

Rasheed Khan

Weymouth, USA | +1(857)395-1218 | rasheedkhan0903@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY:

Dynamic and impact-driven Data Engineer with 5+ years of experience in designing, building, and optimizing scalable data pipelines and cloud infrastructure. Skilled in AWS, PySpark, Databricks, and Snowflake, with expertise in ETL processes, big data technologies, and CI/CD automation. Proficient in Python, SQL, Terraform, and Kubernetes, with a strong focus on data processing, security, and cost optimization. Proven success in developing cloud-based solutions, enhancing system reliability, and driving operational efficiency through data-driven insights.

SKILLS:

Programming languages	: Python, Java, SQL, R
Databases	: MS-SQL, MySQL, MongoDB, NoSQL, DynamoDB, PostgreSQL, SparkSQL
Data Analysis & ETL	: Power BI, Tableau, Informatica, Databricks, Hive, BigQuery Airflow, Snowflake, Synapse, Docker, Kubernetes
Tools & Frameworks	: Microsoft Azure, GCP, AWS, CI/CD in Azure DevOps, NumPy, Pandas, PySpark, Matplotlib, seaborn, Git, Agile, SAS, Hadoop, Snowflake, Apache (Airflow, Kafka), Jenkins, Terraform, Schema designing, Data warehousing, Software development methodologies, NIST, HIPAA.
AWS Cloud components	: S3, EC2, VPC, ECS, EKS, Lambda, IAM, CloudWatch, New relic
Core competencies	: Collaboration, Data-driven decision making, Problem solving, innovation.

PROFESSIONAL EXPERIENCE:

Data Engineer, Well Fargo

Sept 2023 – Present | Remote, USA

- Developed and implemented scalable, secure, and highly available cloud infrastructures utilizing AWS EC2, S3, VPC, ECS, EKS, Lambda, and DynamoDB, guaranteeing fault tolerance and preparedness for disaster recovery.
- Developed Terraform and CloudFormation templates for automated AWS resource provisioning, cutting manual deployment time by 40%.
- Oversaw CI/CD pipelines with Jenkins, GitHub Actions, and Azure DevOps, improving software delivery efficiency by 30%.
- Developed and enhanced microservices deployment with Docker and Kubernetes (EKS & ECS), leading to a 20% decrease in application downtime.
- Deployed AWS IAM policies, Security Groups, KMS encryption, and compliance frameworks (HIPAA, PCI, SOX, GDPR, CCPA), achieving a 25% decrease in security risks.
- Employed AWS CloudWatch, New Relic, and OpsRamp for proactive system health monitoring, decreasing incident response time by 35%.
- Examined AWS expenditures through AWS Cost Explorer, applying resource auto-scaling policies to cut expenses by 25%.
- Identified and addressed crucial cloud infrastructure problems, enhancing system reliability and maintaining 80% uptime.

Data Engineer, Tata Consultancy Services

Jan 2019 – Jul 2022 | Hyderabad, IND

- Optimized 50+ SQL and PL/SQL queries in Oracle, reducing execution time by 25% and improving data retrieval performance.
- Enhanced 1M+ daily telecom transactions by building a Snowflake data warehouse on AWS, reducing query execution time by 60%.
- Engineered AWS-based data pipelines using AWS Glue, Lambda, and Redshift, improving report efficiency by 12% and enabling real-time analytics for 5,000+ users.
- Implemented a proactive database monitoring solution using AWS CloudWatch and AWS Lambda, increasing issue detection speed by 22% and reducing downtime incidents from eight to five per month.
- Mentored team members in AWS data engineering best practices, enhancing team capabilities and project outcomes, leading to a 20% improvement in project delivery speed.
- Automated deployments by implementing CI/CD pipelines using AWS CodePipeline, CodeBuild, and GitHub, improving release efficiency.

ACADEMIC PROJECTS:

Big Data Analytics NYC Motor Vehicle Collision

- Designed and implemented a scalable ETL pipeline to integrate 3 large NYC motor vehicle collision datasets to enable data-driven insights.
- Created interactive tableau dashboards to visualize accident trends supporting government agencies reducing road-risk.

Prediction Monkeypox Cases Using Machine Learning

- Developed 3 ML models, i.e., Logistic Regression, SVM and Random Forest to predict monkeypox cases by analyzing patients data and epidemiological trends.
- Improved model accuracy by 33% making predictions more reliable; awarded best project by google Data Engineer.

EDUCATION:

Masters in Data Science, University of Maryland, Baltimore County

Aug 2022 – May 2024

Coursework: Data Management, Data Science, Big Data, Math behind Machine learning, Deep Learning, Project Management

Bachelors in Information Technology, JNTU

July 2017 – Jun 2021

Coursework: Programming, DBMS, DSA, Data Warehousing, Cloud Technologies, Software Engineering, Web Technologies, IOT
