

Akhila

Phone No: +1 313-486-0165

Email ID: rajakhila994@gmail.com

PROFESSIONAL SUMMARY:

- **8 Years** of experience in the Information Technology industry with a focus on Software Quality Assurance (QA/Software Testing) activities focused on **salesforce application**
- Excellent understanding of **Software Test Life Cycle (STLC)** and **Test Methodologies**. Good understanding of **AGILE, Waterfall** software development methodologies.
- Experience in **Automation Testing** and **Exploratory Testing** (Black Box/White Box Testing) on **Web-based** applications.
- Experience in developing end to end automation using **Selenium WebDriver/IDE/Grid, TestNG, ANT, Maven, Jenkins, Cucumber, Web Services (REST, SOAP)**.
- Expert in developing **Java Selenium/WebDriver** test scripts and **Test Frameworks** using **TestNG** to perform **Functional** and **Unit Testing**.
- Good knowledge of **Data Loader** to insert, update, and bulk import or export of data from Salesforce.com Objects. Used it to read, extract, and load data from comma separated values (CSV) files.
- Developed detailed test cases for **REST API web service** validation using Postman as part of a full-stack testing strategy.
- Utilized **Azure DevOps** extensively for user stories and test case management ensuring high standards of quality assurance.
- In-depth experience with testing **Service Cloud, web services, REST API, SOAP API, and Bulk API**
- Adept in writing and executing comprehensive test plans/test suites and possessing hands-on experience with Financial Service Cloud and sales cloud, including web services **REST and SOAP APIs**, using tools like **SoapUI and Postman**.
- Equipped with a strong knowledge of **Salesforce objects** and testing/QA best practices.
- Excellent working experience of **Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC)** and testing methodologies like **Waterfall & Agile/Scrum**.
- Developed an automated scripts and frame works using **Python, Java, C#, VB Script**.
- Experience in **Java, Selenium web driver, TestNG automation testing**.
- Implemented automated test suites using Selenium WebDriver and TestNG specifically for **Salesforce applications**.
- Knowledge of Web Development technologies in general, including **HTML, JSON, CSS, JavaScript, AJAX & XML**.
- Extensive Experience in developing Automation Framework using **Cucumber BDD, JUnit, TestNG, Java and Selenium WebDriver**.
- Expertise in working with the tools such as **Postman, Swagger, REST Assured, Provar**.
- Good experience in Web Services testing using **SOAPUI, XML, and WSDL**. Providing required input data to request **XML** and get the required data from response XML and use the response data from other request XML using **SOAPUI**.
- Strong experience with **SOA** architecture which includes **Soap Web Service** and **RESTful Web Service** Testing.
- Experience in Using **Micro Focus Quality Center, JIRA** extensively for Establishing **Traceability to Requirements, Test Cases, Bug tracking and Reporting**.
- Proficient on testing **web services (SOAP, REST)** using **SoapUI and POSTMAN**.
- Good analytical and communication skills and ability to work independently with minimal supervision and perform as part of a team.

Certification:

- **Salesforce Certified Administrator.**
- **Salesforce Certified AI Associate.**

TECHNICAL SKILLS:

Testing tools	Selenium WebDriver/RC/IDE/GRID, QTP, Micro Focus (HP) QC, ALM, Junit, JMeter, Jenkins, JIRA, Cucumber, SoapUI, Rest API, Appium, Postman, Test Complete, Fiddler, Spark Inspector, Spring JDBC, Splunk, WMS
Mobile Testing Tools	APPIUM, Perfecto Mobile
Methodologies	Agile-Scrum, Waterfall, TDD
Languages	HTML5, XML, CSS3, PL/SQL, C, C++, Java, JavaScript
Build & C I Tools	Ant, Maven, Jenkins, Hudson
Version Control Tool	GIT, Subversion (SVN)
Database Tools	SQL Server, MS Access, Oracle, MySQL
Operating Systems	Windows Variants, Mac, Unix, Linux

PROFESSIONAL EXPERIENCE:**Client: UPMC., Pittsburgh, PA****June 2022 – PRESENT****Role: Salesforce Tester****Manual/Automation****Responsibilities:**

- Responsible for writing and maintaining Selenium WebDriver scripts for regression and functional testing using data driven framework.
- Worked with business analysts and developers to develop comprehensive test cases and scenarios for Salesforce service Cloud, Sales cloud covering Classic and Lightning environments.
- Provided ongoing Salesforce.com maintenance and administration services including periodic data cleansing, custom objects, workflow
- Directed end-to-end testing operations for Salesforce Classic and Lightning Platforms, incorporating Selenium for automated regression testing and developing comprehensive test scripts in Java.
- Worked on writing apex Test classes which covers various scenarios, including positive and negative test cases as per the requirements given by Stakeholders.
- Authored test plans/test suites in Azure DevOps tailored to easy maintenance.
- Worked on Testing with various Salesforce.com standard objects like Reports and Dashboards, Leads, Accounts, Contacts, and Opportunities along with Campaigns.
- Creating and testing Salesforce CRM Workflows, Visualforce Pages, Approval Processes, Validation Rules and Sharing & Security rules, validation of screens related to some enhancements of claims, enrollments and healthcare insurance applications.
- Worked on integrating Litmus with Marketing Cloud for detailed rendering testing across hundreds of email clients and devices.
- Conducted Salesforce testing covering Sales Cloud, Service Cloud, Call Center, SOQL, Marketing cloud, Chatter & App-exchange applications and optimized email campaigns, especially for testing, designing, and tracking email performance across different devices and email clients using Litmus
- Developed automated test cases to validate RESTful API web service. Validation was performed using Postman for APIs. Participated in internal and cross functional code and design reviews.
- Setup the Automation framework using Selenium to run test cases in multiple browsers and platforms
- Used Azure DevOps for referring to requirements/user stories and writing test cases.
- Performed functional tests using Selenium WebDriver with data driven framework and documented results in a database.

- Worked on automating regression testing to make sure the existing flows continue to function correctly after changes are made to the Salesforce org.
- Developed and executed SQL queries to verify the proper insertion, deletion and updates into the Oracle supporting tables and cubes.
- Integrated Salesforce Marketing Cloud with Salesforce Health Cloud to synchronize patient data and create real-time engagement opportunities.
- Worked on integrated testing verifies the interaction between flows and these components
- evaluated the user interface (UI) and user experience (UX) of Salesforce apps to ensure they are intuitive, user-friendly, and meet the needs of end-users.
- Worked on Testing frameworks and tools to verify the functionality, performance, and stability of Apex code and Salesforce applications.

Environment: Java, JavaScript, Selenium WebDriver, Micro Focus (HP) Quality Center, TestNG, Jenkins, Cucumber, SoapUI, Postman, ANT, Maven, SOQL, XPath, Firebug, Eclipse, HTML5, GitHub, SQL, Oracle, Azure, apex data loader, Salesforce Classic, Salesforce Lightning, Apex, AppExchange packages, Marketing Cloud.

Client: Virtusa - Citi Bank

Jun 2019 – Nov 2021

Role: QA Test Engineer

Manual/Automation

Responsibilities:

- Effectively implemented different QA methodologies/policies, strategies and plans in all stages of SDLC.
- Good knowledge of Salesforce configuration, Data migration, System integration Testing and familiarity with Visualforce (Pages, Components, Controllers) MVC architecture.
- Integrated Automation scripts (Selenium WebDriver API) in Continuous Integration tools (Jenkins) for nightly batch run of the Script.
- Have knowledge in implementing various advanced fields like Pick lists, Custom Formula Fields, Many to Many Relationships, Lookups, Master-Details, Field Dependencies, and Approval Processes for automated alerts, validation of screens & Email generation per application requirements.
- Performed white box testing using TestNG for class, method, & web services testing.
- Performed Security and sharing rules implementation Testing at object, field, and record level for different users at different levels of organization.
- Have extensive experience in implementation of Workflow Rules, Role based Page Layouts, Record Types, Approvals and Assignment Rules.
- Worked on testing Consumed Knowledge Base Dashboards & Reports AppExchange for providing Reports and Dashboards that monitors the Knowledge Base.
- Used tools like REST Assured for designing and executing API tests.
- Led data migration initiatives from SAP ERP to Salesforce for critical business data such as Accounts, Contacts, Leads, Opportunities, and Custom Objects.
- Ensured data integrity by writing automation scripts to validate migrated data against source systems.
- utilized Postman to send requests to backend APIs, validate responses, and ensure data integrity and consistency.
- Integrated API testing into the continuous integration process for early detection of issues.
- Validated the exported data to ensure its complete, consistent, and free of duplicates or errors.
- Defect logging and tracking using JIRA and updated the test defects status with results.
- Performed Regression testing of applications after defects are fixed and any new functionality is implemented into the QA. Supported the Business team for executing UAT test cases.
- Involved in estimation and preparation of test case scenarios and test plan documentation for validating and reporting

Environment: Java, JavaScript, TestNG, SoapUI, Provar, Postman, Web Services, JIRA, Jenkins, HTML5, Maven, SQL, GitHub, BDD, SQL, Oracle, Windows, Flows, App exchange, Salesforce Lightning.

Client: Wipro

June 2017 – May 2019

Role: QA Automation Engineer

Responsibilities:

- Designed, developed and implemented based Keyword Driven automation testing framework utilizing Python, TestNG and Selenium WebDriver.
- Worked on creating test case for Object -driven framework for Selenium WebDriver.
- Developed automation scripts using Selenium WebDriver, Eclipse, TestNG and Python.
- Performed Data driven testing using Selenium WebDriver and TestNG functions which reads data from property and XML files.
- Used Maven for building the WebDriver project. Integrated with Continuous Integration tools Jenkins for running test on nightly basis automatically.
- Developed automation test scripts using Python /Selenium to test Web based user interfaces for different types of browsers. Validated the data from Front End to Back End tables in SQL Server Database
- Tested compatibility of application for dynamic and static content under various cross browsers using HTML IDs and XPath in Selenium.
- Regression runs using Cucumber. Perform failure analysis of the test runs and fixing failed scripts.
- Prepared Requirement Traceability matrix (RTM) to find out if the current project requirements are met and ensured its timely update.
- Developed test scripts for web services using SOAPUI and worked with XPATH.
- Involved in designing and implementing hybrid automation framework to be used with Selenium WebDriver.
- Wrote Maven build scripts to automate the compilation and execution of TestNG test Involved in Functional, Regression, Performance and User Acceptance Testing.
- Supported and maintained existing production Web Services, providing support for performance.
- Performed Ad-Hoc Testing, Integration Testing, End-to End Testing, System Testing, and Functional Testing (Positive, Negative and Boundary).
- Executed Test Cases and compared the actual/expected results, pass/fail reports with updating Quality Center.

Client: Global Logic

June 2016 – May 2017

Analyst

Responsibilities:

- Gained experience in Software Testing in analysis and design and End to End Core Functional Manual Testing of Client/Server and Web-based applications.
- Well, acquainted with Software Development Life Cycle, Testing Life Cycle Concepts and Testing Methodologies.
- Experienced in all types of Test Documentation: Test Strategy, Test Plans, Test Scenarios, Test Cases and Project learning documents etc. for different stages of testing.
- Experience in regression testing and Functional testing. Written and executed SQL queries manually for Back-End validations.
- Knowledge of software development life cycle and processes for quality assurance guidelines
- Ensure the successful delivery of a solution according to business requirements on time and the appropriate quality bar.
- Good understanding on Configuration Management and Defect Prevention.
- Experience in participating in status updates meetings with Client on weekly and need basis.
- Experience in problem solving, tracking, and reporting bugs using Bug Tracking Tools.
- Have experience with Bug Tracking tools like Quality center (Test Director).
