
Summary

Business Intelligence Analyst with over five years of experience utilizing **Power BI and SQL** to drive actionable insights; recognized with certifications in **PL-300 and DP-203**. Achievements include developing KPI-driven dashboards for Autodesk that reduced reporting prep time by 30% and automating ETL workflows that decreased manual preparation time by 35%. Proven ability to enhance data integrity through advanced modeling techniques while collaborating effectively with stakeholders across multiple projects.

Certifications

- PL-300: Microsoft Power BI Data Analyst
- DP-203: Data Engineering on Microsoft Azure

Work Experience

Senior BI Analyst (AutoDesk, Dallas, TX)

January 2025 – Present

- Developed and launched 4 KPI-driven **Power BI** dashboards, reducing weekly reporting prep by 30% while integrating **SQL**-driven business logic for policy compliance and governance tracking
- Built **Snowflake**-based data models, improving query performance by 25% by consolidating **CRM, ERP**, and marketing analytics into scalable dimensional structures, ensuring consistent data integrity across the organization.
- Overhauled **Power Query** transformations, cutting data processing time by 40% through comprehensive M code audits, standardized data cleansing rules, and improved transformations for faster analytics delivery.
- Orchestrated the transition from manual data entry to fully refreshed pipelines using cloud **ETL** tools, boosting **BI** team efficiency by 20% and slashing update errors by 99%.
- Configured Power BI Role-Level Security (**RLS**) and **Power Apps** (Forms) to manage access to sensitive HR and financial data, ensuring compliance with governance policies

Senior Power BI Developer (Theatro, Richardson, TX)

July 2024 - Present

- Crafted and authored interactive **Power BI dashboards**, enhancing data visualization of **KPIs** to align with business objectives; improved stakeholder engagement by 30% through more impactful reporting methods.
 - Built advanced data models using **DAX** and integrated diverse data sources like Azure **Synapse** Analytics, SQL Server, and Azure Data Lake, improving reporting accuracy by 40% and ensuring seamless data flow.
- Leveraged **Alteryx** for data blending and transformation, integrating Azure **Synapse**, SQL Server, and **Data Lake** sources into optimized Power BI data models, boosting data reliability by 40%
- Conceptualized Azure **Databricks** and **PySpark** for big data processing, reducing retrieval time by 50%, and automated workflows with **Power Automate**, saving 10+ hours per week while enhancing operational efficiency.
- Optimized Power BI report performance and scalability, reducing dashboard load times by 20%, enhancing user experience, and increasing adoption across business teams.
 - Collaborated with stakeholders to gather requirements, translating into actionable Power BI reports, and provided ongoing support with monitoring systems that reduced downtime by 35%.
- Designed Power BI compliance dashboards monitoring policy adherence, reducing risk exposure by 15%.

Senior Business Intelligence Developer (Teladoc Health, Lewisville, TX)

August 2023 - July 2024

- Analyzed SQL scripts from **legacy** Tableau reports, converting business logic into **Power BI** dashboards to enhance governance and compliance tracking, increasing reporting efficiency by 30%
- Partnered with business stakeholders to reimagine critical dashboards, achieving a 25% increase in user adoption and reducing data retrieval time by 40%.
- Created advanced Power BI data models with SQL-driven transformations, improving accuracy by 45% and supporting detailed analytics for high-impact decision-making.
- Automated Azure-based **ETL workflows** with SQL scripts to integrate diverse data sources, reduced hands-on data processing by 35% and enabled real-time insights.
- Conducted comprehensive performance tuning for Power BI reports, reducing development cycles by 20%, ensuring dashboards met stringent security and compliance standards.

Power BI Developer (Avanti Group, Hyderabad, India)

July 2021 - July 2022

- Identified a 22% revenue surge in shrimp exports (May–Sept) in Japan & the U.S.; engineered a **Power BI** dashboard with **time-series visuals** to optimize shipments and inventory flow.
- Detected feed cost inconsistencies, optimizing **purchase schedules** for bulk discounts, reducing costs by 12%.
- Planned an automated Power BI dashboard using **DAX** and **Power Query**, integrating **MySQL** sales and logistics data, enabling real-time tracking of inventory and sales forecasts, reducing shipment delays by 25%.
- Incorporated **JIRA** for BI request tracking, managing over 50+ dashboard enhancement requests, ensuring seamless development and issue resolution.

Data Analyst (Techiefrogs, Hyderabad, India)

May 2020 - June 2021

- Created and maintained three interactive **Power BI reports** focused on **sales performance, customer retention, and revenue tracking**, enabling teams to monitor key business KPIs.
- Automated Power BI report **refresh schedules**, eliminating 90% of manual updates and ensuring stakeholders had real-time access to daily sales insights.
- Identified and resolved **data discrepancies** in 12 months of revenue reports, improving financial reporting accuracy by 20% and ensuring consistency between Power BI and source databases.

Technical Skills

Business Intelligence: Power BI (advanced reporting, data modeling, dashboard design), Tableau (migration to Power BI), Alteryx (ETL automation, data transformation),

Databases: SQL Server, MySQL, Snowflake, Azure Synapse Analytics, Azure Data Lake.

Data Analytics: Advanced DAX, Power Query, PySpark, Data Visualization, Data Transformation, KPI-driven analysis.

Programming Languages: Python, R

Cloud Technologies: Azure (Synapse Analytics, Data Lake, Databricks), AWS.

Automation & Reporting: Power Automate, Alteryx (workflow automation, data blending)

Education

University at Buffalo, New York

Master of Science, Data Science
