PROFESSIONAL SUMMARY

Experienced Business Analyst & SAP MDM Consultant with 8+ years in data management, process optimization, and enterprise solutions. Skilled in analyzing business needs, automating workflows, and improving data integrity to drive operational efficiency. Adept at collaborating with stakeholders, managing cross-functional teams, and delivering data-driven solutions in Agile environments

PROFESSIONAL EXPERIENCE

Unigate, LLC – United States | Business Analyst

July 2024 - Present

- Defined strategic foundation by analyzing 10+ competitors, identifying 3 market opportunities, and shaping a go-to market plan that accelerated product-market fit validation
- Spearheaded launch of a B2B platform uniting 20+ global universities, strengthening STEM collaboration and aligning cross-functional teams for scalable product delivery

Saint-Gobain — India | SAP Business Analyst - Master Data Management

Sep 2019 – Jun 2022

- Built an MDM tool and led an operational excellence initiative to automate purchase order processing, reducing manual errors by 50% and accelerating supplier payment cycles by 30%
- Automated financial reconciliation workflows, saving 150+ hours/month and improving cash flow forecasting accuracy by 18%
- Standardized KPIs for order fulfillment, improving supply chain visibility and ensuring on-time deliveries increased from 85% to 96%
- Streamlined product backlog by refining JIRA user stories, cutting sprint cycle time by 48 hours, and improving cross-team communication for faster delivery of high-priority features
- Translated business needs into JIRA stories, optimizing Order-to-Cash workflows, eliminating 40 backlog items, and boosting project velocity by 20%
- Facilitated stakeholder alignment workshops, leading to a 40% reduction in requirement gaps for operational initiatives
- Led cross-functional teams to define product vision, drive roadmap execution, and integrated .NET front end with SAP S/4 HANA to streamline vendor management, reducing processing time per invoice by 3 days
- Optimized product stability by executing 7000+ UAT test cases with HP ALM, identifying and resolving critical defects pre-launch, reducing rollout downtime by 2 hours, and ensuring seamless system performance
- Diagnosed and fixed 15+ SAP defects via BAPI/data analysis, ensuring 100% compliance and boosting system integrity

Accenture Solutions — India | SAP Business Analyst

May 2015 – Sep 2019

- Led data migration for a CPG client by managing 500+ schema transports and 100 hierarchy updates, ensuring seamless system functionality and reducing downtime by 20%
- Created mapping documents and integrated 4 platforms, eliminating data silos and enabling a unified 360-degree data view that improved decision-making speed by 25%
- Engineered SAP enhancements in collaboration with IT and business teams, implementing 150+ system improvements and resolving 28 critical issues, elevating overall system efficiency and performance
- Strengthened data governance by designing workflows, refining schemas, and aligning master data with business needs, minimizing operational disruptions and reducing downtime by 20% through integrity checks
- Directed SAP HANA migrations for 5,000+ users, ensuring seamless transition with 99.9% uptime
- Led MDM Import migration of 500K+ records, streamlining consolidation across SAP ECC, S/4HANA & MDG, improving data integrity

- Converted business needs into SAP specs, implementing enhancements that cut turnaround time by 2 weeks and boosted team efficiency
- Debugged ABAP & streamlined integration, reducing errors by 40% and improving SAP sync across 10+ systems
