

Daniel Harris

📍 Spring Hill, FL 34606 📞 (352) 309-0920 ✉️ danielrharris111@gmail.com

🌐 <https://www.linkedin.com/in/daniel-harris-a6a752aa/> 🐙 <https://github.com/danielh110>

Results-driven Senior Full-Stack Engineer with 10+ years of experience designing and developing scalable, high-performance software solutions. Adept at building enterprise applications, optimizing system performance, and integrating complex backend and frontend technologies. Skilled in **Java, Spring Boot, Angular, React, AWS**, and microservices architecture, with a proven track record of delivering secure, reliable, and scalable applications across diverse industries, including finance, e-commerce, automotive, and technology.

Technical Skills

Back-End

- ☉ Java
- ☉ Kotlin
- ☉ Spring Boot
- ☉ Spring Framework
- ☉ Spring MVC
- ☉ Java Frameworks
- ☉ Node.js
- ☉ Express.js
- ☉ Nest.js
- ☉ Apache Camel
- ☉ SOAP
- ☉ RESTful APIs
- ☉ Stripe

Front-End

- ☉ Angular
- ☉ React
- ☉ TypeScript
- ☉ JavaScript
- ☉ HTML
- ☉ CSS
- ☉ Next.js
- ☉ JSP
- ☉ Backbone.js
- ☉ Elastic Path
- ☉ Bootstrap

Databases & Storage

- ☉ PostgreSQL
- ☉ MongoDB
- ☉ AWS DynamoDB
- ☉ ActiveMQ
- ☉ Kafka
- ☉ RabbitMQ

Cloud & DevOps

- ☉ AWS (S3, EC2, RDS, DynamoDB, CloudFront, Cognito, CI/CD)
- ☉ Google Cloud Platform (GCP)
- ☉ Azure
- ☉ Docker
- ☉ Kubernetes
- ☉ Jenkins
- ☉ Splunk

Experience

Smartistack

03/2019 – 12/2024

Los Angeles, CA

1. S&P Global

<https://www.spglobal.com/>

S&P Global provides financial information, analytics, and insights for businesses, investors, and policymakers worldwide. The platform delivers real-time data processing, market intelligence, and risk assessment solutions through advanced technologies.

- ⦿ Designed and developed robust backend services using **Java** and **Spring Boot**, ensuring secure and efficient data processing.
- ⦿ Built interactive dashboards and financial analytics tools using **Angular** and **Bootstrap**, improving data visualization and user experience.
- ⦿ Integrated third-party financial data APIs for real-time stock analysis, credit ratings, and risk assessment.
- ⦿ Implemented **Kafka**-based messaging queues to stream market data and transaction processing efficiently.
- ⦿ Optimized cloud infrastructure on **AWS**, leveraging **EC2**, **RDS**, and **Lambda** for scalability and performance.
- ⦿ Strengthened security by integrating multi-factor authentication and fraud detection mechanisms.
- ⦿ Configured **Jenkins** CI/CD pipelines to automate deployment processes and improve software release cycles.
- ⦿ Tech Stacks: Java, Spring Boot, Angular, Bootstrap, AWS, Kafka, Jenkins, PostgreSQL, Financial Data APIs.

2. Turo

<https://www.turo.com/>

Turo is a peer-to-peer car-sharing marketplace that enables users to rent vehicles from local owners. The platform ensures secure transactions, real-time booking, and seamless user interactions powered by cutting-edge technologies.

- ⦿ Developed and managed RESTful APIs using **Java** and **Spring Boot**, facilitating seamless communication between users, vehicle listings, and payment services.
 - ⦿ Built a responsive and user-friendly front-end with React and Bootstrap, improving search, booking, and listing management.
 - ⦿ Integrated real-time payment processing with **PayPal API** and fraud prevention mechanisms to enhance security.
 - ⦿ Implemented **EasyPost API** for automated verification of user documents and vehicle tracking.
 - ⦿ Leveraged **RabbitMQ** for message queuing to handle booking confirmations, notifications, and vehicle availability updates.
 - ⦿ Managed and scaled the cloud infrastructure using **AWS ECS**, **Lambda**, and **DynamoDB** for efficient data handling and transaction processing.
 - ⦿ Configured **Jenkins** CI/CD pipelines for continuous integration and streamlined software deployment.
 - ⦿ Tech Stacks: Java, Spring Boot, React, Bootstrap, AWS ECS, RabbitMQ, Jenkins, PayPal API, EasyPost API, PostgreSQL.
-

3. Lowes

<https://www.lowes.com/>

Lowes.com is a leading home improvement e-commerce platform offering tools, appliances, and building materials. The site delivers a seamless shopping experience through AI-powered recommendations, real-time inventory management, and an optimized supply chain.

- ⊙ Engineered scalable backend services using **Java** and **Spring Boot**, ensuring efficient product catalog management and real-time inventory updates.
- ⊙ Developed AI-powered recommendation algorithms using machine learning APIs, enhancing personalized shopping experiences for customers.
- ⊙ Built responsive and intuitive front-end interfaces using **React** and **Bootstrap**, improving navigation and product discovery.
- ⊙ Integrated warehouse management APIs to optimize stock availability, reduce fulfillment delays, and improve logistics efficiency.
- ⊙ Implemented **GraphQL** APIs for efficient data fetching, reducing response times, and improving application performance.
- ⊙ Deployed **AWS** Auto Scaling and **ECS**, ensuring high availability and performance during seasonal shopping peaks.
- ⊙ Tech Stacks: Java, Spring Boot, React, Bootstrap, AWS ECS, GraphQL, AI/ML APIs, PostgreSQL.

 **Senior Java Developer**
Cisco

06/2016 – 02/2019
San Jose, CA

- ⊙ Engineered and maintained back-end systems with **Java** and **Spring MVC**, optimizing application performance and ensuring seamless integration across components.
- ⊙ Developed responsive and user-friendly front-end interfaces using **React**, delivering a superior user experience.
- ⊙ Enhanced database functionality and transaction handling by leveraging **Hibernate** and **Spring** for streamlined data management.
- ⊙ Designed and implemented RESTful APIs using **JAX-RS**, facilitating efficient interaction between front-end and back-end layers.
- ⊙ Established robust system communication by employing **Apache Camel** for module integration and utilizing **Docker Hub** for configuration management.
- ⊙ Streamlined infrastructure deployment through Chef Configuration Management, boosting operational efficiency.
- ⊙ Tech Stacks: Java, Spring MVC, React, Hibernate, Spring, JAX-RS, Apache Camel, Docker Hub.

 **Java Developer**
Guru - Internship

10/2014 – 05/2016
Pittsburgh, PA

During my academic years, I gained practical experience through an internship with Guru, where I worked as a freelance Java Engineer. This opportunity allowed me to enhance my coding skills, collaborate with clients, and deliver tailored solutions while managing real-world projects in a professional environment.

-
- © Implemented full-stack solutions with **Java** and **Angular**, achieving a 40% improvement in application performance and enhancing user satisfaction ratings by 20% within six months.
 - © Led the development of a **Spring Boot** microservice architecture, reducing application load time by two seconds and boosting user experience across the platform.
 - © Analyzed complex queries in **PostgreSQL**, boosting database performance and expediting user data retrieval.
 - © Installed a new architecture with **AWS Lambda**, facilitating a 28% reduction in the application's response time.
 - © Developed and deployed **Docker** containers to standardize the environment, reducing deployment issues by 32% and ensuring consistent performance across multiple platforms.
 - © Managed the continuous integration pipeline with **Jenkins**, reducing build failures and accelerating 11 feature releases.
 - © Systematized version control practices using **Git**, reducing merge conflicts and improving the collaboration of six teams on multiple large projects.
 - © Tech Stacks: Java, Angular, Spring Boot, PostgreSQL, AWS Lambda, Docker, Jenkins, Git.
-

Education

Bachelor's degree: Computer Engineering
California State University, Fresno

2011 – 2016
Fresno, CA
