

Colin Hamilton *Full Stack Java Developer*

✉ colinhamilton339@gmail.com ☎ +1 516 774 1517 📍 Las Vegas, NV

📄 SUMMARY

Experienced **Full-Stack Java Developer** with over **10+ years** of success building and optimizing enterprise-grade systems across healthcare, fintech, and logistics. I specialize in designing **cloud-native applications**, **microservices architecture**, and **event-driven systems** using Java, Spring Boot/WebFlux, Kafka, and gRPC.

With a strong foundation in **backend frameworks (Spring Boot, Micronaut, Quarkus)** and **frontend libraries (Angular, React, Mithril)**, I build robust, resilient, and scalable software. I bring hands-on expertise in **CI/CD automation, DevOps (Docker, Kubernetes, Terraform, ArgoCD)**, and **cloud deployments across AWS, GCP, and Azure**.

I'm passionate about building systems that scale to billions of events, integrating advanced data processing (Apache Spark), and deploying ML models. I also have deep experience in **security (OAuth2, JWT, OpenID Connect)** and mentoring engineering teams to deliver clean, performant code.

🧰 EXPERIENCE

Full Stack Java Developer, Avnet

05/2020 – 03/2025
New York, NY,
United States

- Refactored legacy **Java monoliths** into **reactive microservices** using **Spring Boot**, **Spring WebFlux**, and deployed across **Kubernetes** clusters with **Istio** and **Helm**, reducing system latency.
- Mentored junior developers on **Angular** best practices and modern web development patterns, improving code quality and team **velocity**.
- Led initiatives in identifying system bottlenecks and conducted root-cause analysis using profiling and **APM** tools to drive architectural improvements.
- Developed dynamic, responsive web applications using **Angular** (8+), integrating with RESTful APIs and managing state with **RxJS** and **NgRx**.
- Architected **Kafka-** and **gRPC-based distributed systems** with **Spring Cloud** and **Storm**, supporting **IoT telemetry pipelines** with sub-second processing latency.
- Built and maintained microservices using **Spring Boot** and **Spring Security** integrated with **JPA/Hibernate**, following modern microservice design patterns.
- Deployed **real-time ingestion systems** via **GitOps (ArgoCD)**, processing **billions of messages** using **Kafka**, **Spark**, and **Protobuf-based APIs**.
- Designed and developed Single Page Applications (**SPAs**) using **Angular** and **ES6**, ensuring cross-browser compatibility and responsive UI performance.
- Led frontend tooling workflows using **NPM**, **Webpack**, and **Jasmine** for automated testing and optimized asset bundling.
- Implemented frontend testing automation using **Jasmine** and **Selenium** to ensure UI stability and reduce regression defects.
- Implemented observables and reactive patterns in **Angular** to improve error handling, data flow, and **UX** responsiveness.
- Conducted architecture reviews and defined system-level technical solutions to ensure performance, **security**, and consistency across microservices.
- Developed secure **APIs** with **OAuth2**, **JWT**, and **OpenID Connect (Keycloak, Okta)**, supporting **SSO** for internal and partner systems.
- Utilized observables, **AJAX** flow control, and centralized error handling to streamline frontend architecture in **Angular-based SPAs**.

- Designed and deployed microservices using **Docker, Kubernetes, and Terraform** on **AWS** and **Azure** environments, aligning with **CI/CD** best practices.
- Created and optimized **RESTful, GraphQL, and gRPC APIs** with **Spring Boot**, enabling seamless **microservices** integration.
- Implemented **CI/CD pipelines** using **Jenkins, GitHub Actions, and GitLab CI**, reducing deployment failures by **50%**.
- Led **Business Continuity and Disaster Recovery (BCDR)** planning, automated **AWS backups**, and tested **failover strategies**.
- Mentored **10+ junior engineers**, created **code review processes**, and onboarded developers with **detailed documentation**.
- Participated in full **SDLC** from requirements gathering and design to implementation and deployment in agile teams using Jira and Confluence.
- Worked on **healthcare data integration** with **Lyniate Rhapsody, HL7, LOINC, and SNOMED**, improving **EHR interoperability**.
- Enhanced **caching layers** using **Redis, Memcached**, and improved **PostgreSQL indexing**, reducing query time by **60%**.

Full Stack Java Developer, ISOutsource

11/2018 – 03/2020

Bothel, WA, United States

- Migrated **monolithic applications** to **microservices** using **Spring Boot** and **Spring Security** with **JWT-based authentication**, improving maintainability and deployment speed.
- Developed full-stack features like **payment gateways, onboarding, and logging** using **Angular 8+, Redux, and REST APIs**.
- Built scalable **web apps** with **React.js, Spring Data, Hibernate, and PostgreSQL / Oracle / Cassandra**, supporting financial operations with consistent uptime.
- Contributed **Kotlin-based REST modules** and **Mithril.js SPAs**, focusing on **low-latency** and **efficient memory usage**.
- Contributed to **cloud-native** app development and **CI/CD** pipelines using Azure **DevOps** and **AWS CodePipeline**.
- Improved user interface performance through **DOM** optimization, lazy loading, and prefetching strategies.
- Utilized design patterns such as **Singleton, Observer, and Factory** in front-end components to promote scalability and maintainability.
- Architected **event-driven systems** using **Kafka, RabbitMQ, and Spring Cloud (Eureka, Zuul, Ribbon, Hystrix)**.
- Improved **SQL performance** through optimization of **PL/SQL, PostgreSQL, and MS T-SQL stored procedures**.
- Designed automation pipelines using **Terraform, Docker, Jenkins, and GitLab CI/CD**.
- Participated in **Agile sprints, code reviews, and daily standups** to ensure efficient delivery.
- Built **test frameworks** with **JUnit, Mockito, Selenium, and Cucumber**, reducing production bugs.
- Ensured frontend **security** compliance and performance optimization using Lighthouse audits, **OWASP** guidelines, and browser profiling tools.
- Led deployments across **AWS EC2, Lambda, RDS, and GCP clusters**; implemented monitoring using **ELK, Splunk, and Grafana**.
- Integrated with **Java backend modules** and **legacy systems** via **SOAP-to-REST migrations** using **Spring MVC, JAX-RS, and Jersey**.

Full Stack Java Developer, *Consilien*

07/2015 – 11/2018

Torrance, CA,
United States

- Developed **high-performance backend services** using **Java (J2EE)**, **Spring Boot**, and **Hibernate**, supporting thousands of concurrent requests.
- Designed **multithreaded Java components** to reduce thread contention and increase throughput.
- Integrated **JSF** with **EJB** and **JPA** to create robust, data-driven applications, ensuring a seamless user experience across multiple tiers of the application stack.
- Integrated **Apache Struts** with **Hibernate** for seamless database interactions, improving data access efficiency and simplifying object-relational mapping.
- Led **cloud migrations** from on-premise to **AWS** using **Terraform**, **Lambda**, **API Gateway**, and **ECS**.
- Built **event-driven microservices** using **Kafka** and **RabbitMQ** for real-time processing.
- Automated deployments and log analysis using **shell scripts**, **Python**, and **Go** utilities.
- Diagnosed performance issues using **Prometheus**, **ELK Stack**, and **Grafana** for real-time monitoring.
- Strengthened **application security** with **OAuth2**, **JWT**, and **Role-Based Access Control (RBAC)** for **REST APIs**.
- Developed **frontend components** with **Angular** and **React**, improving user responsiveness.
- Optimized **Oracle** and **PostgreSQL** queries, improving response times by **30%**.
- Built **automated test pipelines** with **JUnit**, **Mockito**, and **SonarQube** to maintain code quality and reduce regressions.
- Mentored **interns and junior devs**, and contributed to **Agile ceremonies** like sprint planning, demos, and retrospectives.

EDUCATION

Bachelor Degree of Computer Science, *Weber State University*

09/2015 – 05/2018

Ogden, UT, United States

SKILLS

Programming Languages

Java (8–21), Python, Go, JavaScript, TypeScript, Kotlin, SQL, PL/SQL, MS T-SQL, C++, C#, Bash, COBOL

Frontend Technologies

Angular, React.js, Redux, Mithril.js, JavaScript, TypeScript, HTML/CSS, Bootstrap, Material UI

Messaging & Streaming

Kafka, Kafka Streams, RabbitMQ, ActiveMQ, JMS, Storm, WebSockets

Cloud & DevOps

AWS (Lambda, EC2, RDS, S3, API Gateway, EKS), GCP (GKE, BigQuery), Azure (AKS) Terraform, Jenkins, GitHub Actions, GitLab CI, ArgoCD, Docker, Kubernetes, Helm

Testing

JUnit, Mockito, Selenium, Cucumber, Jasmine, TestContainers, BDD, TDD

Frameworks

Spring Boot, Spring WebFlux, Hibernate, Quarkus, Micronaut, J2EE, Jersey, Servlets, JSP, JDBC

Microservices & APIs

REST, GraphQL, gRPC, Protobuf, OpenAPI, Apigee, OAuth2, JWT, OpenID Connect

Databases

PostgreSQL, Oracle 19c/21c, MySQL, DB2, MongoDB, Cassandra, DynamoDB, Redis, Memcached

Security & Observability

OAuth2, JWT, OpenID, Keycloak, Okta, Fortify, SonarQube Prometheus, Grafana, ELK Stack, Splunk

Other

HL7, LOINC, SNOMED, Apache Spark, Concourse, Tomcat, Webpack
