Professional Summary

Dynamic Business and Data Analyst with 6 years of experience delivering actionable insights and driving data-informed business strategies. Skilled in translating complex business needs into scalable technical solutions, managing end-to-end data workflows, and leading cross-functional teams through Agile methodologies. Proficient in SQL, Python, Power BI, and Tableau for analytics and reporting, and well-versed in requirement gathering, stakeholder collaboration, and system documentation. Passionate about solving business problems through data-driven storytelling and process improvement.

Core Competencies

- Business Analysis & Requirements Gathering
- Data Analysis & Visualization
- Software Development Life Cycle (SDLC)
- Agile, Scrum and Waterfall Methodologies
- Dashboard Development & KPI Reporting
- Risk Management & Compliance Analytics
- Process Optimization & Automation
- Data Cleaning, Modeling, Mining & Reporting
- UAT Planning & Support
- SQL Querying and Analysis
- Project Documentation (Business Requirements Document, Functional Requirements Document, User Stories)
- Strategic Problem Solving
- Stakeholder Management & Team Collaboration
- Data Conversion
- **Soft Skills & Mentoring:** Cross-functional collaboration, Client engagement, Mentorship, Emotional intelligence, Conflict resolution, Self-reflection & growth mindset

Technical Skills

- **Data Analysis & Visualization:** Tableau, Power BI (dynamic filters, parameters, LOD expressions, DAX functions), Excel (Pivot Tables, DAX functions), Alteryx, Snowflake
- **Programming & Tools:** Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R, SQL (MySQL, MongoDB, NoSQL), Jupyter Notebook, Visual Studio Code (VS Code), Github, ServiceNow, Oracle
- **Statistical Techniques:** Exploratory Data Analysis (EDA), Hypothesis Testing, Time Series Analysis, ANOVA
- **Business Tools & Techniques:** Agile, Scrum, JIRA, Confluence, SharePoint, Visio, Lucid chart, G-Suite, MS Word, MS PowerPoint, MS PowerAutomate
- **Cloud & Platforms:** AWS, Azure, Hadoop (HDFS, MapReduce), Apache Spark
- **Collaboration Tools:** MS Teams, MS Outlook, MS Project, MS Excel, MS Word, MS SharePoint, Adobe PDF, Confluence, Slack, Webex, Go To Meeting, Zoom, OneDrive, Dropbox
- **Machine Learning Knowledge::** Supervised & Unsupervised Learning, Linear & Logistic Regression, Decision Trees, Random Forest, XGBoost, Clustering (K-Means, Hierarchical), Model Evaluation (Precision, Recall, F1-Score, AUC ROC)

Professional Experience

Ernst & Young (EY), Associate (Business Analyst)

11/2021 –

- Led the implementation of automated financial risk management tools across global accounts, improving risk detection by 30%.
- Connected to large datasets from internal databases and APIs, ensuring clean, unified reporting sources through automated ETL pipelines.
- Created business and functional requirement documents (BRD, FRD) by conducting stakeholder interviews and JAD sessions.
- Collaborated on Agile and Waterfall projects, conducting JAD sessions, GAP analysis, and SWOT analysis to optimize business processes, reducing compliance issues by 25%.
- Developed automated reports and user-friendly dashboards in Power BI and Tableau, utilizing DAX, PowerQuery, and dynamic filters

for real-time insights into client revenue and compliance metrics.

- Participated in data conversion and data migration projects, ensuring data integrity during system migrations and data transformation processes.
- Contributed to a significant Business Process Re-Engineering (BPR) initiative that improved operational efficiency and streamlined reporting processes by identifying bottlenecks and automating manual tasks.
- Conducted time series analysis and forecasting using Python to identify anomalies in financial transactions.
- Participated in Agile ceremonies: sprint planning, backlog grooming, daily stand-ups, sprint reviews.
- Collaborated with product owners to translate stakeholder needs into detailed user stories and acceptance criteria
- Supported backlog refinement, prioritization, and sprint planning using JIRA and Confluence.
- Managed UAT sessions, created test cases, tracked defects, and provided post-deployment support.
- Designed and maintained Requirements Traceability Matrices (RTMs) to ensure complete coverage and alignment of business needs.
- Utilized SQL for extracting, cleaning, and aggregating large datasets to support internal audits and executive reporting.

AtkinsRéalis, Graduate Engineer

12/2018 – 10/2021

- Gathered and analyzed project requirements, ensuring alignment between technical teams, project managers, and business stakeholders.
- Analyzed business processes and systems using process mapping and flowcharts to identify opportunities for optimization
- Documented detailed As-Is and To-Be workflows using MS Visio to illustrate approval processes for project milestones, engineering change requests, and contract submissions.
- Assisted in eliciting functional and non-functional requirements from internal users including engineers, project managers, and compliance officers.
- Participated in regular Agile ceremonies including daily stand-ups, sprint planning, review, and retrospectives using Jira and Confluence.
- Tracked and reported project metrics to senior leadership, contributing to improved project efficiency and alignment with business objectives.
- Participated in drafting Business Requirement Documents (BRDs) and Functional Specification Documents (FSDs) based on workshops and one-on-one interviews
- Created user manuals, system training materials, and supported UAT sessions with over 20 department users, increasing adoption rate and reducing post-go-live tickets by 40%.
- Facilitated cross team workshops and meetings to communicate project goals and ensure all teams were aligned with project deliverables.
- Contributed to Business Process Re-Engineering (BPR) by identifying inefficient processes and recommending improvements to streamline operations.

Projects

- **Business Performance Dashboard:** Developed real-time dashboards to monitor KPIs and performance across departments
- **Client Profitability Insights:** Built reports to analyze revenue by client, region, and service line.
- **Financial Compliance Validator:** Automated client data checks against internal compliance rules.
- **Third-Party Risk Monitoring Tool:** Supported audit and validation of third-party financial transactions.
- **Forecasting Reports for Finance:** Created clean reports and analysis to assist in quarterly revenue planning.
- **Internal Audit Dashboard:** Built interactive dashboards to visualize audit results and track issues.
- **Data Migration Support:** Handled data validation and quality checks during migration to new platforms.
- **Anomaly Detection in Transactions:** Used Python to identify unusual patterns in financial data.
- **UAT Support & Test Case Management:** Planned and executed user testing across departments.
- **ETL and Reporting Automation:** Helped automate manual reporting workflows to save time and reduce error
- **User Story Management:** Maintained backlog by prioritizing and detailing user stories with clear criteria.

Certifications

- Certified Scrum Master (CSM)
- IBM Data Analyst Certification
- Power BI Certification from NIIT
