Experienced DevOps/Cloud Engineer with 10+ years of expertise in designing and deploying cloud-native solutions, optimizing CI/CD pipelines, and driving automation. Proficient in IaC, container orchestration, and multi-cloud environments (AWS, Azure, GCP). Skilled in enhancing scalability, streamlining deployments, and implementing robust monitoring, security, and compliance practices to ensure reliability and cost efficiency. Strong problem-solving, strategic thinking, and leadership capabilities, with a proven track record of delivering impactful solutions that align with business objectives. Committed to continuous improvement and operational excellence.

Technical Skills

DevOps & Automation Tools:

- **Infrastructure as Code (IaC):** Terraform, CloudFormation, Azure ARM template
- **Configuration Management:** Ansible, Puppet, Chef
- **CI/CD:** Jenkins, GitHub Actions, GitLab, Azure DevOps, CodePipeline
- **Automation:** PowerShell , Python, Bash, Ansible , Chef , Puppet
- **Orchestration:** Kubernetes, Docker, OpenShift, ECS, Fargate, Helm, Istio, Linkerd

Cloud Platforms:

- **Amazon Web Services (AWS):** EC2, S3, RDS, EKS, Lambda, API Gateway, Route 53, CloudFront, IAM, CloudTrail, KMS
- **Microsoft Azure:** AKS, DevOps, Virtual Networks, Functions, Blob Storage, Synapse, Site Recovery
- **Google Cloud Platform:** GKE, Cloud Functions, BigQuery, Pub/Sub, Cloud SQL, Cloud Storage
- **Hybrid/Multi-Cloud:** Terraform Cloud, CloudHealth, Vault

Databases & Data Stores:

- **NoSQL:** MongoDB, DynamoDB, Couchbase, Cassandra
- **Relational:** MySQL, PostgreSQL, Oracle, Aurora
- **Caching:** Redis, ElastiCache, Memcached

Monitoring & Logging:

- **Tools:** Datadog, Prometheus, Grafana, ELK Stack, Splunk, CloudWatch, New Relic, Papertrail
- **Backup/Disaster Recovery:** AWS Backup, Azure Site Recovery, Kubernetes DR
- **SLOs/SLIs:** Proactive monitoring, alerting

Cloud Cost Optimization:

- FinOps, CloudHealth, AWS Trusted Advisor

Networking & Security:

- **Networking:** TCP/IP, DNS, VPN, Load Balancers, Subnets, VPC Peering
- **Security:** IAM, KMS, Security Hub, CloudTrail, AquaSec, Vault, Compliance (SOC2, GDPR)

Programming & Scripting:

- **Languages:** Python, Go, Bash, PowerShell, Ruby, Java
- **Automation:** CI/CD scripting, workflow optimization

Methodologies & Practices:

- Agile, Scrum, Kanban, SAsE, MLOps, DevSecOps, CI/CD
- Root Cause Analysis, Incident Management, Post-Mortem Reporting

Work History

Jan 2024 -
Current

DevOps Engineer

Velocity Automotive, Knoxville, TN

- Built and managed enterprise-grade CI/CD pipelines using Jenkins, GitHub Actions, and Terraform, enabling secure, seamless deployments across multiple environments.
- Automated infrastructure provisioning with Terraform and Ansible, ensuring scalability, consistency, and faster deployments across Dev, Test, and Production environments.
- Designed cloud-native microservices architectures with AWS Lambda, API Gateway, and DynamoDB, delivering cost-effective, high-availability solutions.
- Optimized containerized workloads using Docker and Kubernetes (EKS), leveraging Helm charts for version-controlled, multi-environment configurations.
- Integrated test automation frameworks into CI/CD pipelines, improving deployment quality and reducing time-to-market by 30%.
- Enhanced observability with monitoring solutions like New Relic and Papertrail, cutting mean time to resolution (MTTR) by 40%.
- Strengthened cloud security by implementing IAM policies, Linux OS hardening, KMS encryption, and compliance frameworks (SOC2, GDPR), ensuring secure, compliant infrastructure.
- Conducted Linux server performance tuning, optimizing system resources and reducing latency.
- Automated workflows with Python scripts, reducing manual interventions and boosting operational efficiency by 25%.
- Conducted root cause analysis for critical incidents, implementing preventative measures that minimized downtime across key services.
- Delivered strategic guidance on cost optimization and capacity planning, aligning infrastructure with business goals to maximize ROI.

Apr 2019 -
Dec 2023

Senior Site Reliability Engineer

Siemens Energy, Norfolk, VA

- Developed reusable Terraform modules and CloudFormation templates for standardized IaC deployments.
- Managed Kubernetes clusters (EKS), optimized with Helm charts and Istio, and implemented disaster recovery pipelines with Kubernetes DR tools.
- Reduced outages by 35% through proactive monitoring and observability with Datadog, Grafana, Prometheus and ELK Stack.
- Migrated repositories from TFS to GitHub, enhancing collaboration and version control practices.
- Designed and implemented secure backup and recovery strategies, leveraging AWS S3 and Glacier for cost-effective and robust data protection.
- Automated CI/CD processes with Jenkins and Harness, improving deployment efficiency.
- Led cost optimization initiatives, cutting cloud expenses by 20% using CloudHealth and custom FinOps strategies.
- Designed hybrid cloud networking solutions with AWS Direct Connect and Azure ExpressRoute.
- Implemented compliance measures for ISO 27001, SOC 2, and GDPR standards, securing sensitive data.
- Conducted incident response, post-mortems, and developed preventative measures, improving reliability.

Feb 2016 -
Mar 2019

Azure DevOps Engineer

DMI: Digital Transformation Services, McLean, VA

- Designed and deployed CI/CD pipelines for AKS and Azure App Services using Azure DevOps and Jenkins.
- Automated infrastructure with ARM templates, Terraform, and Bicep for

scalable Azure environments.

- Secured cloud resources with Azure Sentinel, Defender, and Key Vault, ensuring compliance and security.
- Deployed applications using Helm charts and FluxCD, adopting GitOps for streamlined operations.
- Implemented chaos engineering with Gremlin and Azure Chaos Studio to test system resilience.
- Integrated SonarQube and Checkmarx into pipelines for automated code quality and vulnerability scanning.
- Configured Azure Monitor, and Splunk for comprehensive performance monitoring.
- Built scalable serverless applications with Azure Functions, Logic Apps, and Cosmos DB.
- Designed data pipelines using Azure Data Factory for seamless cloud data integration.
- Implemented optimized storage solutions with Azure Synapse Analytics and SQL Database.
- Improved global traffic management using Azure Traffic Manager and Application Gateway.

**Jan 2015 -
Jan 2016**

Cloud Automation Engineer

Ericsson Telecommunications Inc., Plano, TX

- Automated AWS provisioning with CloudFormation, using S3 and DynamoDB for state management.
- Built event-driven workflows with Lambda, SNS, and SQS, and created ETL pipelines using Glue and Kinesis.
- Deployed and scaled RDS, DynamoDB, EC2, and ECS, securing with IAM, WAF, and KMS; monitored with CloudWatch and CloudTrail.
- Automated configuration management with Chef and Puppet to maintain environment consistency.
- Designed multi-region architectures with Global Accelerator and Route 53 for performance and redundancy.
- Optimized Lambda functions with Go scripts and automated CI/CD pipelines with CodePipeline and CodeBuild.
- Containerized applications with Docker, automated deployments with CodeDeploy, and set up centralized logging with CloudWatch Logs.
- Developed automation scripts for managing Tomcat, JBoss, WebLogic, and WebSphere environments.

Education

Bachelor of Science: Computer Science

ISFOP University - Benin

Certifications & Training

AWS Certified Solutions Architect – Associate

Microsoft Certified: Azure Administrator Associate
