Summary

Certified Salesforce Developer/Admin with 5+ years of experience designing and delivering scalable Salesforce solutions across banking, fintech, and financial services domains. Proven track record of integrating Salesforce with core banking systems and marketing platforms using REST/SOAP APIs and MuleSoft, while driving automation, enhancing user productivity, and ensuring regulatory compliance (GDPR, SOX, HIPAA, RBI). Skilled in Apex, Lightning Web Components (LWC), Salesforce DX, Copado, and Einstein Analytics. Adept at working in Agile environments, enabling zero-downtime deployments and optimizing CRM adoption across cross-functional teams.

Technical Skills

Salesforce Platform & Development: Salesforce Sales Cloud, Service Cloud, Marketing Cloud (Marketo, Pardot), Salesforce Platform (App Builder, Lightning Experience, Mobile App), Apex (Classes, Triggers, Batch Apex, Queueable Apex, Schedulable Apex), Lightning Web Components (LWC), CPQ, Aura Components, Visualforce, Flows, Process Builder, Workflow Rules, Approval Processes, Validation Rules, Record Types, Page Layouts, Custom Objects/Fields, Salesforce Shield, Field-Level Security (FLS), Role Hierarchies, Sharing Rules

Integration & Middleware: RESTful and SOAP Web Services, MuleSoft Anypoint Platform (API Management & Orchestration), Named Credentials, External Services, Callouts, Integration with ERP (SAP, Oracle), MarTech (Marketo, Pardot), Core Banking APIs

DevOps & Deployment: Salesforce DX (SFDX), Scratch Orgs, Unlocked Packages, Version Control: Git, Bitbucket, CI/CD Tools: Jenkins, Copado, Change Sets, VS Code with Salesforce Extensions, CLI Tooling

Data Management & Migration: Data Loader, Workbench, Data Import Wizard, Apex Data Loader Scripts, Informatica Cloud, Data Cleansing, Deduplication, and Validation Best Practices

Analytics & Reporting: Einstein Analytics / CRM Analytics (formerly Wave/Tableau CRM), Report Builder, Dashboards, Joined Reports, KPI Dashboards for Sales, Loan Origination, Risk & Compliance

Security & Compliance: GDPR, SOX, HIPAA, RBI (India) Compliance Standards, Salesforce Shield Encryption, Profile & Permission Management, Audit Trails

Project Management & Agile Tools: Agile / Scrum Methodology, JIRA, Confluence, Slack, Microsoft Teams, Sprint Planning, Standups, Retrospectives

Work Experience

JP Morgan Chase, USA | Jan 2024 – Present

Domain: Banking – CRM for Retail & Commercial Banking Operations

- Supporting Salesforce solutions for a **banking CRM platform** that manages **retail, commercial, and mortgage customer journeys**, onboarding, and financial product servicing.
- Integrated Salesforce with **core banking systems** (SAP, Oracle) and **marketing automation tools** (Marketo, Pardot) using **REST APIs, MuleSoft, and SOAP** — reduced data discrepancies by **98%**, ensuring **real-time sync** between customer data, loan systems, and campaign workflows.
- Automated **lead qualification, sales workflows, and opportunity management** using **Flows, Process Builder**, and **Apex Triggers**, accelerating loan sales cycles and reducing manual hand-offs by **25%**.
- Developed and deployed **Lightning Web Components (LWC)** and a **mobile-optimized Salesforce app** used by financial advisors and loan officers — increased field team productivity by **30%**.
- Created **real-time dashboards** using **Einstein Analytics** and **Tableau CRM**, providing executive stakeholders with live visibility into **sales targets, loan disbursements, and branch performance KPIs**.
- Implemented **security controls** including **Role Hierarchies, Sharing Rules**, and **Field-Level Security** to protect **sensitive customer financial data**, ensuring full compliance with **GDPR, SOX, and HIPAA** policies.
- Led implementation of **CI/CD pipelines** using Git, Bitbucket, Jenkins, and Copado — enabled **zero-downtime deployments** and accelerated release velocity for new features and regulatory updates.
- Conducted **training and user enablement sessions** for relationship managers, sales admins, and compliance teams — improved CRM usage quality and **increased reporting accuracy by 20%**.

Salesforce Developer

Version1, India | Feb 2020 – Feb 2022

Domain: Fintech – Loan Origination, Customer Onboarding, Credit Risk

- Engineered scalable Salesforce solutions for a **fintech CRM platform** supporting **loan origination, credit risk evaluation**, and **customer onboarding workflows**.
- Automated high-volume financial operations using **Apex (Triggers, Classes, Batch Apex)** — reduced manual intervention by **40%**, supporting regulatory readiness.
- Designed and deployed **LWC & Aura Components** for mobile-first, high-performance user interfaces — improved sales and credit officer efficiency by **30%**.
- Integrated Salesforce with **core banking systems** (SAP, Oracle) and **MarTech stacks** (Marketo, Pardot) using **REST/SOAP APIs** and **MuleSoft**, ensuring **98% cross-platform data accuracy**.

- Built **approval process flows** for credit risk and KYC operations using **Flows, Process Builder**, and dynamic record routing — cut processing time by **50%**.
- Led end-to-end **data migration from legacy systems** using Data Loader, Informatica, and Apex scripts — ensured **99% accuracy** of financial data.
- Developed real-time **Einstein Analytics dashboards** to track loan approvals, pipeline health, and delinquency trends — improved leadership decision-making.
- Enforced **data governance and security policies** via **Shield Encryption, Role Hierarchies, and Sharing Rules**, ensuring compliance with **GDPR, SOX, and RBI guidelines**.
- Implemented modern DevOps using **Salesforce DX, Git, Jenkins, and Copado**, accelerating release cycles by **35%** with **zero downtime**.
- Conducted user training and support sessions for credit, operations, and compliance teams — increased CRM adoption and data hygiene by **25%**.

Salesforce Developer

Sigma Info Tech, India | Feb 2018 – Jan 2020

Domain: Financial Services – Banking, Insurance, Customer Support

- Delivered scalable Service Cloud solutions for a **banking and insurance client platform**, streamlining **case management, claims handling, and support ticket routing**.
- Built custom **Apex Triggers, Batch Classes**, and automation logic to manage regulatory communications and time-sensitive customer escalations — reduced manual workload by **40%**.
- Developed **LWC dashboards** for agents to view live case statuses, SLAs, and compliance flags — enhanced support team performance by **25%**.
- Replaced legacy case workflows with optimized **Flows, Process Builder**, and Escalation Rules — improved operational SLAs by **20%**.
- Integrated external financial tools and services via **REST/SOAP APIs**, ensuring **real-time data sync** for customer account access and credit info.
- Strengthened compliance readiness through **secure configuration of Profiles, Permission Sets, and FLS**, aligned with **GDPR & SOX** standards.
- Executed **bulk data migrations** from CRM and legacy tools using **Data Loader and Workbench** — maintained **95% accuracy** on customer financial data.
- Deployed customizations and updates using **Salesforce DX and Git**, maintaining high code quality with **zero-downtime rollouts**.
- Worked in **Agile environments** with cross-functional teams — participated in sprint planning, demos, and retrospectives via **JIRA**.

Education

Master of Science in Technology Management

April 2024

Lindsey Wilson College

Columbia, KY

Projects

Travel Approval Lightning App

Technologies: Salesforce Lightning, Apex, Custom Objects, Process Automation

- Developed a custom **Travel Approval App** to streamline **business travel requests, expense tracking, and managerial approvals**, resulting in **15+ hours saved weekly**.
- Built and optimized **Custom Objects, Flows**, and validation logic to automate multi-stage approvals and reduce administrative workload by **10 hours per week**.
- Designed responsive **Lightning Components** and implemented **role-based access controls**, enhancing UX and data protection.
- Automated email notifications and real-time approval tracking, increasing team **communication efficiency by 30%**.

Recruiting Management Application

Technologies: Salesforce Platform, Custom Objects, Junction Objects, Data Modeling

- Designed and developed a **Recruiting Application** to support **candidate tracking, interview scheduling, and offer management** within Salesforce.
- Improved HR operational efficiency by **20%** through streamlined use of **custom and junction objects** and effective relationship modeling.
- Implemented **scalable data architecture** and Salesforce **security protocols**, enhancing **data security by 30%**.
- Applied best practices in automation and UI design, resulting in a **10% increase in recruiter productivity**.

Certifications

- Salesforce Certified Administrator (SCA)
- Salesforce Platform Developer- I
- Salesforce Platform Developer- II
