SUMMARY

Carl is an expert senior software engineer with over **10** years of experience in full-stack development across industries such as finance, healthcare, and e-commerce. He specializes in back-end development, **Microservices** architecture, and cloud-native solutions using **Azure** and **AWS**. Skilled in **ASP.NET Core**, **Angular**, and **React**, he is also proficient in **CI/CD** pipelines, cloud deployment, and **Agile** workflows. Additionally, he focuses on **test-driven development**, **domain-driven design**, and object-oriented programming principles.

SKILLS

C#, .NET, ASP.NET, ASP.NET Core, Web Forms, Win Forms, WCF, ADO.NET, Entity Framework, NUnit, XUnit, MSTest, Moq, Angular, React, Next.js, Node.js, Express.js, Spring, Django, Microsoft SQL Server, Oracle, MySQL, DynamoDB, Redis, LINQ, SSIS, Azure Service Bus, Azure Function Apps, Azure Logic Apps, Cosmos DB, Azure Redis Cache, Azure Blob Storage, SQL Azure, Azure App Services, Azure AD, AWS Lambda, AWS CloudFront, AWS CloudWatch, AWS DynamoDB, AWS Kinesis Firehose, Bamboo, TeamCity, Azure DevOps, Docker, Nexus, Confluence, JIRA, GitHub Actions

WORK EXPERIENCE

SCIENCESOFT

REMOTE

05/2022 – 03/2025 MCKINNEY, TX

Senior Software Engineer / ASP.NET Core, Django, Angular, Microservices, Azure

Spearheaded the development of **5** large-scale enterprise projects using cloud-native microservices architecture on **Azure** Services, implementing **Domain-Driven Design** (DDD) principles within **Agile** team of **3~25** members

- Migrated a legacy monolithic platform to a microservices architecture utilizing **C#**, **ASP.NET Core 6**, **Django**, **Angular**, **Azure Service Bus**, **Azure Kubernetes Service** and employed design patterns such as **Singleton**, **Factory**, and **CQRS** patterns
- Developed microservices and **RESTful APIs** with **ASP.NET Core 8**, establishing a **RBAC** authorization system using **OAuth** and **Claims** package, while ensuring secure environment configurations through **Azure Active Directory**
- Transitioned significant feature modules from **AngularJS** to **Angular 14**, **Angular 17** integrating **Kendo UI** components and implemented **OAuth 2.0** authentication for secure communication with **ASP.NET Core APIs**
- Optimized stored procedures and **T-SQL** queries with **Entity Framework Core**, and deployed **Azure Event Grid** with **Microsoft SQL Server** and **Azure Blob Storage** for efficient event processing and secure data storage, resulting in **30%** increase in data processing speed
- Maintained one socket client (**Node.js**) to allow real-time communication between **IoT** devices
- Enhanced backend API security through the implementation of **OAuth 2.0**, **JWT** authentication, **IP whitelisting**, and integrated **Elasticsearch APIs** to improve policy search functionality
- Leveraged Azure services, including **Functions**, **Load Balancer**, **Firewall**, **Service Bus**, **Kubernetes Service**, and **Key Vault**, achieving a **87%** uptime and configured network traffic to **RESTful APIs** microservices via **Azure API Management**
- Established a comprehensive testing strategy, including unit, integration, and end-to-end testing, utilizing tools such as **Selenium**, **Jest**, and **NUnit**, achieving over **93%** test coverage
- Integrated monitoring solutions like **Datadog** and **Azure Monitor** into microservices, managed source code with **Git**, and automated builds through **GitHub** and **Jenkins**, while collaborating with **JIRA** for commit tracking, improving team efficiency
- Improved platform security and scalability by implementing API versioning and adopting an API-first design methodology, utilizing **OpenAPI** and **Swagger** for detailed API documentation, leading to a **50%** increase in API usability

- Conducted code reviews and mentored **2** junior developers within a team of **6** software engineers, implementing **SAFe** practices, including **ARTs**, **PI** planning, and **Lean-Agile** principles

TAPCHECK INC

REMOTE

03/2020 – 05/2022 PLANO, TX

Senior Software Engineer / .NET, Angular, React, AWS

- Engineered an **ASP.NET MVC 5** application to automate and consolidate routine tasks, facilitating the migration from **WPF** for a bankruptcy services provider
- Transformed a **Laravel** card management project from **PHP** to **.NET Core** successfully migrating endpoints, and incorporated a **React** micro-frontend to manage routing during the transition, which improved load time by **20%**
- Streamlined an **Angular** application by removing complex **NgRx** and **RxJS** dependencies, integrating **Figma** designs, upgrading code standards, and modularizing components, resulting in a **25%** decrease in code maintenance time
- Updated a **React SaaS** platform with **Next.js**, resulting in a **30%** increase in user engagement through server-side rendering (SSR)
- Led data migration efforts using **Microsoft SQL Server Integration Services** (SSIS) to transfer over **100,000** records between databases, achieving **100%** accuracy and significantly reducing manual workloads
- Designed and deployed Identity microservices using **RESTful** architecture and **AWS**, with expertise in **AWS Identity** and **Access Management**, reducing authentication time
- Enhanced an **AWS ETL** pipeline by implementing **Lambda triggers**, **Node.js**, and **Kinesis Firehose** to synchronize data from **DynamoDB** to a reporting **MySQL** database, improving data processing speed by **45%**
- Utilized **AWS** services, including **CloudFront**, **CloudFormation**, **CloudWatch**, and **DynamoDB**, to improve application performance and scalability, achieving **99.9%** uptime and ensuring a seamless user experience

HALLMARK HEALTH CARE SOLUTIONS

ONSITE

03/2012 – 03/2020 HAUPPAUGE, NY

Software Engineer / .NET, React, Next.js, Agile

- Showcased proficiency in development methodologies like **Agile SCRUM** and **Test-driven development**, contributing to a **30%** increase in project delivery speed
- Developed web applications using **ASP.NET MVC**, enhancing user engagement and site performance by **20%**
- Transformed a **VB.NET** patient portal into **React/Next.js**, **.NET Core 2.2**, **MaterialUI** based web applications, emphasizing compliance with **HL7**, **FHIR**, and **HIPAA** for secure data exchange
- Created Stored Procedures, Views, Triggers and Complex **T-SQL** queries in **SQL Server**, reducing query execution time by **40%**
- Managed database interactions using **Entity Framework** and **LINQ** with **ASP.NET**, optimizing data access and improving application efficiency, leading to a **30%** reduction in load times
- Executed **RESTful APIs** with **ASP.NET Web API**, enabling seamless integration with front-end applications and third-party services
- Conducted comprehensive unit and integration testing for **ASP.NET** applications using **NUnit** and **xUnit**, ensuring robust functionality and reliability
- Designed responsive user interfaces with **Razor** Pages, ensuring a consistent user experience across devices

EDUCATION

Vanderbilt University, Nashville, TN

Bachelor of Science, Computer Science
