

Emmanuel Njong
Scrum Master / Business Analyst
Minneapolis, MN, USA | +1 (763) 321-6283 | emmanuel9njong@gmail.com

Professional Summary

Certified Scrum Master and Business Analyst with 10+ years of IT experience driving Agile transformation, business process optimization, and digital innovation across finance and technology sectors. Proven success leading cross-functional teams through Scrum and SAFe frameworks to deliver scalable, high-value solutions. Skilled in ServiceNow platform integration, business requirements analysis, and stakeholder management to align technology initiatives with strategic objectives. Adept at translating complex business needs into actionable user stories, automating workflows, and leveraging data insights through SQL, Power BI, and Tableau. Committed to continuous improvement, collaboration, and driving measurable business value within dynamic, fast-paced environments.

Technical Skills

Business Analysis & Process Management: Requirements Gathering, BRD/FSD Documentation, User Stories, Use Case Modeling, Process Optimization, Stakeholder Analysis, Change Management, Gap Analysis, UAT Coordination, Wireframing

Data & Reporting Tools: SQL, Python, Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, Macros), SharePoint, Microsoft Access, Google Sheets, Workflow Automation, Dashboard Creation, KPI Reporting

Project & Product Management Tools: Jira, Confluence, Trello, Microsoft Visio, Lucidchart, Microsoft Teams, PowerPoint, MS Project, ServiceNow (IRM/GRC, PPM, Integration), Azure

Methodologies & Agile Frameworks: Scrum, Kanban, SAFe, Waterfall, SDLC, Lean, Sprint Planning, Backlog Prioritization, Daily Stand-ups, Retrospectives, Release Management, Continuous Improvement

Enterprise Systems & Business Knowledge: ERP Systems, SAP, CRM Platforms, Financial Analysis, Market Research, Pricing & Operations Analysis, Compliance & Regulatory Understanding

Soft Skills: Stakeholder Communication, Analytical Thinking, Problem Solving, Team Collaboration, Leadership, Coaching & Mentorship

Professional Experience

Wells Fargo, Minneapolis, MN | Apr 2022- Present

Sr. Information Security Analyst (Scrum Master)

- Redesigned IT procurement workflows using Lean principles and Root Cause Analysis, reducing procurement cycle from 20 to 13 days, improving sprint predictability by 25%, and cutting operational costs by \$150,000 annually.
- Integrated ServiceNow IRM/GRC and PPM modules, improving audit reporting for 5 departments, reducing compliance review time by 20%, while enabling automated risk alerts for 8 security projects in MS Project.
- Analyzed operational datasets with SQL, creating Power BI dashboards to track incident trends, decreasing response time from 48 to 38 hours and providing leadership with actionable sprint intelligence.
- Documented functional and non-functional requirements using Visio, supporting Azure AI/ML fraud detection initiatives, while performing Gap Analysis to resolve 15 critical workflow inefficiencies impacting regulatory compliance.
- Mentored Scrum teams with Coaching & Mentorship and Kanban, improving collaboration, sprint predictability, and delivering 6 major releases on schedule, contributing to 30% reduction in recurring support tickets.

PNC Financials| Apr 2020 – Mar 2022

Scrum Master/Business Analyst

- Led 3 Agile teams using Scrum and SAFe, delivering 12 product enhancements across 8 sprints, increasing sprint completion rate by 22%, and helping avoid \$250,000 in missed revenue opportunities.
- Developed Tableau dashboards with Python, shortening report generation from 3 days to 1, providing actionable branch-level insights, and supporting 15% increase in operational decision-making efficiency.
- Collaborated with stakeholders to produce BRDs, FSDs, and User Stories, performing Gap Analysis, ensuring 95% regulatory compliance, and enabling smooth deployment of 18 new banking features.
- Coordinated internal API integrations for AgriTech platforms, managing UAT, reducing post-deployment defects from 10 to 3 per release, and standardizing data flows across 3 regional platforms.
- Automated reporting workflows using Workflow Automation, eliminating 50 manual hours monthly, improving real-time KPI tracking, and enabling faster sprint planning for analytics and operational teams.

Contractor for Securian Financial | Minneapolis| MN | Nov 2019–Mar 2020

Scrum Master/Business Analyst

- Facilitated Agile ceremonies for insurance claim processing, completing 6 sprints with zero missed deadlines, enhancing visibility of claims pipeline and preventing \$120,000 potential claim payout delays.
- Guided an 8-member Scrum team using Coaching & Mentorship, reducing blocker resolution from 3 days to 1 and ensuring timely completion of policy automation tasks within tight deadlines.
- Created functional test cases and executed QA, achieving 98% requirement coverage, uncovering critical system gaps, and improving end-to-end claim processing efficiency.
- Refined backlog with Product Owner, prioritizing 25 features using Jira and Confluence, accelerating deployment of high-value insurance functionalities and reducing release preparation time by 20%.
- Led stakeholder workshops, translating 30+ complex insurance requirements into actionable sprint items, improving clarity, alignment, and adoption of new automated claims processes.

Business Analyst/Project Manager

- Elicited requirements for food inspection systems, producing Functional Specifications and User Stories, preventing 10 recurring compliance issues, and saving the authority \$75,000 annually in penalty fines.
- Orchestrated project plans using Lean Principles, completing 45 milestones on time, coordinating cross-functional teams, and improving delivery efficiency for multi-region inspection sprints.
- Implemented ERP Systems, streamlining inventory approvals and reporting, reducing manual steps from 50 to 30 weekly, and enabling real-time tracking of compliance inspections.
- Mentored junior analysts using Coaching & Mentorship, improving adoption of Agile methodology, reducing reporting cycle time, and increasing team productivity by 25% on operational sprints.
- Extracted and analyzed operational datasets with Excel and SharePoint, uncovering workflow gaps, reducing project turnaround by 3 days per cycle, and supporting data-driven inspection planning.

Shenzhen International Trading, Shenzhen| China | Dec 2013– May 2014

Scrum Master/Cloud Support

- Optimized supply chain using Python predictive models, reducing excess inventory by 25%, saving \$220,000 annually, and improving order accuracy from 82% to 97% in 2-week sprints.
- Conducted Agile ceremonies for cloud inventory projects, delivering 6 weekly shipments on time, increasing stakeholder satisfaction, and boosting team sprint velocity by 18%.
- Enhanced operational efficiency using Workflow Automation, cutting 120 manual hours monthly, reducing errors by 15%, and improving cross-border logistics cycle consistency.
- Built dashboards using Excel and Access, tracking KPIs and enabling faster decision-making, increasing supply chain visibility and reducing miscommunication delays by 20%.
- Trained team members on Scrum and Agile principles, embedding Coaching & Mentorship, achieving 90% sprint goal completion and improving adherence to project milestones.

Edison Long Logistics, Shenzhen, China | Sep 2009– Dec 2013

Oracle Database Support

- Developed CRM Platforms, consolidating global customer data, reducing response time from 5 to 3 hours, improving collaboration across 15 departments, and boosting revenue capture by \$180,000 annually.
- Secured Oracle Database environments, performing backups and schema refreshes, maintaining 99% uptime, ensuring uninterrupted support for high-priority logistics projects.
- Communicated updates and promoted logistics services to international clients, increasing engagement and repeat business for 30 global accounts.
- Generated dashboards and analytics using Excel and Access, improving KPI visibility across 10 logistics hubs, and enabling faster operational and management decisions.
- Coordinated workflow optimization using Workflow Automation, increasing productivity, meeting 95% of project deadlines, and enhancing operational efficiency across international logistics operations.
