SUMMARY

Innovative **Senior Full-Stack Java Developer** with **10** years of experience **designing, developing, and optimizing scalable web applications**. Specializing in **backend development** with **Java, Spring Boot, and microservices**, while delivering responsive front-end solutions **using React, Angular, and TypeScript**. Proficient in **API development, microservices migration, cloud-native architectures, and event-driven systems (Kafka, RabbitMQ)**. Adept at **DevOps automation**, ensuring **seamless deployment and system reliability**. Passionate about writing **clean, efficient code**, solving **complex engineering challenges**, and **mentoring** junior developers.

PROFESSIONAL EXPERIENCE

07/2022 – present
Austin, TX

Senior Full Stack Java Developer, AgronDigital

- Designed, and deployed **15+** scalable microservices using **Java, Spring Boot, and Kubernetes**, reducing system downtime by **40%** and improving request handling by **50%**.
- Developed **RESTful APIs** following **OpenAPI, and Swagger standards**, ensuring maintainable, and well-documented endpoints.
- Integrated **Apigee/API Gateway** to manage, monitor, and secure APIs, implementing **rate limiting, authentication, and role-based access controls (RBAC)**.
- Implemented **event-driven microservices** using **Kafka, and RabbitMQ**, enabling **real-time asynchronous processing, and distributed transactions**.
- Optimized **database queries** (PostgreSQL, Oracle), reducing query execution time from **1.5s to 0.5s**, improving application responsiveness by **70%**.
- **Led CI/CD automation efforts**, setting up **Jenkins, Terraform, and GitHub Actions** for seamless cloud-based deployments in **AWS, and Google Cloud**.
- Developed **frontend components** using **React, TypeScript, and Redux**, enhancing **UI performance, and interactivity**.
- Strengthened application security by implementing **OAuth2, JWT authentication, IAM roles, and encryption strategies**, reducing security vulnerabilities by **60%** (as reported by **SonarQube**).
- Implemented **caching strategies** using **Redis, and Memcached**, reducing API response times by **50%**.

- Improved **test coverage** by implementing **JUnit, Mockito, and TestContainers** for unit and integration testing, ensuring the high reliability of microservices.
- Monitored **system health**, and **performance** with **Prometheus, Grafana**, and **ELK stack**, proactively resolving bottlenecks.
- Mentored **junior engineers**, conducted code reviews, and established best practices for microservices development, and API security.

02/2019 – 07/2022
Dallas, TX

Full Stack Developer, HeavyTask

- Redesigned a **legacy monolithic application** into a **distributed microservices architecture**, improving scalability, and maintainability.
- Developed **secured RESTful APIs** with **Spring Boot, Spring Security, and OAuth2**, implementing **JWT-based authentication**, and **API Gateway policies**.
- Built **real-time event-driven services** using **Kafka Streams**, and **RabbitMQ**, ensuring fault-tolerant, **event-sourcing-based architecture**.
- Implemented **automated infrastructure provisioning** using **Terraform, and Helm**, accelerating deployment time by **40%**.
- Optimized cloud deployment using **AWS Lambda, S3, API Gateway**, and **ECS**, cutting infrastructure costs by **35%** while improving deployment speed by **50%**.
- Automated **integration tests** using **JUnit, Mockito, and Postman**, ensuring API robustness, and reliability.
- **Refactored SQL queries** in **Oracle, and PostgreSQL**, improving response times by **30%** through proper indexing, and optimization.
- Collaborated with **frontend teams** to integrate **Angular-based applications** with backend microservices via RESTful APIs.

02/2016 – 01/2019
Lubbock, TX

Java Developer, CoNetrix

- Developed **high-performance backend services**, and **REST APIs** with **Core Java, Spring Boot, Hibernate, and Jersey**, handling **high concurrent traffic**.
- Designed, and implemented **multithreading solutions** to improve the system's request handling, reducing thread contention.
- Migrated **on-premise infrastructure** to **AWS**, improving scalability, and disaster recovery capabilities.
- **Developed shell scripts** for **log analysis, automated deployments, and database maintenance**, streamlining operational workflows.
- Implemented **system-wide monitoring** using **Prometheus, and Grafana**, providing real-time insights into system performance.
- Applied **rigorous testing strategies** using **JUnit, Mockito, and SonarQube**, improving overall code quality.

- Worked with **Agile methodologies**, and participated in **Scrum meetings, sprint planning, and code reviews** to ensure quality deliverables.

07/2015 – 01/2016
Austin, TX

Java Developer Internship, LearningCurv

- Assisted in developing a **Java-based ticketing system** for a logistics company, implementing **CRUD operations**.
- Wrote **unit tests using JUnit**, and performed **API testing with Postman** to ensure service reliability.
- Participated in **code reviews**, and received hands-on mentorship from **senior Java developers**.
- Worked with **Git** for version control, and collaborated with developers using **JIRA**.

SKILLS

Programming Languages:

Java (17, 20, 21), J2EE, Python, Scala, JavaScript, TypeScript

Frontend Technologies:

React, Angular, TypeScript, JavaScript, HTML, CSS

Backend Frameworks & Tools:

Spring Boot, Spring Batch, Spring Security, Hibernate, Jersey

Messaging & Event-Driven Systems:

Kafka, RabbitMQ, Apigee, WebSockets

Web Services & API Development:

RESTful API design, OpenAPI, OAuth2, JWT, Apigee/API Gateway, SOAP Web Services, Microservices migration

Cloud & DevOps:

AWS (Lambda, ECS, S3, API Gateway), Google Cloud, Kubernetes, Terraform, Helm, Docker, Jenkins, GitHub Actions, Fortify, SonarQube, Blackduck

Databases & Caching:

PostgreSQL, MySQL, Oracle Database (SQL, PL/SQL), Redis, Memcached

Security & Authentication:

IAM roles, API authentication, OAuth2, JWT, Web Application Security, Encryption Strategies

System Design & Architecture:

Microservices, Event-Driven Architecture, Distributed Systems, High-Performance System Design, Multithreading

Testing & Monitoring:

JUnit, Mockito, Postman, BDD/TDD, SonarQube, Prometheus, Grafana, ELK Stack

EDUCATION

08/2011 – 07/2015
Lubbock, TX

Texas Tech University, Bachelor's Degree in Computer Science
