ABOUT ME

I am a dedicated Software Engineer with five years of professional experience and passionate about crafting innovative software that enhances organizational efficiency and drives success, I thrive in environments that prioritize clean code and continuous improvement. As a proactive team player with strong verbal and written communication skills, I bring a strategic mindset and a quick learning ability to every project. My confidence and commitment to excellence enable me to deliver high-quality results consistently, contributing effectively to both team objectives and overall organizational goals.

WORK EXPERIENCE

01/09/2023 – CURRENT Nicosia, Cyprus

SOFTWARE DEVELOPMENT SPECIALIST VODAFONE - NORTHERN CYPRUS

1. Revised existing SQLs and ensures that the systems operate at full performance without critical issues.
2. Developed new products, services and campaigns in line with requests from Customer Services and Finance departments,
3. Regularly carried out design, analysis and checks to ensure that campaigns and tariffs work in accordance with the invoice assurance system.
4. Monitored the devices and software of Value Added Services and regularly develops and improves them.
5. Developed, monitored and improved programs where necessary to ensure that the billing system works as planned.
6. **Tech Stack:** PL/SQL, Oracle Tools, Java, JSP, JQuery, Ajax, Python, HTML, CSS, Bash

01/04/2024 – 31/08/2024 Budapest, Hungary

FULL-STACK SOFTWARE ENGINEER / REMOTE SHORT TERM CONTRACT WALLMER PROMOTION LTD.

1. Developed a complete web application using PHP, Laravel, and Statamic, handling both frontend and backend tasks.
2. Designed and implemented the frontend from scratch based on the provided UI/UX designs using Tailwind CSS, ensuring a responsive and visually appealing user interface.
3. Utilized Statamic's features for backend operations, including caching strategies and automated entry management to optimize performance.
4. Managed and configured MySQL databases, ensuring data integrity, security, and efficient querying.
5. Deployed the project on a remote Ubuntu server using Docker and Docker Compose, ensuring a scalable and maintainable environment.
6. Identified, debugged, and resolved issues throughout the development process to ensure a stable and functional final product. Documentation: Created detailed documentation, outlining the project structure, setup instructions, and development notes for future reference and maintainability.
7. **Tech Stack:** Statamic CMS, Laravel, Tailwind CSS, MySQL, Docker, Docker Compose, Ubuntu Server
8. [Related web site.](#)

01/05/2023 – 01/11/2023 Istanbul, Türkiye

PART TIME - SOFTWARE ENGINEER / REMOTE SHORT TERM CONTRACT ARABANAGELSIN

1. Testing, updating and optimizing the exist django projects for performance and security, fixing and debugging the critical bugs.
2. Developing high quality, secure, scalable new features based on technical requirements specifications and design artifacts within expected time and budget.
3. Developing and maintaining the backend of the mobile application using Django Rest Framework. This involves handling data processing, API development, and ensuring the smooth functioning of the application's core logic.
4. **Tech Stack:** Python, Django, PostgreSQL, Pytest, AWS, Redis, Celery, Docker, Docker-compose,

Bitbucket, Trello

01/04/2023 – 31/08/2023 Budapest, Hungary

PART TIME - SOFTWARE ENGINEER / REMOTE SHORT TERM CONTRACT BUDAPEST UNIVERSITY OF TECHNOLOGY AND ECONOMICS

1. Supporting machine learning-based production forecasting method for a company that operates solar systems.
2. Writing clean, high-quality, high-performance, maintainable code.
3. Developing and supporting software including applications, database integration, APIs, and new functionality enhancements.
4. Managing and preparing docker containers, database queries, logging and error handling, database designs and documentations.
5. Tech stack: **Django, Python, Docker, Kubernetes, RabbitMQ, Redis, MySQL, OpenVPN.**

01/02/2023 – 10/08/2023 Nicosia, Cyprus

SOFTWARE ENGINEER - VEHICLE INFOTAINMENT GÜNSEL ELECTRIC VEHICLES

1. Developing, maintaining, and documenting Digital Instrument Cluster application development. Highly responsible on front-end part.
2. Developed demo applications for both DIC and IVI according to new designed UIs which prepared by the design team.
3. Analyzing Software Requirements and meet up with design teams, project managers, and homologation teams to build High performance secure, safety-critical, and human-friendly Infotainment cluster applications.
4. Doing weekly meetings with software team to achieve infotainment cluster and IVI-related software applications with Agile methodologies. Highly responsible for sharing tasks between software developers in the team.
5. Reviewing technical proposals from tier-1 embedded device & software support suppliers.
6. Tech stack: **QT, QML, QTest, QT Creator, QT Design Studio, JavaScript, Bash, Python, Gitlab, Jira**

17/05/2021 – 01/02/2023 Lefkoşa, Cyprus

DIGITAL INSTRUMENT CLUSTER SOFTWARE ENGINEER INTERN GÜNSEL ELECTRIC VEHICLES

1. Created a various contribution for exist **Digital Instrument Cluster** software, mostly worked on front-end with design team.
2. Documented software programs per Software Development Best Practices
3. Worked with project team to meet scheduled due dates, while identifying emerging issues and recommending solutions.
4. Research, create and evaluate technical solution alternatives for the business needs current and future.
5. Performed feasibility studies, logic designs, detailed systems flowcharting, analysis of input-output flow.
6. Gained experience about **AUTOSAR, MISRA** standards.
7. Tech stack: **Qt, Qt Creator, Qt Design Studio, PyQT, C++, JavaScript, Python, gitlab, jira**

01/07/2022 – 01/01/2023 Ankara, Türkiye

PYTHON DJANGO DEVELOPER / REMOTE SHORT TERM CONTRACT ÖZGÜR YAZILIM A.Ş

1. Contributed, developed, maintained an exist django project which used by republic of turkey's ministry of commerce.
2. In this project i was working as a full-stack developer. The team consisted of 1 test engineer and 1 project manager.
3. Tested, updated and optimized the exist django projects for performance and security, fixed critical bugs, added new features.
4. Develop high quality, secure, scalable software solutions and new features based on technical requirements specifications and design artifacts within expected time and budget.
5. Migrated project's django version from 2 to 3.
6. Tech stack: **Python, bitbucket, jira, Django & Django Rest Framework, HTML/CSS, Docker, Docker-compose, NginX, Oracle and MySQL.**

01/03/2022 – 15/07/2022 California, United States

BACKEND DEVELOPER / REMOTE SHORT TERM CONTRACT BLUEDOT

1. I was contributing to the ideation, technical design, implementation, and testing of product features.
2. Designed & delivered crafted REST APIs, interfaces and database schemas to ensure scalability, maintainability, and performance.
3. Gained an experience with CI/CD, TDD and Agile methodologies.
4. Deployed backend project from remote ubuntu server to aws lambda according to specified requirements.

5. Made various improvements on backend project to increase response time for the clients.
6. Tech stack: **MySQL, Php, Laravel, Bref CLI, Serverless, Nodejs, Typescript, AWS, Ec2, Lambda, Docker, Jira, Confluence, Metabase**

01/10/2021 – 30/01/2022 İstanbul, Türkiye

BACKEND DEVELOPER INTERN / REMOTE SHORT TERM INTERNSHIP FIKRIMUHAL TECHNOLOGY

1. Gained professional experience developing modern web apps and designing/developing REST APIs with cross-functional team.
2. Was an active participant in every phase of the software development lifecycle (planning, development, deployment, monitoring)
3. Implemented specific endpoints in project for to send specific data to clients for existing web scrapers.
4. Contributed to improving the company's data processing capabilities and played a key role in delivering high-quality data to clients in a low latency.
5. Tech stack: **Nodejs, PostgreSQL, Typescript, Docker, Github Actions, CI/CD, Github, Jira.**

01/07/2021 – 01/10/2021 London, United Kingdom

SOFTWARE ENGINEER INTERN / REMOTE SHORT TERM INTERNSHIP MYCHARITI

1. Worked in a London-based startup company that was founded in UCL University, collaborating with a team of professionals.
2. Leveraged my knowledge and experience in Python, Django, and other related technologies to develop and integrate key components of the user authentication system.
3. Participated in weekly meetings with the team to discuss project progress and ensure that deliverables were met on time, using agile development methodologies to maintain a flexible and collaborative work environment.
4. Deployed and served the project using heroku according to CI/CD best practices.
5. Tech stack: **Django Rest Framework, OAuth, Github, Python, CI/CD, Docker, MongoDB, Heroku, Trello.**

01/06/2021 – 01/09/2021 İstanbul, Türkiye

BACKEND DEVELOPER / REMOTE SHORT TERM CONTRACT YESILSCIENCE

1. Worked with a large team of 70 professionals, including software developers, product managers, and business personnel, to deliver a high-quality product that met customer needs and expectations.
2. Developed and maintained a robust backend architecture that ensured fast and reliable data transfer between the mobile app and the server.
3. Used agile development methodologies to complete project milestones and deliverables on time, ensuring seamless integration of the backend with other project components.
4. Leveraged existing knowledge and experience gained from previous job roles to design and develop backend systems and APIs for mobile app.
5. Tech stack: **Nodejs, Javascript, Typescript, Expressjs, MongoDB, Github, Jira**

20/02/2021 – 01/06/2021 Ankara, Türkiye

SOFTWARE ENGINEER INTERN / REMOTE REMOTE SHORT TERM INTERNSHIP APZIVA

1. Developed various projects based on manager requirements, gaining experience in both back-end and full-stack development.
2. Emphasized the use of REST/ Restful APIs and followed software principles and design patterns in all projects.
3. Collaborated effectively with other developers and demonstrated strong communication skills, resulting in successful project outcomes.
4. Consistently delivered high-quality work and met project deadlines, earning recognition as a reliable and valued team member.
5. Tech stack: **Python, Django, fastApi, HTML/CSS, Docker, PostgreSQL, MongoDB, Jira, Ubuntu Server, CI/CD.**

08/10/2020 – 15/04/2021 İstanbul, Türkiye

PYTHON DEVELOPER / REMOTE SHORT TERM CONTRACT YAPAY ZEKA AKADEMI

1. Developed scalable, maintainable, testable web application project according to exist UIs and customer requirements.
2. Developed two Python scripts to scrape data from over 50 Facebook and WhatsApp groups.
3. Allowed users to view and filter and see extracted words by NLP model from data scraped from Facebook and WhatsApp groups.
4. Deployed the project to an Ubuntu server for production use and followed best practices.
5. Worked in **scrum** methodology environment.
6. Tech stack: **Python, Selenium, Asyncio, Django, HTML/CSS, NginX, Linux, MsSQL, MySQL, Spacy, Github, Trello.**

1. Contributed to the development of a large-scale mobile app designed to teach software development & different programming languages to a wide audience.
2. Created and managed a content repository for the app, consisting of Python programming and it's framework (django, selenium etc.) tutorials, videos, and quizzes, to help users learn key concepts and skills.
3. Implemented web scraping scripts to collect data for the app's content which used for news section.
4. Developed an admin panel for the app to manage user accounts, monitor content contributions by volunteers, and track app usage statistics.
5. Tech stack: **Flutter, Python, Django, Asyncio, Aiohttp, Bs4, MySQL, Firebase, Cpanel, Github**. Check out the mobile app on [IOS](#) & [Play Store](#)

EDUCATION AND TRAINING

01/09/2019 – 20/01/2023 Nicosia, Cyprus

BSC. SOFTWARE ENGINEERING Near East Universty

Address Near East Boulevard, ZIP: 99138, Nicosia TRNC Mersin 10 – Turkey, 99100, Nicosia, Cyprus

LANGUAGE SKILLS

Mother tongue(s): **TURKISH**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

03/01/2023 – 31/07/2023

Hotel Reservation and Transfer System / Remote Short Term Contract

1. Worked as a freelancer backend developer, built restful api ensuring security and performance within expected time and budget.
2. Developed scalable, maintainable, testable web application project according to specified requirements and entity relationship diagram.
3. Test-Driven Development (TDD) used as a software development process and followed best practices of SOLID.
4. Used docker and built containerized application
5. Tech stack: **PHP, Laravel, Linux, MySQL, Vuejs, Github, Github Actions**
