

Jeethendrinee Ellundhula

Java Full Stack Developer

Wichita, KS | 316-444-0923 | jeethendrineellundhula@gmail.com

SUMMARY

- 5+ years of experience developing in all phases of **J2EE** Application design and development, Web based applications with **Object Oriented** Technologies, production support and testing.
- Experience in designing and development of User Interface using JSP, **JSTL**, **JavaScript**, **JQuery**, **CSS**, **HTML** and **AJAX**. Experience in working with **XML technologies** like XML, DTD, and XSLT.
- Experience in Requirement/Code/Data Analysis, bug fixing, debugging, map reduces jobs, design patterns, **Java 8 lambda**. Proficient in working across all stages of (**SDLC**) and agile methodologies.
- Implemented and maintained 5+ **RDBMS** databases using **MySQL**, **SQL Server**, and **MongoDB**, resulting in a 99% Uptime and minimal Downtime.
- Experience in performance tuning, caching and code refactoring. Experienced in build and data logging tools like **Ant** and **Maven**, **Log4j** and **Log back** for Logging and Junit for testing.
- Experience in **Amazon Web Services** provisioning and **Azure Services**. Good knowledge on **AWS services** like EC2, S3, Glacier, DynamoDB, VPC, Route53 Cloud Watch, Elastic Beanstalk, RDS, SNS.
- **Strong leader** and **team player**; excellent motivational skills to sustain forward growth momentum while motivating peak individual performance from team members.

SKILLS

Methodology	:	SDLC, Agile.
Languages	:	C, C++, Core Java, Java 8, SQL, C#, Python.
Frameworks/Libraries:		Spring MVC, Hibernate, React.js, Angular, Spring Boot, SOAP, Microservices, Spring Security, APIGateway (APIGEE), Node.js.
IDE's	:	NetBeans, IntelliJ IDE, Eclipse, Xcode, Visual Studio Code.
J2EE Technologies	:	Servlets, JSP, JavaBeans, JDBC.
Web Technologies	:	HTML, CSS, Bootstrap, JavaScript, TypeScript, jQuery, Ajax, JSON, XML, GraphQL.
Application Server	:	Apache Tomcat, AWS, Azure, GCP.
Database	:	MySQL, Oracle, DB2, PL/SQL, SQL Server, PostgreSQL, NoSQL, Cassandr, Dynamo DB.
Build /Other tools	:	MS Visio, Maven, Gradle, Junit & Mockito, Cucumber, Jenkins, Docker, Kubernetes, Kafka, Kibana, Terraform, SonarQube, Postman, Swagger, Splunk, Spark, Redis, Service Now.
Version Control Tools :		Git, GitHub, Git Bash, Git Lab, Jira, Bit Bucket.
Operating Systems	:	Windows, Linux.

EXPERIENCE

Assurant, US | May 2024 – Current | Full Stack Developer

- **Modernized portal UI** by integrating the **MVC framework** with **HTML**, **CSS**, **JavaScript**, **React**, and **Node.js**, enhancing user experience and performance. Upgraded React and Node.js dependencies, improving security and stability while reducing build errors by **40%**.
- **Developed scalable and secure RESTful APIs** using Java 8, Spring Boot, and PostgreSQL, reducing response time by **30%** through optimized request handling. Implemented caching mechanisms (**Redis**, **Ehcache**) to reduce database load by **40%**.
- **Implemented Apache Kafka** for **real-time data streaming**, enabling efficient messaging and event-driven architecture to improve system scalability and reliability.
- **Containerized and deployed microservices** using **Docker** and **Azure App Services**, ensuring high availability and scalability. Integrated **Azure services** such as **Storage Blobs**, **Virtual Machines**, **Key Vault for secrets management**, and **Email Communication Services** to enhance security, hosting, and communication workflows.
- Developed efficient database interactions using **Spring Data JPA**, reducing query execution time by 25% through custom JPQL queries and indexing.
- **Enhanced API documentation and testing** with **Swagger/OpenAPI** for seamless collaboration. Conducted **functional validations** using **Postman** and **automated JUnit testing**, improving bug detection by **90%**.
- **Established CI/CD pipelines** using **GitHub Actions**, streamlining deployments. Administered **code repositories** for **microservices** with **Git**, reducing merge conflicts and improving version control efficiency.

Covenant, India | Sept 2021 – Aug 2022 | Java Full Stack Developer

- Developed asset components using JavaScript, HTML, and CSS for a Fortune 500 Financial Institution's website, utilizing Oracle's WebCenter Sites (WCS) 12c CMS tool. Results to Enhanced website functionality and user experience, contributing to a 15% increase in user engagement.
- Integrated Angular application with Apache **Cordova framework** to convert web application into a hybrid mobile application that can run on iOS and Android platforms.
- Practiced **agile methodologies**, including **CI/CD pipelines**, **application resiliency**, and **security-first design principles**.
- Engineered Middleware **REST** and **SOAP** applications, APIs and **Microservices** using **Maven**, **Spring framework**, **Java 8** with **Eclipse** IDE reducing APIs response time by 20% and integrated complex data queries with **GraphQL** and optimize data fetching.
- Partnered with DevOps team to improve application availability by 15% by deploying gateways using Jenkins and Apache Tomcat servers. Leveraged **Elastic search**, and **Apache Kafka** together with **Kibana** for logging.
- Prepared pipelines to deploy **Docker containers** and **Kubernetes** pods, which produced in 100% stable application environment. Securely deployed images in **AWS ECS** leveraging **Elastic Container** Registry for efficient management.
- Integrated Splunk for log monitoring and constructed serverless microservices using **AWS Lambda** with **S3/CloudWatch integration** and **SNS** and **SQS** for communications in microservices.

Aktrix, India | June 2019 – Aug 2021 | Java Developer

- Transformed web applications ecommerce using **Java 8**, **Spring MVC**, **jQuery**, HTML, and bootstrap inclusive of e-commerce functionalities resulting in a 20% increase in website speed.
- Developed REST Web Services to exchange data between different applications, implemented SOA architecture with Web Services. Build and Deployed Java/J2EE to a web application server in an Agile continuous integration environment and automated the whole process.
- Created new user-facing features using **Angular** and **Node.JS**, which resulted in a 40% increase in user engagement and web site traffic using **Azure** for the cloud application.
- Developed an automated reporting tool using **JDBC**, executing **Oracle SQL** queries and utilizing an SMTP client library to send weekly email reports. Improved data reporting efficiency by 25%.
- Executed patchwork to enhance and modify web page functionality using CSS, HTML, JavaScript, jQuery ensuring seamless user experiences.
- Understanding the application's architecture, business logic, and underlying technologies allows me to understand how the various components interact. As an L2 support managed the entire lifecycle of incidents, including incident logging, tracking, resolution, and post-incident analysis.

Education

MS in Data Science

Wichita State University.
