SKILLS

Backend Development: Java | Python | Spring Boot | Microservices | Distributed Systems Data

Frontend Development: React | Angular | JavaScript | HTML | CSS | TypeScript

Pipelines & Cloud: Kafka | Apache Flink | Airflow | AWS (S3, Lambda, DynamoDB) | GCP (BigQuery, Vertex AI)

Generative AI & ML Infrastructure: LLMs | Multi-Modal AI | Large Vision Models | Model Deployment | Optimization | Data Processing | PyTorch | TensorFlow | Scikit-Learn

Software Engineering: System Design | API Development | Performance Optimization | Debugging & Troubleshooting | Large-Scale Systems

Database: MySQL | MongoDB | PostgreSQL

Soft Skills: Problem-Solving | Leadership | Collaboration | Attention to Detail

EXPERIENCE

Discover Financial Services

Software Engineer | Full Stack, Payments, Cloud | July 2023 - February 2025

- Developed and maintained **high-availability payment processing systems** handling millions of transactions daily.
- Designed and optimized **secure checkout APIs**, reducing payment failure rates by **25%**.
- Built **React-based** front-end components for seamless **Google Pay** integration.
- Implemented distributed, event-driven microservices using **Kafka & GCP**, improving real-time fraud detection.
- Led **code reviews and design discussions**, ensuring adherence to best practices and accessibility guidelines.

Implemented scalable microservices and AI-powered fraud detection systems, enhancing transaction security and reducing fraudulent activities by 40%.

Cognizant

Software Engineer | Cloud, Microservices, ML | November 2019 - July 2021

- Engineered **scalable full-stack applications** for financial analytics using **Python, TypeScript, React, and AWS**.
- Developed secure authentication systems with **OAuth & JWT**, enhancing **API security**.
- Optimized database performance using **PostgreSQL & BigQuery**, reducing query latency by 40%.
- Led **technical discussions and software architecture** decisions to improve system efficiency two folds.
- Enhanced **data storage and retrieval performance** by optimizing **BigQuery & MongoDB**.

EDUCATION

University of South Florida (USF)

M.S., Computer Science | GPA: 3.9/4 | 2023

HONORS & AWARDS

- **USF Most Impactful Project (CS)** –Recognized for optimizing an **AI/ML project**, reducing turnaround times by **50%**.
- **Best Startup Award – Co-founded [PractiseHub](#)**, a robotics education startup. Won **Best Startup** across multiple competitions.

COURSEWORK

Machine Learning | Deep Learning | Data Structures & Algorithms | Cloud Computing | Distributed Systems

INTERESTS

Fitness | Nutrition | AI Research | Startup Innovation
