

Aditi Jain

Professional Summary

- 10+ years of working experience in all phases of software application design, development & quality automation
- Hands-on experience in development of automation and tooling based on Java, Python, Groovy, Python, Ruby with integration of REST API Webservices.
- Extensively used automated test tools like XCTest, Espresso, Appium, Selenium for UI automation.
- Created and maintained REST integration with external tooling like TestRail, JIRA & Charles.
- Good experience on Continuous Integration Tools like Jenkins, Gitlab (CI/CD).
- Automated Test cases in TDD (Test Driven Development) and BDD (Behavior Driven Development).
- Experience on enabling Devops workflows using Github and Jenkins.
- Hands on experience in writing queries to perform backend Data validation for Cassandra, SQL Server, Oracle, MongoDB.
- Built and managed mobile device and browser lab to support continuous quality test
- using Perfecto, SeeTest and BrowserStack.
- Leadership experience with design and implementation of test infrastructure, test automation strategy and setting up testing guidelines.
- Experience in performing load and performance testing using JMeter.
- Experienced in working in micro-services oriented ecosystem and GCP cloud platforms using Rancher for multi- cloud and multi-clusters management.
- Quality oriented mind set up with Test to Break Attitude and Tactful & Diplomatic Behavior.

Personal Info

Phone: 425-473-0839

Email: maple.aditi@gmail.com

Address: Washington, USA

Skills

Languages

Java, Python, Groovy, Swift

AI Tools

Cursor AI, TestRigor, Copilot, Gemini, ChatGPT

Testing Tools & Frameworks

XCUITest, Espresso, Appium, Selenium, Jmeter, SoapUI Pro, RestAssured, Postman, Junit, Cucumber BDD, Gherkin, TestNG, TDD

API

RESTful, GraphQL, Soap

Database

Cassandra, Oracle, MongoDB, SQL Server

Build & Deployment

Maven, Jenkins, Ant

Version control

Github, Gitlab, SVN

Bug Tracking Tool

JIRA, TestRail, Practitest, AgileTest, Kualitee

Development IDE

Eclipse, IntelliJ Idea, Xcode, Android Studio, VS Code, Pycharm

Operating System

MacOS, Windows

Getting there

GCP, Azure, Docker, Kubernetes

Employment History

Sr. SDET

Tinder

Aug/2024 - Current

- Used CursorAI for UI automation using WebDriver IO.
- Maintained legacy UI automation scripts written in XCUITest with mocked API response.
- Implemented CI/CD pipeline in Jenkins to expedite the deployment process.
- Used BuildKite and Marathon for build and UI test execution purpose
- Executed UI automation on BrowserStack real devices for IOS and Android.
- Actively and solely involved in analyzing and create POC for TestRigor for UI Automation.
- Accessibility testing for IOS and Android apps using voice over and talk back.

Software Engineer in Test

Telus Communications

Mar/2023 - Aug 2024

- Designed and developed UI automation scripts using Java, Selenium Framework.
- Migrated Selenium based script to BDD framework as proposed by Core Automation team.
- Implemented CI/CD pipeline in Jenkins to expedite the deployment process.
- Executed out of network scripts on GCP cloud.
- Using Java, Maven, Github, and TestNG to setup automation framework.
- Tested Identity, PermiT, LDAPSS and other applications in Telus.

SDET

HSBC

Mar/2022 - Feb/2023

- Designed and developed UI automation scripts using Java, Appium Framework for IOS and Android app.
- Localization testing for 18 different locales for IOS and android application.
- Executed scripts in BrowserStack device cloud for IOS and Android.
- Using Java, Maven, Github, and TestNG to setup automation framework.

Quality Engineer

Rogers Telecom

Mar/2021 - Feb/2022

- Automated REST web services using Rest Assured Java based framework.
- Used Java, Maven, Github, Selenium WebDriver and TestNG to setup automation framework.
- Involved integration end to end architecture using Jenkins, Automated tests, Git, TestRail, code coverage
- Used Saucelabs for remote device cloud for UI automation written in Selenium, Java, Maven

Quality Engineer

eBay Inc.

Portland, OR Nov/2012 - Feb/2021

- Wrote automated UI Test using native platform tools XCUITest for iOS and Espresso for Android
- Developed iOS App tooling in Swift and Espresso tooling in Java to accelerate quality automation
- Built and supported CI/CD Jenkins Pipeline with Jenkins Groovy, Python and Github.
- Managed mobile device cloud lab in Perfecto for remote test execution.
- Wrote Groovy scripts for Jenkins pipeline.

Education

- Master of Business Administration (MBA) with specialization in IT from IMS DAVV, Indore, India (2003-2005)

Achievement

- eBay Spot Award
- Cognizant Gold shield and Silver award
