

Zoey Liu

New York, New York | (314)-728-7982 | zoeyliu0127@gmail.com

EDUCATION

New York University

Sep 2021 - May 2023

Master of Science: Management and Systems Concentration: Database Technology (GPA: 3.7/4.00)

Jinan University

Sep 2017 - Jun 2021

Bachelor of Engineering: Electronic information science and technology

SKILLS

- **Programming Language:** Java, Python, C++, C#, PHP, JavaScript (Node.js), Go, SQL, MATLAB, HTML, CSS, Java, Python, C++, C#, PHP, JavaScript (Node.js), Go, SQL, MATLAB, HTML, CSS
- **Databases: Relational (RDBMS)** – MySQL, PostgreSQL, SQL Server, PL/SQL; **NoSQL** – MongoDB, DynamoDB, Redis, Firebase; **Cloud Storage** – AWS RDS, Google Cloud Firestore, SQLite
- **Framework Libraries:** Spring (MVC, Boot, Web, IoC), .NET Framework, Django, Laravel, MERN Stack (MongoDB, Express, React, Node.js), Flutter, FlutterFlow, Bootstrap, OpenCV, OpenGL, Selenium, React, Next.js, TypeScript, Tailwind CSS
- **Development & Tools:** Heroku, AWS (EC2, RDS, S3), GCP (Cloud SQL, Compute Engine), Docker, Git, Linux, Jira, RESTful APIs, Maven, Android Studio (Gradle), Cordova, WordPress, Wix
- **Software Development Practices:** Agile (Scrum/Kanban), SDLC (Software Development Life Cycle), Debugging & Troubleshooting

WORK EXPERIENCE

Upgrade consulting llc(Remote)

September 2024 - Current

Software Engineer

- Independently developed a cross-platform mobile app for **Android** and **iOS** as a **Full Stack Developer**, using **Flutter** for the frontend, and using **Node.js** with **Express.js Framework** for the **backend APIs**. Designed and implemented a **non-relational database** using **MongoDB**. Deployed the backend to **AWS EC2** and conducted the **TestFlight testing**.
- Developed a **full-stack web-to-native iOS app** using **Svelte** and **JavaScript**, packaging it with **Capacitor** and integrating **Firebase**. Managed API communication with **C#** with an **ASP.NET Core backend**. Configured infrastructure in the **Apple Developer Portal**, setting up development certificates, provisioning profiles, and APNS keys for push notifications via **Xcode** and **Firebase** to support iOS devices, with **CI CD** via GitHub Actions and **Docker** Compose.
- Implemented a responsive web interface using **Next.js** and **Tailwind CSS**, and developed a cross-platform search-enabled mobile app in **Flutter & Dart**. Built backend infrastructure with **Node.js Express**, delivering **RESTful APIs** to support frontend integration.

Jwiz(New York, New York)

February 2024 - Current

Software Engineer

- Contributed to the development of JWiz, a business directory and digital advertising platform connecting local businesses to regional audiences across mobile and web. Engineered **full-stack** solutions using **PHP** with **Laravel framework**, **JavaScript**, and **MySQL**, optimizing the media search algorithm and delivering a responsive ad listing UI via Bootstrap.
- Built cross-platform mobile apps for **iOS** and **Android** using **Flutter** and **Dart**, integrating native video modules and implementing interactive ad components. Integrated **RESTful APIs** and external **SDKs** to support ad placement, in-app video rendering, and event tracking. Conducted **TestFlight** testing and deployed to app stores.
- Deployed the full solution stack on **GCP**, using Compute Engine and **Cloud SQL** to ensure scalability and availability.
- Trained a machine learning model to enhance user search relevance, incorporating **OpenAI APIs** to deliver ad recommendations.
- Deployed the mobile apps to the App Store and Google Play; published the web platform at www.jwiz.com.

Klotofy(Remote)

December 2023 - July 2024

Software Engineer

- Developed and launched Klotofy, a cross-platform content-sharing app for **iOS**, **Android**, and **Web** using **Flutter**, enabling multimedia publishing and interactive media browsing. Designed and implemented structured storage systems using both **Firebase NoSQL database** and **Cloud SQL** on **GCP** to support scalable and real-time media content delivery. Migrated legacy **SQLite** to **Google Cloud Platform**, leveraging **Cloud Functions** and **Firestore** for dynamic backend logic and improved scalability.
- Designed and implemented **RESTful APIs** in **Java**, integrating third-party **SDKs** to handle video/image ingestion, transcoding, metadata parsing, and cross-platform content rendering. Rebuilt core backend features using **Ruby on Rails API** and **PostgreSQL** for maintainability and speed, supporting scalable creator tools. Automated end-to-end testing and media asset validation using **Python** and **Selenium**; implemented unit tests in **Java** with **TestNG** following the **Page Object Model** for regression coverage.
- Deployed the mobile apps to the App Store and Google Play; published the web platform at www.klotofy.com.

DAJIANG TECHNOLOGIES, LLC. (New York, New York)

August 2023 - July 2024

Full Stack Developer

- Developed and deployed a **full-stack web application** using **Python** with **Django Framework** and **React**, following **OOP principles** and the **MVC architecture**. Designed a **MySQL relational database** with a structured data model and integrated **RESTful APIs** for seamless frontend-backend communication via **AJAX to Fetch API**.
- **Built and deployed the backend** on **AWS EC2**, leveraging **AWS RDS MySQL** for database management and **AWS S3** for scalable image storage. Ensured high availability, security, and performance through AWS service integration.
- **Designed and implemented RESTful APIs** for user authentication, data retrieval, and image uploading, utilizing **REST** and **HTTP** protocols. Integrated Stripe for secure payments and deployed the app using **Heroku** with **PostgreSQL**.
- Launched the real estate website: www.indeedrent.com.

Teamcal Ai(Mountain View, California)

May 2022 - Aug 2022

Software Engineer Intern

- Developed and maintained the **user interface** for a **calendar web application** using **PHP**, **JavaScript** with **Bootstrap**, **HTML**, and **CSS**, following **OOP principles**. Built the **backend with CodeIgniter**, integrating **MySQL** while adhering to **Spring MVC architectural principles**. Worked in an **Agile/Scrum environment**, utilizing **Jira** for sprint planning and project tracking.
- Designed and implemented a **robust calendar system**, developing **RESTful APIs** for event management.

PROJECTS

Tramway Monitoring System (C++)

Jun 2019 - Sep 2019

- Developed a **C++ application** using **OpenCV** and the **.NET framework**, integrating **Windows Forms/WPF** for the user interface.
- Implemented **ADO.NET** for database management and integrated the **Baidu Map API** for real-time data visualization.
- This project was successfully patented: **Patent number: CN201910942079.2**
