SUMMARY

GIS Technical Specialist on the EAD High Precision 2.0 project in the Transmission/Distribution department at SCE. Also, a recent Master's graduate in Geography with a specialization in urban planning.

WORK EXPERIENCE

GIS Technical Specialist/Scientist 1 at Southern California Edison (SCE), Pomona, CA Apr 2023-Feb 2025
Master data cGIS mapping / high fire area

- Provided reviews and corrections on mappers' projects as an approver to address issues and ensure data accuracy.
- Assisted leaders with spatial data management projects assigned to me, which may not be accessible to everyone.
- Searched diverse data sources such as aerial imagery and GeoViewer to assess boundaries, public, and private land use for mapping utility infrastructure, including overhead and underground poles in transmission and distribution layers.
- Analyzed land base and street surfaces on maps across districts to request updates and enhance cartography.
- Managed spatial data in ArcGIS to ensure alignment with spatial data in Autodesk AutoCAD Map3D.
- Used SAP and ADIS Data Analysis with work order maps (engineering blueprint) to ensure GIS structures align with field conditions.
- Digitized poles, conductors, segments, junctions, and transformers to support asset management through mapping.
- Coordinated with internal and external partners using Workflow Manager, Power BI, and Work Order Mapping Issues (WOMI) to resolve mapping discrepancies and project conflicts.
- Met deadlines and prepared daily reports to inform leadership of project status and challenges.
- Performed quality assurance and quality control (QA/QC) validation on spatial datasets to ensure data integrity.
- Edited and updated spatial data through GE Small World (GESW).

INTERNATIONAL EXPERIENCE/INTERNSHIP

Shahid Beheshti University, Tehran, IR

Spatial Analysis of Movie Theaters

Jan 2017-Dec 2017

Spatial analysis of movie theaters' locations to reduce traffic congestion and conserve the environment:

- Conducted spatial analysis using ArcMap to evaluate the impact of movie theater locations on traffic patterns and environmental sustainability; created GIS maps to support proposed planning solutions.
- Collected primary data through community engagement, managed and analyzed geospatial datasets, and presented findings using visual tools such as charts, graphs, and thematic maps for academic and planning audiences.

Accomplishment: Certificate of Paper admission, publication, and presentation at the 5th International Congress on Civil Engineering, Architecture & Urban Development.

Housing Analysis

Jul 2016-Dec 2016

Illegal housing analysis based on field work, regulations, zoning codes, and land use patterns:

- Collaborated with municipal staff to obtain the critical data for creating thematic GIS maps.
- Assessed the city's general and master plans to identify gaps between planning policies and residents' needs.
- Evaluated site plans, building codes, and zoning ordinances to reduce the occurrence of illegal housing.

EDUCATION

Master of Arts, Geography with a concentration in Urban Planning/Urban Studies, GPA 3.84/4

May 2022

California State University Fullerton, Fullerton, CA

Courses: GIS, Remote Sensing, Research Design, Urban Planning, Urban Management, Cartography.

Bachelor of Science, Geography & Urban Planning, GPA 3.81/4

Jul 2017

Shahid Beheshti University, Tehran, IR

ACADEMIC EXPERIENCE

California State University Fullerton, Fullerton, CA

Spatial Analysis of Los Angeles Neighborhood Parks

Aug 2020-Dec 2020

Evaluation of Los Angeles City neighborhood parks in terms of the number of parks, population density, playgrounds, amenities, and income to improve park accessibility for residents:

- Examined metadata and collected data from spatial data websites such as ESRI; organized and designed databases to create GIS maps with high cartographic quality.
- Analyzed, interpreted, and presented GIS maps to explain issues and provide solutions to improve park quality.

City Plans Analysis

Aug 2019-Dec 2019

Analysis of Irvine and Santa Ana Cities in terms of social equity, economic development, growth, natural environment, open space, transportation, housing, energy, infrastructure, redevelopment, and design:

- Reviewed the background of both cities and reviewed their zoning, land use, and general/master plans.
- Concluded the research by recommending plans to develop city services.

SKILL

Technical: ArcGIS Online (AGOL), ArcGIS Desktop, Autodesk AutoCAD Map3D, ArcMap10.8.1 and 10X, SAP, ERDAS Imagine, ADIS Data Analysis, SharePoint, GPS, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Microsoft Suite (Excel, Access, Word, PowerPoint, Outlook, OneDrive, Teams), Google Suite, Google Maps.

Bilingual: English, Persian/Farsi

CERTIFICATE

GIS certificate, from the Academic Center for Education, Culture, and Research (ACECR).

Apr 2016
