

Solange NDIP

SQL Server Database Administrator

Missouri City, TX, 77489 | +1 (425) 393 8170 | solangendip23@gmail.com | linkedin.com/in/solange-ndip

PROFESSIONAL SUMMARY

Experienced SQL Server Database Administrator with 7+ years of expertise in managing and optimizing enterprise-level databases across on-premises and cloud environments (AWS, Azure). Proven track record of implementing high-availability solutions that achieve 99.99% uptime and disaster recovery strategies that reduce RTO/RPO by 90%. Skilled in performance tuning that has improved query response times by up to 45% and reduced infrastructure costs by \$250,000 annually. Proficient in database security compliance (HIPAA, SOX, FISMA, PCI, GDPR) and automation that reduces manual workload by 10+ hours weekly. Experienced in leading cross-functional teams and managing large-scale database migrations with zero downtime.

CORE COMPETENCIES

Database Management: SQL Server 2016/2019/2022, Oracle, MySQL, PostgreSQL, NoSQL (MongoDB, Cassandra)

Cloud Platforms: AWS RDS/EC2, Azure SQL, Google Cloud SQL, Database-as-a-Service (DBaaS), Cloud Migration

High Availability & DR: AlwaysOn Availability Groups, Failover Cluster Instances, Log Shipping, WSFC, Backup/Recovery

Performance Optimization: Query Tuning, Index Optimization, Execution Plan Analysis, Database Caching, Resource Monitoring

Security & Compliance: TDE, Always Encrypted, Row-Level Security, Dynamic Data Masking, HIPAA/SOX/PCI/GDPR

Automation & DevOps: PowerShell, Bash, SQL Server Agent, CI/CD Integration, Infrastructure as Code

Data Integration: SSIS, ETL Processes, Data Migration, Data Warehousing, SSRS/SSAS/Power BI

Monitoring Tools: SQL Server DMVs, Extended Events, Performance Monitor, SolarWinds DPA, Datadog/CloudWatch

PROFESSIONAL EXPERIENCE

Database Administrator Advisor

Walgreens Inc., Chicago, IL

March 2023 - Present

- Manage and optimize enterprise-scale SQL Server infrastructure supporting 8,000+ retail stores and 250,000+ employees, ensuring 99.99% system availability.
- Led database consolidation initiative reducing SQL Server instances by 30%, resulting in \$250,000 annual cost savings in licensing and hardware expenses.

- Implemented automated backup and recovery processes that decreased database restore time by 40% and enhanced system availability to 99.99%.
- Executed comprehensive performance tuning strategy resulting in 35% faster query response times and 25% reduction in CPU utilization across production servers.
- Successfully migrated 50+ mission-critical databases to SQL Server 2022, completing the project 2 weeks ahead of schedule with zero downtime.
- Designed and implemented disaster recovery architecture with 99.99% uptime guarantee, preventing potential revenue losses exceeding \$600,000.
- Developed and optimized ETL packages using SSIS for streamlined data processing, improving data integration efficiency by 30%.
- Enhanced database security posture through implementation of TDE, Always Encrypted, and Row-Level Security, ensuring compliance with HIPAA, SOX, FISMA, and PCI standards.
- Orchestrated cloud migration strategy, successfully transitioning on-premises databases to AWS RDS and EC2 instances with minimal service disruption.
- Implemented database monitoring solutions using CloudWatch and SolarWinds DPA, reducing incident response time by 40%.

Database Administrator

Kiawitech IT Consulting, Houston, TX

November 2021 - March 2023

- Implemented AlwaysOn Availability Groups for business-critical databases, achieving 99.995% uptime and reducing failover time from 15 minutes to under 1 minute.
- Optimized database performance through index tuning and query optimization, resulting in 45% reduction in average query execution time.
- Developed comprehensive disaster recovery strategy that decreased Recovery Time Objective (RTO) from 4 hours to 30 minutes and Recovery Point Objective (RPO) from 1 hour to 5 minutes.
- Automated routine DBA tasks using PowerShell and SQL Server Agent jobs, saving 10+ hours weekly in manual administration work.
- Led database upgrade project from SQL Server 2008 to 2016, resulting in 75% performance improvement and 60% reduction in system downtime.
- Implemented data governance framework including data cleansing procedures and batch processing to maintain data integrity and accuracy.
- Designed and deployed multi-site high availability solution achieving 99.99% uptime for mission-critical systems.
- Conducted regular security assessments and implemented encryption solutions to protect sensitive data, ensuring compliance with industry regulations.

Database Administrator

CAMTEL (Cameroon Telecommunications), Yaoundé, Cameroon

September 2018 - October 2021

- Managed and optimized SQL Server databases supporting telecom infrastructure serving 5+ million customers across Cameroon.
- Implemented automated backup and recovery processes, increasing system reliability and reducing data loss incidents by 95%.
- Developed and executed database performance optimization plan, resulting in 40% faster query response times and 30% reduction in server resource utilization.

- Successfully migrated legacy databases to SQL Server 2019 three weeks ahead of schedule with zero service disruptions.
- Created comprehensive documentation in Confluence covering database structures and procedures, reducing onboarding time for new team members by 50%.
- Collaborated with network operations team to enhance database performance for critical telecommunications services, improving overall network reliability by 25%.
- Implemented database monitoring and alerting system that reduced incident response time by 35%.

Service Desk Technician

CAMTEL (Cameroon Telecommunications), Yaoundé, Cameroon

June 2016 - September 2018

- Provided technical support to internal and external clients, resolving approximately 50 support requests daily with 95% satisfaction rating.
- Diagnosed and resolved hardware, software, and network issues for 1,000+ employees across multiple office locations.
- Implemented new ticketing system that improved response times by 30% and enhanced service desk efficiency.
- Conducted end-user training on common IT challenges and best practices, resulting in 25% reduction in recurring support tickets.
- Recognized for exceptional problem-solving and customer service skills, receiving 'Employee of the Month' award twice in 2020.
- Pursued SQL Server certification courses while maintaining full-time service desk responsibilities, demonstrating commitment to professional development.

EDUCATION

Master of Science (M.Sc.): Management Information Systems (MIS) and Biotechnology

University of Buea, Cameroon

September 2016 - December 2018

Bachelor of Science (B.Sc.): Computer Science

Catholic University in Cameroon, Bamenda, Cameroon

September 2013 - December 2016

CERTIFICATIONS

- SQL Server 2016/2017/2019 Database Administrator
- Azure Database Administrator Associate (DP-300)
- Azure Fundamentals & Azure Data Fundamentals (AZ-900 & DP-900)
- AWS Certified Database – Specialty certification
- Microsoft Certified: Data Management and Analytics (In Progress)
- Oracle Database 19c Administrator Certified Professional (In Progress)
