EDUCATION

University of Massachusetts Amherst

Master of Science in Business Analytics(GPA 4.00)

Candidate, May 2025

- Relevant coursework: Data Science; Business Intelligence and Analytics; Supply chain; Project Management; Machine Learning; Data Visualization; Data Management; Statistics for Business; Data Mining;

SKILLS

Technical: Advanced Microsoft Excel (Pivot Tables, Macros, VBA, Power Query), SQL, Python, DBMS, Google Cloud

Software Technologies: SAP Native HANA XSA, SAP S4HANA SAP HANA 2.0, SAP BW4HANA

Reporting Tools/ELT Tools: Power BI, Bex, Tableau, Analysis for office, Crystal reports, SAP BODS

EXPERIENCE

LTIMindtree

Hyderabad, India

SAP Native HANA XSA developer

March 2022 - January 2024

- Effectively communicated complex technical concepts and business insights while architecting and optimizing technical reports and functional blueprints in SAP HANA, reducing development time by 30% and enhancing scalability and efficiency for enterprise-level solutions through verbal and written communication
- Developed and launched advanced HANA XS applications, leveraging native data modeling objects like stored procedures, table functions, and synonyms to streamline business operations and drive efficiency.
- Implemented SAP HANA security models with analytical and SQL privileges, roles, and schemas, with knowledge of SLT, SDI, and SDA for efficient real-time data integration and ensuring compliance with security protocols.
- Harnessed the transformative power of SQL, DAX, and advanced data modeling to convert raw data into actionable insights, driving data-driven solutions, and sustainable business growth through data visualization.
- Designed and deployed interactive dashboards in Tableau for financial reporting, empowering stakeholders with real-time analytics, and KPI tracking to drive performance optimization and strategic decision-making.
- Consistently recognized for excellence, earning the Star Performer Award three times by leading impactful cross-functional collaborations, delivering innovative solutions, ensuring on-time project delivery using Agile methods.

Capgemini

Hyderabad, India

SAP BW4HANA and S4HANA developer

October 2020 - March 2022

- Designed and implemented ABAP CDS Views to enable real-time data access and reporting in SAP S/4HANA, focusing on FI, GL, MM, SD modules. Developed CDS Table Functions and AMDP to handle complex calculations efficiently.
- Optimized CDS models by leveraging associations, annotations, and path expressions, improving query performance.
- Developed ABAP Managed Database Procedures (ADMP) to execute complex data transformations and calculations directly in SAP HANA, improving processing efficiency and reducing runtime by 40%.
- Implemented CDS-based authorization checks (DCL) for secure data access and role-based restrictions.
- Executed data extraction from SAP S/4HANA to BW/4HANA using BusinessObjects Data Services for seamless integration, and designed OData services for custom SAP Fiori apps to enable intuitive, real-time reporting interfaces.
- Received several client commendations for delivering multiple reports efficiently within tight deadlines and with limited resources, while ensuring high performance and quality

Accenture

Hyderabad, India

BW on HANA developer

March 2015 – February 2019

- Managed BW systems using BW Administrator Workbench, designing custom solutions, developing ABAP routines for advanced calculations, applying LSA/LSA++ architectures, creating custom extractors, data flow models, Advanced DSOs, Composite Providers, Open ODS Views, and enhancing reports with BEX Query Designer.
- Demonstrated a solid understanding of Data Warehouse concepts, OLAP, Star Schema, Snowflake Schema, Extended Star Schema, and data modeling through normalization and business process analysis.
- Demonstrated effective verbal and written communication skills by documenting system improvements, collaborating with stakeholders, and providing production and technical support, troubleshooting performance issues.
- Achieved SpotOn recognition four times for independent RFC development, 24x7 team management

PROJECTS

Best Places to Live in the USA for Your Dream Job

- Analyzed job opportunities, cost of living, and quality of life using Kaggle data and Excel to identify the best US cities for various professions. Utilized Python for data cleaning, Excel for advanced data analysis, and Alteryx for automating data workflows, improving processing efficiency by 30%.
