

Esther Abosede | Infrastructure Engineering/ SRE engineering

Location: MD, USA | Phone: 240-840-8460 | Email: techestie@gmail.com | [LinkedIn](#)

SUMMARY

Results-driven **Infrastructure Engineer / Site Reliability Engineer (SRE)** with **9+ years of experience** in designing, automating, and optimizing cloud infrastructure to improve reliability, scalability, and security. Proven track record of reducing deployment time, minimizing downtime, and enhancing system performance through automation and proactive monitoring. Skilled in implementing cost-saving strategies, streamlining operational processes, and ensuring compliance with industry security standards. Strong background in managing large-scale cloud environments, improving incident response times, and driving efficiency in software delivery. Adept at collaborating with cross-functional teams to enhance infrastructure resilience and support business objectives. Passionate about leveraging automation and best practices to create highly available, secure, and efficient cloud solutions in fast-paced environments.

TECHNICAL SKILLS

Azure Experience:	Identity and Access Management, Azure Networking, Azure Key Vault, Azure Monitor, SQL, B2B & B2C, AADDS, Reporting and Monitoring, Root Cause Analysis, User Provisioning and Synchronization, Infrastructure provisioning and management with Terraform and ARM Templates.
Cloud Platforms:	Microsoft Azure (Microsoft Entra ID, Azure Storage, Azure App Service, Azure Event Hub, Azure Security), AWS.
CI/CD & DevOps Tools:	Azure DevOps, GitHub Actions, Git, Jenkins.
Scripting & Automation:	PowerShell, Bash, Python.
Monitoring & Logging:	Grafana, Prometheus, Azure Monitor.
Containerization & Orchestration:	Docker, Kubernetes.
Databases:	SQL Server, MySQL.
Operating Systems:	Linux Commands, Windows Server

PROFESSIONAL EXPERIENCE

Dell Technologies, TX, USA | Infrastructure Engineer / SRE Engineer

Feb 2021 – Current

- **Automated Azure infrastructure provisioning** using **Terraform, ARM Templates, and PowerShell**, reducing deployment time by **60%** and minimizing human errors.
- **Implemented and managed Azure IAM (Entra ID) with RBAC, OAuth, and Conditional Access Policies**, reducing unauthorized access incidents by **40%** and improving security compliance.
- **Optimized Azure Virtual Networks (VNet), ExpressRoute, and NSGs**, improving network **latency by 20%** and enhancing connectivity for enterprise applications.
- **Developed centralized monitoring solutions** using **Azure Monitor, Prometheus, and Grafana**, increasing system observability and reducing false alerts by **30%**.
- **Designed and maintained CI/CD pipelines** with **Azure DevOps, GitHub Actions, and Jenkins**, reducing deployment failures by **50%** and accelerating software releases.
- **Deployed and secured Kubernetes workloads (AKS, EKS)** using Helm charts and network policies, ensuring high availability and compliance with security standards.
- **Optimized cloud resource allocation and implemented cost-saving strategies**, reducing infrastructure expenses by **30%** through automation and right-sizing.
- **Developed automated security compliance audits** using PowerShell and Python, ensuring alignment with **SOC 2, ISO 27001, and NIST frameworks**.

DXC Technology, TX, USA | Infrastructure Engineer

Jan 2018 – Jan 2021

- **Managed and optimized Azure-based infrastructure**, improving system performance by **20%** through proactive monitoring, scaling, and fine-tuning configurations.
- **Automated cloud infrastructure provisioning** using **Terraform and ARM Templates**, reducing deployment cycles by **50%** and increasing infrastructure consistency.
- **Configured RBAC policies, Conditional Access, and MFA for Azure AD**, strengthening identity security and reducing unauthorized login attempts by **35%**.
- **Designed real-time monitoring dashboards** in **Azure Monitor, Prometheus, and Grafana**, enhancing log visibility and reducing incident response time by **25%**.
- **Resolved 80+ production incidents** with an average **MTTR of 2 hours**, implementing proactive root cause analysis to prevent recurring issues.
- **Secured SQL Server and MySQL databases** by implementing **TDE encryption, automated backups, and access controls**, ensuring **99.99% uptime** and data integrity.
- **Optimized CI/CD pipelines with Azure DevOps and Jenkins**, reducing software release time by **40%** and improving development agility.
- **Implemented cloud security best practices** by configuring **Azure Security Center, Defender for Cloud, and Key Vault**, reducing vulnerabilities by **45%**.

McKinsey & Company, TX, USA | System Administrator

Jan 2016 – Dec 2017

- Managed and maintained **Windows Server 2016/2012** and **Linux (RHEL, Ubuntu)** environments, ensuring **99.9% uptime** for business-critical applications.
- Automated routine system administration tasks using **PowerShell, Bash, and Python**, reducing manual effort by **30%** and increasing operational efficiency.
- Administered **Active Directory (AD), Group Policies, and DNS**, optimizing authentication and access control across enterprise systems.
- Deployed and monitored **enterprise backup and disaster recovery solutions** using **Veeam, Acronis, and Windows Backup**, ensuring data integrity.
- Implemented **server hardening and patch management** using **WSUS and Ansible**, reducing security vulnerabilities by **40%**.
- Provided **Tier 2 and Tier 3** technical support, troubleshooting **Windows, Linux, and network issues**, resolving **95% of tickets within SLA**.
- Configured and managed **VPNs, firewalls (Palo Alto, Cisco ASA), and endpoint security solutions**, improving network security posture.
- Documented **IT procedures, infrastructure configurations, and incident resolution playbooks**, enhancing team collaboration and knowledge transfer.

EDUCATION

Masters In Information Science | Texas A&M International, Laredo TX
Bachelors Computer and Information Science. BS Cybersecurity | Park University, Parkville MO

CERTIFICATION

- | | |
|---|---|
| ➤ API Security Fundamental Udacity ALX-T Cloud Developer | Microsoft Certified: Azure Solutions Architect Expert-AZ 305 |
| ➤ Microsoft Certified: DevOps Engineer Expert -AZ 400 | Microsoft Certified Trainer |
| ➤ Microsoft Certified: Azure Administrator Associate- AZ 104 | Microsoft Certified: Azure Fundamentals -AZ 900 |
| ➤ CompTIA Security+ Certification | |

ACTIVITIES

Certification in Cyber diplomacy, United Nations | Certification in youth advocates project against child sexual abuse (September 2018)
Student volunteer certification in International Conference on Information and Communication Technology and its Application (ICTA 2016).
Certification in women trafficking & child labor eradication foundation (March 2019) | Certificate in Data Processing and information Technology
