(202) 525 6762 * birukt.kassahun@gmail.com

PROFESSIONAL SUMMARY

ETL Developer with over four years of experience in ETL development, SQL database management, and data warehouse development, specializing in designing and optimizing data processes. Proficient in building and managing relational databases, writing efficient T-SQL queries, and developing stored procedures for performance optimization. Skilled in SSIS for data migration, transformation, and reporting, with expertise in data visualization using Power BI, Tableau, and SSRS. Strong knowledge of data modeling, OLAP/OLTP systems, and schema design, including Star and Snowflake models. Experienced in Agile and Scrum methodologies, collaborating with cross-functional teams to drive data-driven decision-making.

PROFESSIONAL EXPERIENCES

ETL/SSIS Developer, Revenue Solutions Inc. (RSI)

Jan 2022- Present

- Designed, developed, and optimized ETL workflows using SSIS to integrate data from various sources (CSV, Excel, Oracle, MS SQL), applying transformations that improved processing efficiency. Automated these workflows using SQL Server Agent, reducing manual effort and ensuring timely data updates.
- Developed complex T-SQL queries, stored procedures, and views to manipulate large datasets, leveraging indexing and execution plans to enhance performance to support seamless data retrieval for reporting and analytics.
- Utilized joins, as well as correlated and non-correlated sub-queries, to develop complex business queries involving multiple tables across different databases, ensuring accurate and efficient data retrieval.
- Enhanced reporting and data visualization by designing interactive dashboards in Power BI and SSRS, utilizing drill-down, parameterized, and cross-tab reports to provide actionable insights and improve decision-making.
- Updated and maintained stored procedures, views, and functions utilized by the Conversion and Implementation Teams.
- Employed file system tasks to archive processed files, executed SQL tasks to insert transaction log data into SQL tables.
- Troubleshoot and resolved data-related issues by debugging SSIS workflows and optimizing SQL queries, reducing system downtime and improving data accuracy for critical business operations.
- Collaborated in Agile/Scrum environments, participating in sprint planning and cross-functional meetings to ensure efficient execution of data solutions that met business objectives.

SQL Developer, Institute for Public Health Innovation

Jan 2020 – Dec 2021

- Worked with stakeholders to define data requirements and designed logical and physical data models using a Star Schema approach, resulting in a well-structured data warehouse that supported efficient analysis and reporting.
- Used T-SQL and SQL Server Profiler to write and optimize complex SQL code, significantly improving query performance, reducing execution times and increasing the efficiency of data retrieval processes.
- Developed SSIS packages to perform ETL from diverse sources like flat files, MS Excel, and CSV into the data warehouse, ensuring smooth migration and transformation by maintaining data integrity across all systems.
- Designed and implemented incremental loading processes using Slowly-Changing Dimension (SCD) logic, preserving historical data and up-to-date information for reporting and analysis.
- Used SQL scripts to standardize formats, manage missing values, and adjust column structures during the ETL process to ensure data integrity and consistency before migration to the data warehouse.
- Identified and resolved issues in production ETL processes, streamlined regular SQL tasks, and automated reporting, leading to improved efficiency and reduced operational errors.
- Created and deployed interactive reports using SQL Server Reporting Services (SSRS), including tabular, parameterized, drill-down, and drill-through reports, facilitating better data-driven decision-making by stakeholders.

TECHNICAL SKILLS

- RDBMS: MS SQL Server 2016/2012/2008R2/2008, MySQL, Oracle
- Reporting Tools: SQL Server Reporting Services (SSRS), MS Excel, Tableau, Power BI
- Languages: T-SQL, PL/SQL, C#
- ETL: SQL Server Integration Service (SSIS), Data Transformation Services (DTS), SQL Server Data Tools (SSDT)
- Development Platforms: Visual Studio 2015/2010/2008, SharePoint 2013/2010
- Project Management: JIRA, Slack, TFS, Microsoft Project, Microsoft Visio

EDUCATION

George Mason University (GMU) / Fairfax, VA

Bachelor of Science in Health Science
