsive, high-performance user interfaces using Angular 17.x and Vue.js, implementing features like dynamic tables, pagination, and secure Azure AD login via MSAL. Built backend services with Node.js and Express, integrating JWT/OAuth2 for API security and developing middleware for error handling and validation. Ensured application reliability through unit testing with Jest and end-to-end testing using Cypress, delivering a seamless and scalable inventory management experience.

- **July 2016 -Nov 2023**

AARP (American Association For Retired People)
Senior UI Developer

At AARP, I contributed to multiple front-end modernization projects, migrating legacy applications into modern, responsive React and Angular Single Page Applications (SPAs). I developed and optimized user interfaces using React (with Redux, Next.js, and HOC) and Angular 11, enhancing performance, accessibility, and user experience. Integrated key AWS services like API Gateway, S3, CloudFront, and Cognito for secure, scalable deployments and implemented server-side rendering and static site generation in Next.js for SEO improvements. Collaborated closely with backend teams working in Node.js, Express.js, and Spring Boot, ensuring seamless API integration and real-time data sync. Focused heavily on accessibility (WCAG standards) and fraud prevention tools like BioCatch, NuDetect, and PerimeterX to secure user journeys. Implemented dynamic routing, reusable components, and integrated authentication and PCI-compliant transaction systems. Conducted thorough performance tuning, unit testing (Jest, Mocha, Cypress), and deployed applications to Pivotal Cloud Foundry (PCF) with automated CI/CD pipelines. Additionally, I developed dashboards using Google Maps API for real-time activity tracking and collaborated with platform teams to manage PCF services, deployment manifests, and environment configurations across multiple environments.

- **Aug 2021 - June 2022**

AARP (American Association For Retired People)
Analytics lead Developer

Worked on resolving analytics tracking issues across login, registration, and membership workflows, enhancing data accuracy for reporting and insights. Customized tracking scripts using JavaScript, jQuery, and regex to improve event tagging and enrich the data layer. Collaborated with vendor teams to troubleshoot and resolve misfiring or duplicate tags, ensuring compliance with Adobe Analytics (DTM) standards. Additionally, deployed updated web modules to Pivotal Cloud Foundry (PCF), maintaining consistent behavior across environments and supporting smooth, automated CI/CD processes.

- **Sep 2015 - June 2016**

Accelsoir Inc,
UI Developer

Developed and maintained web pages by writing clean, efficient, and well-documented HTML, CSS, and JavaScript code. Implemented interactive elements, dynamic user interfaces, and client-side functionalities using JavaScript and libraries like jQuery. Focused on creating responsive, mobile-friendly layouts by applying modern responsive design techniques, ensuring consistent user experiences across devices and screen sizes.
