Education

Wilmington University

MS in Information Systems Tech

Aug 2023 – Dec 2024

wilmington

Lovely Professional University

B.Tech In Computer Science Engineering

Aug 2016 – June 2020

Punjab, India

Experience

Aaseya Solutions Pvt Ltd

Senior Consultant

Aug 2018 - Aug 2023

Hyderabad, India

- Designed and developed scalable, multi-tenant applications using the **OutSystems Platform**, streamlining business workflows and enhancing system flexibility.
- Led the development and integration of **OutSystems Web and Mobile applications**, incorporating complex **RESTful APIs**, SOAP services, and custom extensions.
- Optimized performance of Pega and OutSystems applications, identifying and resolving bottlenecks through advanced debugging techniques and performance monitoring tools.
- Implemented complex data models and relations, using **OutSystems Entity Model** and optimized database queries to enhance data access performance.
- Led cross-functional teams in adopting **Agile development methodologies**, improving delivery timelines and increasing project success rates by 20%.
- Customized user interfaces (UI) using **HTML5**, **CSS**, and **JavaScript**, enhancing user engagement and boosting satisfaction by 30%.
- Integrated automated deployment pipelines using **OutSystems Lifetime** and **Jenkins**, streamlining version control and release management.
- Implemented **OAuth 2.0**, **SAML authentication mechanisms** to ensure secure application access and compliance with financial industry standards.
- Deployed and maintained OutSystems applications on **AWS** and **Azure**, optimizing scalability and performance through **load balancing** and **auto-scaling** strategies.
- Tuned **SQL queries and indexes**, reducing query execution time by 40% and improving application responsiveness.
- Designed **microservices architecture** with modular components for OutSystems applications, increasing maintainability and reducing deployment downtime.
- Leveraged **OutSystems asynchronous processing mechanisms** (Timers, BPTs) to enhance system responsiveness and workflow automation.
- Configured **OutSystems logs**, **Splunk**, and **New Relic** for proactive system monitoring, reducing issue resolution time by 35%.
- Enforced best practices through **OutSystems Architecture Dashboard**, identifying code bottlenecks and ensuring long-term maintainability.

Certifications

Associate Reactive Developer – OutSystems (Issued Oct 2020)

Associate Traditional Web Developer – OutSystems (Issued Jun 2020)

Certified Senior System Architect (CSSA) – Pegasystems (Issued Jan 2020)

Certified System Architect (CSA) – Pegasystems (Issued Jun 2019)

Big Data Foundations – Udacity (Issued Jul 2018)

- **Union Bank – Digital Banking Platform**

- Architected and developed a **comprehensive digital banking solution** using **OutSystems**, enabling seamless customer interactions across web and mobile applications.
- Integrated **RESTful APIs** and **SOAP web services** to facilitate secure transactions, **real-time payments**, and **automated loan processing** with third-party financial institutions.
- Implemented advanced **business process management (BPM)** and **case management** workflows to streamline operations, improving efficiency by **over 60%**.
- Developed robust **authentication and authorization mechanisms** using **OAuth 2.0**, and **RBAC (Role-Based Access Control)**, ensuring enterprise-grade security.
- Optimized **data models** and leveraged **aggregates** for high-performance queries, reducing response times and enhancing system scalability.
- Automated **CI/CD pipelines** using **OutSystems LifeTime**, **Git integration**, and **Azure DevOps**, accelerating deployment cycles and improving release management.
- Leveraged **AWS and Azure cloud services** for **scalable infrastructure**, implementing **auto-scaling**, **load balancing**, and **serverless functions** for enhanced availability.
- Collaborated with cross-functional teams using **Agile methodologies**, ensuring rapid prototyping and continuous improvements to meet regulatory and compliance standards.

- **Union Bank – Investment Trust Management System**

- Designed and developed a **multi-tenant Investment Trust Management System** using the **OutSystems Platform**, ensuring **secure role-based access** for investors, advisors, and trust administrators.
- Implemented automated **document generation and workflow processing** using **Ultimate PDF** and **BPM** modules, reducing manual effort by **40%**.
- Integrated **RESTful APIs** and **SOAP web services** for real-time **portfolio management**, **fund transfers**, and **investment tracking**, ensuring seamless external system connectivity.
- Engineered complex **aggregates**, **advanced queries**, and **optimized entity relationships** to handle high-volume financial data efficiently.
- Customized the front-end with **JavaScript**, **CSS**, and **React-like widgets**, enhancing the **user experience** across web and mobile applications.
- Ensured **high availability and scalability** by adhering to **OutSystems best practices**, including **modular architecture** and **reusable components**.
- Deployed the system on **AWS and Azure cloud environments**, utilizing **auto-scaling**, **load balancing**, and **serverless functions** for optimal performance.
- Facilitated rapid development and deployment cycles through **CI/CD pipelines** using **OutSystems LifeTime**, **Git integration**, and **Azure DevOps**.

- **Document Digitization and OCR Automation**

- Delivered a cloud-based **Document Digitization Solution** using **OutSystems**, incorporating OCR capabilities for automated document classification and data extraction.
- Integrated **Machine Learning models** to enhance the accuracy of extracted data, automating workflows for over 10,000 clients.
- Designed and implemented multi-tenant architecture to ensure robust security and operational efficiency.
- Configured **SOAP and RESTful APIs** to facilitate seamless data exchange with external systems.
- Enhanced application performance by optimizing advanced aggregates and implementing proactive monitoring.

- **Scottish Government Passporting Application**

- Developed a **Passporting Application** for **Social Security Scotland** using the **OutSystems Platform**, ensuring compliance with **W3C Accessibility Standards**.
- Designed data models and optimized **entity relationships and advanced aggregates** for efficient data handling.
- Leveraged the **Case Management Framework** to develop dynamic workflows for administering social benefits.
- Integrated with legacy systems via **REST APIs** and ensured seamless data exchange with government departments.
- Collaborated with UX/UI teams to create responsive interfaces using **JavaScript**, **CSS**, and OutSystems Reactive Web.
- Utilized **OutSystems PDC and debugging tools** to monitor performance and resolve bottlenecks.

- **Investor Onboarding Portal**

- Designed and developed a secure, scalable **Investor Onboarding Portal** using the **OutSystems Cloud**, automating KYC and compliance workflows for financial institutions.
- Automated the generation of contracts and subscription materials with **Ultimate PDF** integration, enhancing compliance.
- Implemented dynamic user roles and permissions for robust **role-based access control (RBAC)**.
- Built and optimized custom connectors using **Integration Studio** to enable seamless third-party API integration.
- Configured **SLAs, agents, and job schedulers** to enable workflow automation and task prioritization.

- **HR Ticketing System**

- Developed an internal **HR Ticketing System** leveraging **OutSystems Case Management Framework** for managing employee queries and support tasks.
- Designed reusable components for ticket creation, assignment, and resolution workflows to streamline HR operations.
- Integrated RESTful APIs to synchronize the system with existing HR tools for real-time updates.
- Enhanced the UI with **JavaScript, CSS**, and responsive designs for improved user experience.
- Utilized **OutSystems monitoring tools** to optimize system performance, achieving a 20% improvement in response times.

- **Abu Dhabi Executive Office (ADEO)**

- * Designed and implemented a policy and strategy management system for the Abu Dhabi Executive Office (ADEO) using **Pega PRPC v8.x**, ensuring compliance with legislation and optimized governance processes.
- * Utilized Pega's **Case Management framework** to streamline workflows for the issuance of legislations, including laws, decrees, resolutions, and regulations, ensuring adherence to enterprise-level class structure design and ruleset layering for reusability.
- * Developed and maintained **system integrations** for performance monitoring, coordinating with external systems using SOAP and REST connectors, file listeners, and database queries.

- **Ministry of Municipal Rural Affairs & Housing (MoMRAH) – Centralized City Management System**

- * Developed and deployed a modular, scalable **Centralized City Management System** for MoMRAH using **Pega PRPC v8.x**, enabling centralized oversight of municipal operations.
- * Designed critical modules, including **Departments & Divisions, Contracts Management, Municipality Management, and Operational Work Plans**, to digitize and streamline city management tasks.
- * Integrated **advanced workflows** for contractors' management, operational catalogues, and work execution plans using Pega's **flow and activity features**.

- **e-Pragati – Digital Transformation for Andhra Pradesh Government**

- * Contributed to **e-Pragati**, the world's largest Pega-based e-governance project, which digitized Government-to-Citizen (G2C), Government-to-Business (G2B), and Government-to-Government (G2G) services.
- * Designed and implemented student lifecycle management modules, including **Student Profiles, e-Admissions, Certificates, Academic Progression, and Scholarships**, using Pega's **data modeling** and **UI features**.

Skills

Pega Skills: Pega PRPC v7.x/v8.x, OutSystems, Case Management, Decisioning, SLA Configuration, Rule Resolution, Integration Rules (SOAP, REST, Connectors, Services), Agents, File Listeners, Queue Processors, Job Schedulers, Pega Layering Concepts, and Application Security (Authentication Authorization), Mobile App Development, Web App Development, Application Security, Database Extensions.

Cloud Platforms: Pega Cloud, GCP, Azure, and AWS.

Programming Languages: Java, JavaScript, HTML5, CSS, XML, SQL.

Integration and APIs: RESTful APIs, SOAP APIs, Service-Oriented Architecture (SOA), Data Pages, and Data Transforms.

Performance Tuning and Debugging: Pega Diagnostic Cloud (PDC), Performance Analyzer (PAL), Tracer, and Log Analyzer.

DevOps and Deployment: CI/CD Pipelines, Branching, Merging, Skimming, Deployment Tools (e.g., Jenkins).

Databases: Relational Databases (Oracle, PostgreSQL, MySQL).

Agile Development: Agile and Scrum Methodologies, JIRA/Confluence.
