

Dynamic and innovative Certified AWS Solutions Architect and accomplished Cloud System/DevOps Engineer with 6+ years of professional experience with expertise in development, designing and deploying robust business applications across diverse environments, encompassing both public and private clouds, leveraging advanced n-tier technologies.

## WORK EXPERIENCE

**Dish Network** *Cloud System Engineer - Member of Scientific Staff* Denver, CO Sept 2022 – Present

- Spearheaded deployment, development, and testing of cloud-native solutions for flagship in-house projects based on IoT device infrastructure, image processing, IoT (Infrastructure on Terragrunt), data platform, deep learning and AI/ML, while automating tasks in various environments, particularly production.
- Conducted in-depth analysis for setting benchmarks and driving continuous improvement for a notable presence at **AWS RE: Invent 2022** as **Product Manager**.
- Pioneered Everything as Code (EaC) through Terraform, Terragrunt, and Flux, automating deployment processes.
- Led research on IOT device identification and protocol adaptation, focusing on HTTPS and MQTT for potential lighthouse applications.
- Development on Orchestrator in order to host applications from where namespaces and pods are being deployed in the child cluster as soon as the IoT device gets connected to our network through Orchestrator.
- Developed and deployed AWS services (EKS, SQS, SNS, VPC, Helm, KMS) using Terraform and Terragrunt for IOT initiatives.
- Ensured lifecycle adherence through meticulous data process monitoring, detailed documentation(LLD), and continuous improvement for Data Platform Harmonization for Cisco.
- Implemented end-to-end CICD with AWS CodeDeploy and Lambda, automating data transfer processes via GitHub mirroring for seamless collaboration.

**Vetro Technologies Inc** *DevOps Engineer* Denver, CO July 2022- Sept 2022

- Cross-functional DevOps integration with a focus on EKS for container orchestration.
- Developed Python-based tools for streamlined deployment, leveraging AWS Cloud9.
- Collaborated on code optimization using Terraform and Python for performance and scalability.
- Architected scalable solutions with Infrastructure as Code principles, emphasizing containerization.
- Ensured cloud security and compliance through meticulous IAM policies.
- Designed and maintained CI/CD pipelines with AWS CodeDeploy and CodeCommit.
- Drove automation initiatives for infrastructure scaling, reducing manual intervention.
- Resolved technical issues promptly, contributing to continuous improvement.
- Documented processes and decisions, integrating monitoring tools and Flux for GitOps practices.

**AT&T** *DevOps Engineer/LAM Consultant* Denver, CO Sept 2020- Apr 2022

- Designed and optimized data pipelines for efficient ETL processes, utilizing Python scripting for automation and collaboration with data scientists.
- Architected AWS-based infrastructure with EC2, S3, IAM, and more. Implemented CI/CD pipelines, IaC with Terraform/CloudFormation, and optimized Amazon EC2 and S3. Documented architecture and procedures for knowledge sharing.
- Collaborated on IAM solutions, automated processes with Python on AWS, communicated concepts, and maintained detailed documentation for compliance.
- Integrated DevOps practices, EKS for container orchestration and provided guidance to vendors. Developed and maintained Python-based tools optimized code using Terraform and Python. Architected scalable solutions with IaC principles and containerization.
- Ensured security and compliance with IAM policies. Implemented robust CI/CD pipelines with AWS CodeDeploy and CodeCommit. Drove automation initiatives, identified and resolved technical issues, documented processes, and conducted VMWare cleanup and SDNC processes.
- Implemented Identity Management solutions with IAM applications (ISAM, OKTA, Postman) for seamless integration and management of application and cloud services.

## EDUCATION

## SKILLS

**University of the Cumberland** MS Business Administration (Executive) - Present

**University of Alabama at Birmingham** MS Computer Science- 2020

**Bahria University** BS Software Engineering - 2016

### Certifications:

AWS Certified Solutions Architect-Associate  
AWS Certified Solutions Architect-Professional  
AWS Certified DevOps Engineer-Professional

**Software Engineering:** Agile methodologies, Version Control (Git, Github), CI/CD, OOP, TDD, System Design, API Development.

**Computer Science:** Data Structures, Computer Networks, SQL & NoSQL databases, Cybersecurity principles.

**Cloud Technologies/DevOps:** AWS (EC2, S3, EKS, CloudWatch, Lambda, CloudFormation, VPC, Network Gateways, SQS, Eventbridge, Helm, IAM, Security Group, ECS, Code Build, Code Commit, Code Deploy, Docker, Kubernetes, CI/CD, IaC, Git, Infrastructure Automation.

**Security:** ISAM, OKTA, OAuth, SSO, OpenID Connect

**Development:** IaC(Terraform, Terragrunt), Python, C#, MVC, PHP, C++, Bootstrap, JSON, YAML, Jira

## Leadership And Project Implementation

Served as primary Product Manager for AWS Re:Invent 2022, Consolidated Data Platform Harmonization Technical Requirements and (LLM)Documentation, Has served as a Project Manager for Case Studies based on Problem Statements, Utilized python, Terraform, Terragrunt, EKS, Flux and GitOps to accomplish Parent-Child relationship in one of the DISH based project.
