Software QA Engineer | ISTQB Certified

US Citizen

Professional Summary

Over 8+ years of professional **manual** and **automation** Quality Assurance experience in **Web and Mobile (iOS/Android)** applications:

- **Master** in establishing, implementing, and enhancing comprehensive **QA processes from the ground up**, ensuring robust product quality and reliability standards, including collaboration with the **Dev** and **Customer Support teams**
- Expert in designing QA documentation: **Test Plans, Test Strategies, Test Scenarios, Test Cases, Traceability matrix, User Stories**
- Proficient in performing various types of testing: **Functional, Regression, Integration, Smoke, API, UI, Performance, Compatibility, E2E, User Acceptance (UAT), Accessibility**
- **Strong advocate of practicing shift-left methodology** to contribute to the early stage of the software development life cycle
- Experienced with creating **SQL queries, running Unix/Linux commands**
- Excellent knowledge of **SDLC, STLC, and Defect Triage process**
- **AI Enthusiast:** Passionate about **AI technologies and AI testing**

Technical Skills

- **Programming languages:** Python, JavaScript
- **Web:** HTML, CSS, XML, HTTP
- **Automation tools:** Selenium WebDriver, Pytest, Jenkins CI/CD
- **Bug tracking:** JIRA, Trello, Bugzilla
- **TMS:** TestRail, Airtable, Zephyr, Confluence, Figma
- **API:** Postman, Swagger, REST API
- **Debugging tools:** Chrome Devtools, JMeter, Charles Proxy
- **Database:** Oracle SQL, MySQL
- **Platforms:** Windows, Linux/Unix, macOS, iOS, Android
- **Mobile testing:** Android Studio, ADB, Xcode
- **Version control:** Git, Github, Bitbucket
- **Methodologies:** Agile, Scrum, Kanban
- **Collaboration tools:** Google Workspace, MS Office

Soft Skills

- Problem-Solving & Analytical Thinking
- Defect Tracking & Root Cause Analysis
- Strong Communication & Collaboration
- Attention to Detail & Quality Assurance
- Process Optimization & Continuous Improvement
- Ability to adapt quickly to new environments and technologies
- Effective time management and organizational skills

Education & Certificates

Bachelor of Science in Health Information Technology
SBCC, California, USA | 2023 - Present

Master of Laws in Science, and Technology Regulations
National University of Kyiv-Mohyla Academy, Ukraine

Certified Software Tester (CST)
Agile Scrum Master (CSM)

Work Experience

Quality Assurance Engineer | Full-time | Hybrid
KiwiCo, Inc, Mountain View, USA

May, 2019 - Present

Project: Subscription-based educational platform for kids of all ages

- Take **full ownership** of manual and automation testing of **Web-based and Mobile (iOS and Android)** applications
- Develop detailed, well-structured **Test Plans, Test Strategies, Test Cases, Test Scenarios** using **TestRail, Confluence**
- Perform various types of testing for **Frontend and Backend: functional, sanity, smoke, UI, E2E, and API testing** utilizing **Postman/Swagger**
- Perform **regression testing** before deployments, **reducing post-release bug reports by 50%**
- Run and maintain automation test scripts for regression and smoke suites using **Python, Selenium, Pytest, Allure Report, and Jenkins as CI/CD tool**
- Create detailed bug reports and feature requests in **JIRA**, facilitating efficient communication between Dev and Customer support teams
- **Work closely with engineering, design, and product teams** to identify and resolve any gaps between requirements, specifications, and existing implementation
- **Collaborate with the Customer support team** to review and triage customer-submitted issues, identifying and implementing effective workarounds
- **Implemented a shift-left methodology**, enabling QA Engineers to actively contribute at the earliest stages of SDLC for enhanced quality and efficiency
- Provide **mentorship** to newcomers to help them onboard smoothly
- Lead **GenAI project:** Develop and execute comprehensive QA strategies for GenAI chatbot including frontend and backend processes.

QA Analyst | Full-time | Hybrid
KiwiCo, Inc, Mountain View, USA

Jan, 2014 - May, 2019

Project: Subscription-based educational platform for kids of all ages

- Conducted hands-on product testing, identified key issues before the release
- Led functional and non-functional security and **performance testing** using **JMeter** to improve system reliability
- Ran **accessibility (a11y) testing: Keyboard navigation, VoiceOver/Talkback, NVDA, High Contrast Mode, Reflow according to WCAG, 508 compliance**
- Executed complex **SQL queries** for comprehensive data validation.

QA Control Specialist | Full-time | On-site
Ukrainian Mobile Communications, Kyiv, Ukraine

Jan 2003 - Oct 2013

Project: Mobile Network operator, 4G/5G/LTE

- **Resolved 90% of technical issues** on first contact, supporting an average of 50 customers daily.
- Collaborated with IT teams to troubleshoot and **resolve 100+ escalated cases per month**
- Created and maintained a knowledge base, **reducing troubleshooting time by 10%.**
