

ADARSH D

Java Full Stack Developer

Phone: 513-278-7114

Email: adarshreddy1245@gmail.com

PROFESSIONAL SUMMARY:

- Over 10 years of experience in the IT industry with consummate experience in analysis, design, development and testing client server and n-tier applications using Java and J2EE.
- Expertise in Software Development Life Cycle (SDLC) like Analysis, Design, Development, Testing, Implementation, Enhancement, Production Support and Change Management of business applications, even used methodologies like Agile Scrum, Waterfall and TDD development.
- Experienced in writing queries using Oracle 10g, MySQL and NoSQL database MongoDB, Kubernetes carries out various other technical and nontechnical tasks related to full Stack software development.
- Extensive expertise with Java, J2EE, JSP, JDBC, Servlets, JavaBeans, JBoss, Java Script, Angular, jQuery, CSS, Ajax, JSON, XML, Struts, Spring, Micro Services, Spring boot, Hibernate, Kubernetes and Oracle PL/SQL.
- Experience in design and development of multi-tiered distributed environment using Java & J2EE (Core Java, JSP, Servlets, JDBC, XML/XSLT, JMS) and frameworks like Struts, spring, JSF Prime Visualization, Spring MVC and Hibernate for persistence purpose.
- Developing Micro services with Spring MVC, Spring Cloud, Spark, Spring Boot, Spring AOP, DI and JPA to develop loosely coupled processes.
- Good experience with Angular 6/7 Fusion Charts for interactive dynamic JBoss data visualization for reporting extensively used Jasper Reports
- Working on Microservice using Spring Boot, Kubernetes through the combination of REST and Apache Kafka message brokers at development in enterprise web applications using Core Java, Java 1.6 to 1.8, and J2EE.
- Experience on with the cloud technologies, Kubernetes like using Amazon Web Services (AWS), Microsoft Azure, pivotal cloud Foundry (PCF) in various environments.
- Expertise in different open-source frameworks like Struts 2.0/2.1, spring 4/5, REST API and ORM Technology like Hibernate 3.0, IBatis, Mybatis, jQuery.
- Good hands-on experience with Java 8, Spring Boot newer features like Stream API, Time API, Collection API, lambda expressions to migrate the existing applications.
- Experience in deploying J2EE applications on Apache Tomcat web server, Kubernetes, REST API and WebLogic, JBoss application server in consuming SOAP web service using Apache CXF and Axis frameworks.
- Developing applications using latest technologies like EJB3.0, Hibernate3.2/4.x, Spring2.x/3.x/4.x, and REST based Web services (axis 2.0, JAX-WS 2.0, JAX-RS 2.1, Jersey 2.26+), Rule Engines (Drools 4.1, ILOG), XMLAPI and tools.
- Good Working experience with Spring Application Context Module, Spring MVC Framework module, Spring boot and using Spring modules like Spring Core Container Module.
- Proficient in developing Front-end systems with HTML5/CSS3, DOJO, Java Script, jQuery, Ajax, JSF, ReactJs, Bootstrap.
- Extensive experience in designing and deploying scalable, highly available, and fault-tolerant applications on AWS cloud infrastructure, leveraging services like EC2, S3, RDS, Lambda, and DynamoDB.
- Proficient in implementing AWS IAM policies, roles, and permissions to enhance security and access management within cloud-based applications.
- Expertise in containerization and orchestration using AWS ECS, EKS, and Kubernetes, ensuring efficient deployment and management of microservices.
- Hands-on experience with AWS CI/CD tools such as Code Pipeline, Code Build, and Code Deploy for automating application deployments and improving operational efficiency.

- Strong knowledge of Google Cloud, Lambda, ETL, Fuse application security models, protocols and tools like AWS IAM, AWS KMS policy, Microsoft Azure AD, Google Cloud
- Working on design patterns like DAO, DTO, Abstract Factory SDO, BO, Singleton, Interface, TO. Tag Libraries, Custom Tags and Java Script Frameworks such as Require.js, Backbone.js, AngularJS, NodeJS, ReactJs.
- Expertise with frameworks like AngularJS, JQuery in web presentation layer with servlets, JSP, Spring MVC at the web controller layer.
- Expertise in T SQL DDL/DML, perform most of the SQL Server Enterprise Manager and Management Studio functionality using T-SQL Scripts and Batches. Worked Amazon Web Services, Office 365 and Google Cloud issues
- Experience on MVC frameworks like Angular 9/8/7, J2EE, Spark, REST API for creating Single Page Application (SPA) using concepts like Routing, Dependency Injection, Observables, Services, Ng Zones, Components and Directives.
- Experience in Service Oriented Architecture (SOA), SOAP Web services, Restful API and micro services architecture and in integrating REST, SOAP services using WSO2.
- Extensive experience in developing Restful (JAX---RS) web services, JSON as a data exchange format to integrate custom web applications and various enterprise systems and application modules.
- Experience in Web/Application Servers such as Tomcat 6/7, OAS, Spark and Apache server for deploying and configuring web applications.
- Involving in deploying systems on Amazon Web Services (AWS), Kubernetes Infrastructure services EC2, S3, SQS, SNS, Cloud Formation, dynamo DB, lambda, J2EE, cloud watch etc.
- Hands-on experience of Build & Deployment phases and usage of Continuous Integration (CI/CD) tools and Used Maven and Jenkins as build tools for deploying the application.
- Experience in using text---Editors like Eclipse, Sublime Text and Notepad++, Spark and Robust design and development experience in J2EE including JSP, Servlets, JDBC, J2EE and JMS.

TECHNICAL SKILLS:

Languages	JAVA 11/8/7, Python, PHP, Java Script, and PL/SQL
Web Technologies	HTML, XML, CSS, Java Script, Angular JS, Angular 9/8/7, AJAX, JSP, jQuery, DTD, Java Beans, JMS, Bootstrap
J2EE Technologies	Servlets, JSP, JSF, Servlets, JMS, JNDI, Web Services, JDBC, SOAP, RMI
Methodology	UML, MVC, Agile, Scrum, Waterfall
App/Web servers	Apache Tomcat, Web logic, Apache Server, JBoss, Kafka, Apache Camel
Applications Frameworks	Spring 4/5, Hibernate, Struts, JSP, Spring Boot, Spring MVC, Swagger2, Spring JMS, Spring Integration, AOP
Web Services	SOAP, WSDL, AXIS, JAX---WS, REST, JSON, JAX---RS, REST API, RESTful Services, JWT, OAuth
UML tools/ Build tools	Apache ANT, Maven, Jenkins, Azure, Azure Devops, Docker, Kubernetes, PCF, CI/CD, Google cloud, JUnit, Jira, Dream viewer, Rational Rose, Milligrade, SVN, CVS
Databases	Oracle, MySQL, MongoDB, Postgres, Cassandra, DB2
XML	XML, XSLT, JAXB, SAX, DOM,
AWS	EC2, S3, RDS, IAM, Lambda, API Gateway, CloudFormation, CloudWatch, DynamoDB, SQS, SNS, ECS, EKS.
IDE	Eclipse, My Eclipse, NetBeans, JDeveloper
Operating Systems	Windows, UNIX, LINUX, MacOS.
Build Tools	ANT, Maven, Gradle.
Testing and Logging	Junit, Mockito, Selenium, Jasmine, Karma, Docker, Jenkins, Protractor, Slf4j, Log4j.

Client: Fidelity Investments, Westlake, Texas

May 2023 to till now

Role: Java Full Stack Developer

Responsibilities:

- Sound Knowledge about the entire (SDLC) of the project right from the designing of the project till the implementation phase of the project.
- Expertise in using CSS3, HTML5, React, TypeScript, ES6, JavaScript, JSON and jQuery to create UI web pages.
- Developed user interface by using the React JS, Flux for SPA development, also used React forms for data driven form components and React router to define module level routing.
- Used ReactJS to capture user actions and render the relevant action, as well as dynamically render the UI based on user actions.
- Utilized Web Sockets with React to maintain consistent and real-time state across users.
- Involved to implement various client-side interfaces on the front end using React.js and used various predefined components from NPM and redux library and deployed application to NGINX.
- Experience in Vue.JS for building apps and declarative templates with data binding, created some custom directives in the application.
- Used React http service to make GET/POST/PUT/DELETE to deal with API request and response.
- Experience in using Java 11 features such as Lambdas, Streams, Observables and Completable Futures etc.
- Developed microservices and created REST API's using Java Spring Boot framework, and Spring REST implementation and used Maven as a build tool.
- Worked with Spring annotations mechanism to create RESTful applications.
- Designed and documented REST/HTTP APIs, including JSON data formats and API versioning strategy.
- Implemented REST API web service to fetch data from MongoDB.
- Used Enterprise built security wrapper to secure REST endpoints, using policies to provide secure access.
- Developed microservices using spring framework, benefiting from auto-configuration using spring-boot, securing with spring security.
- Used Spring Core Annotations for Dependency Injection Spring DI and Spring MVC for REST API's and Spring Boot for microservices.
- Used swagger framework for rest API documentation.
- Used Spring JDBC templates for database interactions and used declarative Spring AOP transaction management.
- Implemented microservices architecture using Spring Boot for making the application smaller and independent.
- Implemented Kafka consumer and producer configurations to use for high-volume streaming with pub-sub models using multiple inheritance AVRO schemas with the same topic.
- Deployed end to end event-driven microservices architecture using Apache Kafka and deployed with Kafka Elasticsearch.
- Designing complex application Oracle database statements for querying, updating, and reporting.
- Worked on developing Restful endpoints to Cache application specific data in in-memory data clusters like Redis.
- Used spring data JPA with default implementation of hibernate ORM for database connectivity to abstract the complex configuration involved with connection management.
- Implemented AWS-based serverless solutions using AWS Lambda and API Gateway to optimize costs and reduce operational overhead.
- Developed and managed AWS infrastructure as code using Terraform and AWS CloudFormation, ensuring automated and consistent infrastructure deployments.
- Experienced with event-driven and scheduled AWS Lambda functions to trigger various AWS resources.
- Deployed the Application into Docker container and made easily accessible at runtime using cloud services like AWS, Netflix Eureka, Spring Hystrix as fallback method, Spring Ribbon for load balancing and a broker service to maintain

status using Spring Kafka and Zookeeper

- Created AWS EC2 instances and installed required configurations and applications on it and created S3 buckets for storing object level data into it.
- Used Log4J API for logging and debugging.
- Skills at using testing tools such as Postman, Jest, Enzyme, JUnit, Apache JMeter and debugging tools such as ES Lint, Redux DevTools and Chrome Developer Tools.
- Followed Test Driven Development and written test cases using Junit for every relevant class.
- Worked with several testing frameworks such as Junit and Mockito.

Environment: Java 11, Maven, Hibernate, React JS, HTML, Kafka, RabbitMQ, Apache Tomcat, Json, Java Script, Spring, Spring ribbon, Oracle, MongoDB, JDBC, Eclipse, JUnit/Mockito, JMeter, Selenium, Jenkins, GitHub, Docker, Log4j, AWS EC2.

Client: Albertsons Inc, Dallas, Texas

Sep 2021 to May 2023

Role: Java Full Stack Developer

Responsibilities:

- Involved in various phases of Software Development Life Cycle (SDLC) such as requirements gathering, modeling, analysis, design, development, and testing.
- Developed the view-controller components using JSPs, HTML5, CSS3, AJAX, JavaScript (jQuery).
- Designed and developed the agent portal using framework Angular 9/11 along with HTML5, CSS3, and TypeScript.
- Created TypeScript reusable components and services to consume REST API's using Component based architecture provided by Angular 9/11
- Developed Angular 9/11 service for static selection (reference) data in the Angular 9/11 SPA has run block.
- Working on a custom URL has to land the user in the application.
- Implemented Angular 9/11 Router to enable navigation from one view to the next as agents perform application tasks.
- Implemented routing logic and navigation from screen to screen and implemented login functionality on the client side in AngularJS.
- Hands-on experience in developing integration with Elastic search in any of the programming languages like JAVA and JavaScript. Having knowledge of advance reporting using Elastic search and Node JS.
- Implemented the current SASS/LESS-based user interface, making it mobile-friendly using cross-platform tools such as Ionic, ultimately leading to business improvement.
- Implemented core features of AngularJS framework such as dependency Injection, Databinding, Filters, Directives, Templates, Services and Deep Linking Designing.
- Used Java 8 features like stream and Lambda expressions.
- Maintained Interface compatibility and concurrency in the project using Java 8 new features like default, static methods and Concurrency API.
- Used Java 8 Method References feature to point to methods by their names and used functional Interfaces.
- Used Spring MVC framework for implementing Model-View- Controller (MVC) architecture at the Web tier level to isolate each layer of the application so that complexity of integration will be reduced, and maintenance will be very easy.
- Used Spring AOP for solving crosscutting concerns like keeping logged data and transactions details etc.
- Used Spring Batch for processing large amounts of data like transaction management, job processing, resource management and logging.
- Secured the API's by implementing OAuth2 token-based authentication/authorization scheme using spring security.
- Designed and developed third-party Payment services to Offer Users Convenient Payment Methods based on OAuth Protocol

- Used Hibernate ORM framework as persistence engine and wrote Hibernate Queries to automate the mapping between Oracle database and Objects in Java.
- Involved in writing SQL and Stored Procedures for handling complex queries with help of TOAD and accessing them through Java Programs from Oracle Database.
- Worked with MongoDB to store non-relational data into collection and retrieve them whenever required.
- Used WebLogic server to route our JMS queue messages to different business floors and configured routes in WebLogic and used JMS in e-mail notification.
- Worked on setting up Maven scripts to build, package, and deploy application code to the target WebLogic Application Servers and worked on continuous integration servers like Jenkins.
- Developed the monolithic application and involved in migrating existing monolithic application into Micro Service Architecture based RESTful Service and deployments were done on AWS.
- Designed and developed Micro Services business components using Spring Boot.
- Hands on Coding to build REST Microservices using Spring Cloud, Oracle, XSD, JSON, Spring Config, Cloud Foundry and Jenkins.
- Responsible for creating an instance on Amazon EC2 (AWS) and deployed the application on it.
- Installed, secured, and configured AWS cloud servers and Amazon AWS virtual servers (Linux).
- Worked on AWS services to deploy static websites and dynamic Web Apps on EC2 using Elastic Beanstalk and Elastic Container Service-Docker.
- Involved in creating EC2 instances and installed required configurations and applications on it and created S3 buckets for storing object level data into it.
- Used AWS Cloud Watch to monitor the application and to store the logging information.
- Migrated legacy monolithic applications to AWS by refactoring services into AWS Lambda and API Gateway, reducing operational costs by 30%.
- Developed and maintained infrastructure as code (IaC) using AWS CloudFormation and Terraform, ensuring repeatable and consistent deployments.
- Optimized database performance on AWS RDS and DynamoDB, implementing caching strategies using Amazon Elastic Cache for low-latency data access.
- Used Kafka to handle data pipeline for high-speed filtering and pattern matching on the fly and monitoring data pipeline operations. This involves aggregating statistics from distributed applications to produce centralized feeds of operational data.
- Focused on Test Driven Development there by creating detailed JUnit tests for every single piece of functionality before writing the functionality.
- Performed automation testing and authored test scripts using Selenium Web Driver, Selenium Grid and Junit.
- Worked in Agile TDD environment using SDLC tools like GIT, Jira, Jenkins, Maven for build packaging and deployments of the application components.

Environment: Agile methodology, Java, J2EE, Hibernate, Spring, XML, JSP, JAX-RS, Spring AOP, Spring security, Oracle, MongoDB, JSP, HTML, AJAX, JavaScript, jQuery, AngularJS, Docker, Kafka, GIT, JIRA, PL/SQL, STS, JUnit, Log4J, Maven, Jenkins, WebLogic Application Server, AWS IAM, EC2, S3, RDS, SQS

Client: Citi, USA

Dec 2020 to Sep 2021

Role: Java Full Stack Developer

Responsibilities:

- Involved in End-to-End Design, Development and Testing of Streamlets module. Actively involved in Analysis, Design, Development, System Testing and User Acceptance Testing. Followed Agile and SCRUM methodologies.
- Designed and implemented the Single Page User Interface for client service module using Angular, HTML5, CSS3.
- Optimized the performance of applications using Angular Lazy Loading and ahead of time compilation. Extensively used Angular for data binding and developed controllers, directives, and filters and integrated with the backend-services.

- Created Services to consume REST API's and to communicate between components using Dependency Injection provided by Angular.
- Used Java 8 Stream API and Method References features to point to methods by their names and used functional Interfaces.
- Developed microservices with Spring and tested the application using Spring Boot.
- Used Spring Core annotations for Spring Dependency Injection, Spring MVC for Rest API's and Spring Boot for microservices
- Involved in development of Restful web services using MERN stack, MongoDB, Express ssss-Redux and Node JS.
- Developed and implemented dynamic filtering for restful web services using Spring boot.
- Implemented the Project structure based on Spring MVC pattern using Spring Boot.
- Used Jackson API to convert Java objects to /from JSON.
- Developed a server-side application to interact with databases using Spring Boot and Hibernate.
- Eclipse RCP is used as a Java IDE tool for creating POJO, Servlets and Data Access Objects.
- Implementing or exposing the Microservices architecture with Spring Boot based Microservices interacting through a combination of RESTful and Apache Kafka message brokers.
- Implemented pre-authentication and database security using Spring Security and securing application access and Spring Batch for scheduling and maintenance of batch jobs.
- Implemented Spring ORM with Hibernate taking advantage of features like Annotation metadata, Auto wiring, and Collections to implement DAO layer with Hibernate Session Factory, HQL, and SQL.
- Wrote Hibernate configuration file, hibernate mapping files and define persistence classes to persist the data into Oracle Database.
- Setting up AWS Oracle RDS databases for a new project, use a data pump to migrate data to Relational Database Services (RDS).
- Automated deployment pipelines using AWS Code Pipeline and Code Deploy, reducing release time from days to hours.
- Optimized API performance by integrating AWS API Gateway with AWS Lambda, improving response times and reducing infrastructure costs.
- Experienced with RDBMS implementation and development using Oracle, My SQL, MSSQL and DB2
- Experience with DevOps methodologies, implementing CI/CD Pipelines using tool sets like GIT, Jenkins, and Chef.
- Setup the continuous Integration (CI) process and continuous deployment (CD) jobs in Jenkins's brew master instance, which reduces the time for the deployment of micro services.
- Expert at handling Unit Testing using JUnit, Jasmine, Mockito, and Karma.
- Used GIT for version control and JIRA for bug tracking, project
- management and Maven as build tools.
- Used Spring Framework with Hibernate to map to Oracle and mapping using Hibernate Annotations

Environment: Java 8, Maven, Hibernate, Angular JS HTML5, CSS3, Kafka, RabbitMQ, Apache Tomcat, Json, Java script, Spring, Oracle, SQL, Spring JDBC, Eclipse, JUnit/Mockito, Karma, AWS, JMeter, Selenium, Jenkins, Chef, GitHub, Docker

Client: State of Ohio, USA

Oct 2018 to Dec 2020

Role: Java Full Stack Developer

Responsibilities:

- Involved in various phases of Software Development Life Cycle (SDLC) of the application like Requirement gathering, Design, Analysis and Code development.
- Involved in production support activities and performance tuning and process improvements.
- Worked on front end, business, and persistence tier using the JSP, Java Script, and hibernate frameworks.
- Involved in performance tuning of application, monitoring the end of day load and application behavior using Profiler.
- Developed Micro services & APIs using Spring Cloud, Spring Security, Spring Boot, Spring Integration.
- Developed UI and interaction with Spring Boot REST Service.
- Developed Components, models and services using spring boot.

- Developed business validation classes using Spring Boot.
- Setting up the Configuration to connect to the services and change the default configuration using Spring Boot.
- Integrated the components using Camel.
- Developed the code components to make Web Services calls to retrieve data from the backend components.
- Involved in Setting up the build, configuration and auto-deploy using Maven Build Tool.
- Involved in requirements gathering and related documentation.
- Developed Test cases using Behavioral Driven Development (BDD) methodology.
- Involved in defect fixing and worked on change requests.
- Involved in making web services calls to get data from the server.
- Involved developing role base code using LDAP
- Involved in Database design, writing SQL Queries, stored procedures in Oracle
- GGTS used as Java IDE tool for creating XML and Groovy (GSP)
- Deployed WAR, EAR and JAR files in JBOSS application server.
- Implemented various screens for the front end using React JS and used various predefined components from NPM (Node Package Manager) and redux library.
- Utilized Azure Virtual Machines for managing virtual servers, ensuring flexibility and on-demand computing.
- Configured Azure Virtual Networks to establish secure and isolated network environments.
- Prioritized scalability and fault tolerance in the architecture.

Environment: Java, Java Script, Spring boot, Spring Security, Spring Cloud, React JS, Rest API, Azure, Oracle, MongoDB, Jenkins, Maven, Git, Agile, JIRA.

Client: Omega HealthCare, Hyderabad, India

July 2017 to Sep 2018

Role: Java Developer

Responsibilities:

- Implemented Different Design patterns like singleton, factory and J2EE design patterns like Business delegate, session facade, Value object and DAO design patterns.
- Used Spring Framework's IOC Dependency Injection to inject Service Object using Service Locator Design Pattern into Action Classes.
- Developed classes using core java (multithreading, concurrency, collections, memory management) and some spring IOC
- Extensively worked on writing JUnit test cases for testing the business components developed in Spring and Java
- Used jQuery for front-end UI validations and creating dynamic HTML content
- Used Struts tag libraries in the JSP pages.
- Developed a controller Servlet that dispatches requests to appropriate Action Classes.
- Developed the application under J2EE Architecture using spring, Struts, Hibernate, Servlets, Web logic and JSP.
- Used Jenkins as a build tool for CI/CD (Continuous Integration and continuous deployment) process.
- Good Knowledge in coded Java applications on both client-side and server-side using JDBC and advanced Multithreading.
- Front end development utilizing HTML5, CSS3, and JavaScript leveraging the Bootstrap framework and a Java backend
- Experience with Java 8.0 features such as lambda expressions, Parallel operations on collections and for effective sorting mechanisms and new Date Time API.
- Used Java Persistence API (JPA) and hibernate for performing the Database Transactions.
- Used join point and advice Spring AOP modules for cross cutting concerns and IOC for dependency injection.
- Designed extensive additions to existing Java Web Application utilizing Service Oriented Architecture (SOA) techniques.

Environment: JDK1.8, JSP, Servlet, EJB, spring, JavaScript, Hibernate, Multithreading, Query, Struts, Design Patterns, HTML5, CSS3, JMS, XML, Eclipse, Apache, Oracle ECM, Java 6.0, Struts.

Client: Symmetric Solutions, Bangalore, India.

Jan 2016 to June 2017

Role: Java Developer

Responsibilities:

- Involved in complete Life Cycle of the project starting from design to Testing the application
- Practiced Agile Methodology to keep track of the workflow tasks for every Sprint
- Developed application modules using Spring MVC, Spring Annotations, Spring Beans, Dependency Injection and Spring AOP, with database interface using Hibernate
- Implemented the application using Spring Boot Framework and handled the security using spring security
- Designed and developed web tier components and restful APIs using Spring MVC 3.0
- Implemented Spring Bean Factory to create proxy object using AOP Framework
- Used Hibernate as an ORM mapping tool and worked with Hibernate Query Language (HQL)
- Defined the Hibernate Configuration File, Hibernate Mapping using annotation and created classes to persist the data
- Produced and consumed the web services data in the form of JSON, XML
- Have designed and built the new breed of Microservices for the client using Spring boot
- Developed the interactive web pages using HTML, CSS, JSP, JavaScript, jQuery, and Ajax.
- Used Maven configuration for the project management
- Used GIT for source control and Jenkins for continuous integrations
- Worked on JIRA as user requirements and bug tracking tools
- Developed functions and stored procedures using SQL
- Wrote database queries using SQL and PL/SQL for accessing, manipulating, and updating Oracle database

Environment: Java/J2EE, Linux, HTML, Spring Integration, Hibernate 3.0, SOAP, RESTful, CSS3, JavaScript, Eclipse 4.4, jQuery, POJO, XML, AJAX, JBOSS EAP 6.1, JUnit 4, Log4j, GIT, JIRA, and SQL

EDUCATION: Bachelor's in information technology from JNTU, Hyderabad, India.
