SUMMARY

- Full-stack Software Developer with 4+ years of impact-driven experience delivering enterprise-grade solutions across healthcare, aviation, and analytics domains
- Specialized in cloud-native development with deep expertise in microservices, event-driven architecture, and scalable system design
- Proven success integrating AI/LLM models and automation workflows to boost performance, accuracy, and user experience
- Hands-on with AWS, GCP, Docker, Kubernetes, GitHub Actions, and CI/CD pipelines for production-grade deployment and reliability
- Adept at Agile delivery, cross-functional collaboration, and DevOps culture—turning business needs into high-performance applications fast
- Known for writing clean, tested, and secure code using Java, Python, React, Node.js, and modern toolchains

SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, Java, SQL, HTML/CSS

Frontend: React.js, Angular, Bootstrap, jQuery

Backend: Node.js, Express.js, Spring Boot, RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB, SQLite, DynamoDB, Sybase

Cloud & DevOps: AWS (EC2, Lambda, S3, API Gateway, CloudFormation, CloudWatch), GCP (BigQuery, Cloud Functions), Docker, Kubernetes, GitHub Actions, Jenkins, Terraform

Testing/Monitoring: JUnit, Mockito, Postman, Swagger, Canary/Integration Testing, API Monitoring

Dev, Data & workflow Tools: Git, Jira, Confluence, Tableau, Power BI, Apache Airflow

PROFESSIONAL EXPERIENCE

UnitedHealth Group | USA

Nov 2022 – Current

Software Developer

- Developed scalable microservices using Spring Boot and REST APIs for real-time healthcare claims and billing systems
- Integrated AI-powered anomaly detection models to flag fraudulent claims, improving accuracy by 18%
- Built interactive, secure React + TypeScript dashboards, reducing data retrieval time by 40%
- Implemented GCP-based data pipelines (BigQuery, Cloud Functions) for predictive analytics and reporting
- Leveraged Kafka for event-driven architecture and Redis for high-speed caching, improving system throughput
- Automated CI/CD workflows using GitHub Actions and implemented feature flag strategies for safer rollouts
- Ensured 98%+ unit test coverage and HIPAA-compliant code across all production deployments
- Collaborated in Agile teams using Jira, Confluence, and peer reviews to deliver sprint goals consistently

Delta Airlines | India

Mar 2021 – Dec 2021

Jr. Software Developer

- Contributed to UI modernization by migrating legacy Angular components to React, improving UI responsiveness and reducing bounce rates by 25%
- Developed and integrated Spring Boot backend services with AWS (S3, RDS, CloudWatch) for flight booking and payment features
- Implemented JWT-based authentication and RBAC for enhanced user access control and security compliance
- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions to support faster deployments and automated testing
- Participated in Agile ceremonies and collaborated with developers and QA for end-to-end feature delivery

Front-end Developer

- Built responsive user interfaces using HTML, CSS, JavaScript, and React for internal tools and client dashboards
- Developed custom UI components with reusable logic, improving development speed and consistency across teams
- Worked closely with backend teams to consume REST APIs and display real-time data using React state management
- Integrated charting libraries (Chart.js, D3.js) for dynamic data visualization in admin dashboards
- Collaborated in Agile sprints and daily standups, using Git, Jira, and Figma for version control, planning, and design handoff
- Contributed to UI performance tuning, reducing load time by ~30% through code splitting and image optimization

EDUCATION

University of North Texas

Denton, TX

Master of Science, Information Systems,

Dec 2023**Siddharth Institute of Engineering & Technology**

Andhra Pradesh, IN

Bachelor of Technology – Civil Engineering

Apr 2021
