

PROFESSIONAL SUMMARY

As a highly skilled Business Systems Analyst with 7 years of experience leveraging technology to drive efficiency and growth across finance, healthcare, insurance, and nonprofit organizations, I excel at comprehensively analyzing workflows, anticipating needs, resolving issues, and implementing strategic solutions through a data-driven approach. With proficiency in Agile, Scrum, Kanban, and Waterfall methodologies, I have successfully managed incidents and changes, ensured smooth system operations, gathered requirements to facilitate collaboration between teams, and identified opportunities to optimize performance through my experience navigating complex challenges within diverse industries. Committed to outstanding results and customer service, I build strong partnerships founded on clear communication and responsiveness as a trusted advisor focused on tailored solutions that maximize productivity and outcomes.

CORE SKILLS

- Stakeholder Management
- Agile Methodology
- Data Modeling Analytics
- SharePoint
- Technical Proficiency
- Requirement Elicitation
- Salesforce
- Quality Assurance
- Office 365
- Jira
- Migration/ Integration
- Visio Confluence
- Tableau/ Python
- SQL
- ServiceNow
- SAP / S4HANA
- Dynamics 365(CRM/ERP)

PROFESSIONAL EXPERIENCE

Business Analyst /Product Owner

Aug 2023 – Present

Pizza Hut Cooperation – Texas (Remote)

- Collaborated with cross-functional teams at Deloitte to gather requirements, analyze business processes, and document user stories, resulting in a 20% reduction in project delivery time.
- Led the implementation of ServiceNow Incident and Change Management modules for 3 major clients, achieving a 30% increase in ticket resolution efficiency.
- Coach teams in Agile methods and problem-solving for on-time delivery
- Diverse experience across finance, supply chain, sales and e-commerce domains
- Utilized advanced Excel functions to create data models and dashboards, improving reporting accuracy by 25%.
- Conducted regular stakeholder meetings to ensure alignment with project milestones and deliverables, maintaining a 95% satisfaction rate.
- Developed and executed comprehensive test plans for ServiceNow upgrades, resulting in a 15% decrease in post-deployment issues.
- Assist with SAP HR to S4HANA transition and ensure productivity quality
- Conduct user testing to validate requirement fulfillment on enterprise resource planning (ERP) systems, customer relationship
- Communicate requirements and deliver artifacts to internal/external stakeholders
- Analyzed business needs and requirements to develop comprehensive specifications and documentation for technical teams
- Led multiple project requirement sessions weekly, ensuring all perspectives were represented
- Supported project managers and developers through implementation, serving as liaison between business and technical stakeholders
- Streamlined financial reporting process with automated SQL ETL extracts, reducing report delivery from weekly to daily
- Model processes and utilize PowerApps for workflow automation
- Lead full data migration during a major ERP system implementation, migrating customer, product, and order records from a legacy system.
- Analyzed data mapping requirements across many tables containing significant data volumes and created transformation rules.
- Improved migration quality through pre-migration data cleansing and validation activities.
- Managed end-to-end project lifecycles from planning to deployment using Agile methodologies
- Tracked milestones, deliverables, budgets, and resource allocation using JIRA and Salesforce
- Ensured on-time and on-budget deliveries through effective communication and attention to detail

- Enable rapid team response by eliminating hurdles across scope, time, and cost

Business System Analyst
Infosys – Texas (Remote)

Dec 2020 – Jun 2023

- Manage cross-functional projects and change initiatives for web and app insurance platforms.
- Collaborate with Product Owners and key stakeholders to translate business requirements into user stories.
- Provide 2nd/3rd level application support, troubleshoot incidents using ServiceNow, and ensure adherence to SLAs.
- Create change records for approval and implementation, leading the drive for continuous improvement.
- Managed pricing analytics projects, creating predictive risk profiling models and premium optimization algorithms in Teradata Vantage using policy and claims attributes
- Streamlined new annuity applications and underwriting workflows, digitizing paper-based processes. Reducing application turnaround from 10 days to 2 days.
- Identified opportunities to automate commission payments, increasing agent satisfaction.
- Assisted with the RFP process and managed vendor selection for the upgraded policy administration system.
- Conducted requirements gathering, process mapping, and data analysis to implement a new CRM system
- Led the design and implementation of a SQL database to centralize customer data
- Developed reports and dashboards in SQL Excel to provide actionable insights
- Developed and executed ETL processes to integrate policy, claims, billing, and CRM data from disparate legacy systems into a centralized data warehouse, enabling the creation of cohesive single-customer views and reducing redundant data entry.
- Routinely analyzed KPI dashboards tracking new business volume, customer retention, renewal conversion rates, and online service satisfaction surveys built using Tableau, identifying opportunities to boost performance retention and achieve service level targets.
- Established SQL stored procedures and business rules to automate data validation, QA checks, and standardization of incoming customer data fields from multiple lines of business, reducing manual effort spent on data cleaning by 50%
- Developed parameterized SQL stored procedures to calculate property exposure values from insured location data automatically, reducing underwriting cycle times.
- Partnered with the team to build and implement nonlinear regression models for homeowner's insurance ratemaking using property attributes like construction details, alarm systems, and liability coverage amounts, improving risk selection.
- Conducted annual rate filing submissions, developing comprehensive exhibits of historical and projected experience, actuarial assumptions, and executive summaries outlining recommended rate changes for state regulatory approval.
- Generate weekly reports using Excel, Tableau, Confluence & PowerPoint to identify trends and drive improvements.

Business System Analyst
United Health Care – Dallas, Texas

Mar 2018- Nov 2020

- Oversaw Level 3 production support, ensuring patient data security and support across various hospitals.
- Facilitated requirement gathering during go-live to implement hot fixes and optimize systems.
- Managed projects through the Agile/Scrum methodology, creating flow charts, use cases, and sequence diagrams.
- Developed test plans and performed User Acceptance Testing (UAT).
- Conducted interviews, workshops, and workflow analyses to gather requirements.
- Supported Development Teams throughout the software development life cycle.
- Provided pre- and post-go-live implementation support using Salesforce.
