TECHNICAL SKILLS

Skills ETL, Statistical Analysis, DBMS, Data Manipulation & Analytics, Data Visualization, Presentation
Tools Python, SQL, MYSQL, Tableau, Power BI, R, Spark, Hadoop, AWS, BigQuery, Firebase, Google Analytics, Looker, GitHub, SAP Hana, Alteryx, MATLAB, Java Script, JSON

WORK EXPERIENCE

Data Analyst and Data Engineer at Koupon.ai, Inc

Jan 2024 - present

Operation and Technical Team

Santa Clara, CA

- **ETL & Pipeline:** Utilized official API keys from eBay and Walmart to integrate promotion data into BigQuery and Firebase, in collaboration with front-end software engineers. Spearheaded the end-to-end development, including monitoring, managing, and testing of data source normalization and accuracy. Thereby significantly improved online promotion selections, increasing new customer traffic by 15%.
- **CI/CD & Version Control:** Developed CI/CD pipelines in GitHub to automate testing and integration of promotion data code updates into office tools. Expertly managed Git version control, optimizing team collaboration through best practices in branch management and pull requests. Enhanced project velocity and reduced deployment downtime by 30% over a two-week development cycle.
- **Database Optimization:** Standardized database schema in Firebase and BigQuery by refining data types, date formats, and tracking points, enhancing data accuracy and overall database integrity. Designed and implemented by-day partitioned tables in BigQuery for daily promotion and user behavior tracking, which slashed query scan costs by 96% (from over 100GB to 4GB) and boosted query performance by 500% times.
- **Data Visualization & Real-Time Monitoring:** Developed end-to-end company-wide real-time Looker dashboards including 100+ graphs and sheets to help Operation, Marketing, PM and Algorithm teams tracking DAU, registration rate, customer behaviors and key performance indicators for marketing campaign effectiveness, facilitating real-time monitoring, anomaly detection, and data-driven decisions.
- **Collaboration & Communication:** Collaborated and communicated across business, operation, technique, marketing and PM departments including users without data and tech background to gather business requirements and to translate business needs into data engineering and other technical developments.
- **Ad Hoc Analysis & Reporting:** Handled ad hoc data requests from various departments using BigQuery, including anomaly detection and analysis, user segmentation, profiling tag assignments, and analyses of conversion rates, signup rates, and retention rates. Delivered final insights in the form of reports and charts.

Data Analyst at CenterPoint Energy, Inc

October 2021 - September 2023

Data Science Team

Dallas, TX

- **SSIS Data Flow:** Designed and developed SSIS data flows on Alteryx to pull, merge and connect user information and electricity consumption data from various sources and performed data analysis by requests (e.g., weekly/monthly usages of different electricity types).
- **Abnormal Power Usage Detection:** Identified abnormal power usage trends by utilizing time-series analysis such as Moving Averages on inventory data in Python for further data science research and predictions of abnormal large power usage in 10+ zip code areas.
- **Comprehensive & Demand Notice for Payment Reports:** Produced Comprehensive and Demand Notice for Payment Reports using Tableau and MySQL; highlighted key revenue and profit trends and identified high-risk accounts, safeguarding over \$2 million in potential revenue losses.
- **Insights & Recommendations:** Provided insights and recommendations and presented with Power Point and Tableau to multiple departments in areas of inventory management, supplier selection, and purchasing strategy to facilitate data-driven decisions within the organization.

EDUCATION

Northeastern University (NEU Silicon Valley Campus)

San Jose, CA

Master of Science, Data Analysis (Applied Machine Intelligence) GPA: 3.90/4.0

Jan 2022 – Dec 2023

University of Iowa

Iowa City, IA

Bachelor of Arts, Mathematics

Aug 2016 – May 2020
