

## Andargachew Gebeyehu

Software Engineer | Java Full Stack Developer

Antioch, TN | [andargachew2025@outlook.com](mailto:andargachew2025@outlook.com) | [LinkedIn](#) | [GitHub](#)

### PROFESSIONAL SUMMARY

Results-driven **Software Engineer** with a **B.S. in Computer Science** and 5+ years of experience designing, developing, and deploying scalable **Java-based** applications. Proficient in **Core Java, OOP, Spring Boot, Angular, AWS, RESTful APIs, and Microservices**, with strong expertise in both **frontend** and **backend** development. Skilled in database design, cloud deployment, and Agile/Scrum practices. Adept at solving complex problems, optimizing performance, and delivering high-quality code in **enterprise and startup** environments.

### TECHNICAL SKILLS

|                                  |                                                                                                                                                                                                                       |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Programming &amp; OOP</b>     | : Java SE 8, J2EE, Object-Oriented Programming (Inheritance, Polymorphism, Abstraction, Encapsulation), Generics, Streams, Lambda Expressions, Multithreading, Memory Management                                      |
| <b>Backend Development</b>       | : Spring Boot, Spring Core, Spring MVC, Spring Data JPA, Hibernate ORM, Spring Security with JWT, RESTful API Development, Microservices Architecture (Eureka, Feign Client, Config Server), Kafka, RabbitMQ, GraphQL |
| <b>Frontend Development</b>      | : HTML5, CSS3, JavaScript (ES6+), TypeScript, Angular 10+, Responsive Design (Bootstrap), Client-side Routing                                                                                                         |
| <b>Databases</b>                 | : PostgreSQL, MySQL, MongoDB (NoSQL basics), SQL Optimization, Database Normalization, Stored Procedures                                                                                                              |
| <b>DevOps &amp; Cloud</b>        | : Git (GitHub/GitLab), Jenkins, GitHub Actions, Docker, Kubernetes, AWS (EC2, S3, RDS, Beanstalk)                                                                                                                     |
| <b>Testing &amp; Quality</b>     | : JUnit 5, Mockito, Postman, REST Assured, Selenium (basic UI automation)                                                                                                                                             |
| <b>Tools &amp; Methodologies</b> | : Maven, Gradle, SLF4J, Logback, IntelliJ IDEA, Eclipse, Jira, SonarQube, Agile/Scrum                                                                                                                                 |

### PROFESSIONAL EXPERIENCE

Nexient (acquired by NTT Data)

06/2021 – 02/2025

Java Developer

#### Quality Control Project - Uline

- Led modernization of the **Quality Control application**, redesigning both **frontend UI**
- Built a **responsive, component-based UI** using **Angular 10, HTML5, CSS3, and TypeScript**.
- Developed ticket functionality for issue tracking, accessible to all user roles.

#### Item Master Audit Project - Uline

- Designed and implemented an **audit history feature** that tracked all update, delete, and save operations on data records.
- Developed backend logic with **Java 8, Spring Boot, Kafka, and Kafka Streams** for data comparison and change tracking.
- Stored audit logs in PostgreSQL for compliance and reporting purposes.

#### Billing System - Bill.com

- Modernized the company's billing system by **developing REST endpoints** using **Java 8, Spring Boot, and Hibernate ORM**.
- Improved system performance by optimizing **database queries** and implementing **memory management best practices**.
- Integrated backend APIs with the frontend to provide seamless data access for user-facing modules.
- Participated in **code reviews, unit testing (JUnit, Mockito)**, and bug fixes to ensure high code quality.
- Collaborated with cross-functional teams in an **Agile** environment to deliver features on schedule.

## Web Application Software - Nexient Internal Project

- Designed, developed, and maintained **enterprise-grade web applications** using **Java 8, Spring Boot, Spring Web, and Spring Data REST**.
- Implemented **RESTful APIs** and integrated **GraphQL** queries to improve data retrieval efficiency.
- Developed backend services using **PostgreSQL** and optimized queries for faster performance.
- Utilized **Kafka** and Kafka Streams for real-time data processing, enabling scalable event-driven architecture.
- Applied **Spring Security with JWT** to implement authentication and authorization mechanisms.
- Automating build, test, and deployment processes.
- Deployed containerized applications using **Docker** and **AWS (EC2, S3, and RDS)** for scalable cloud infrastructure.
- Monitored and analyzed system performance using **ElasticSearch/Kibana**.
- Collaborated in **Agile Scrum** teams, using Jira for sprint planning, task tracking, and bug resolution.

## EDUCATION

**Bachelor of Science in Computer Science**  
Tennessee State University, Nashville, TN

**12/2019**

**Associate of Science in Computer Science - Africa**

**07/2009**

## CERTIFICATIONS

- **Java SE 8 Oracle Certified Java Associate**
- **Cisco Certified Network Associate (CCNA)**
- **Agile and Scrum Master**
- **Full Stack Java Development** — Cogent University **(2020–2021)**
