## Education

### Calvin University

Dec 2025

*Bachelor, Computer Science*

- **Coursework:** Data Structures & Algorithm, Embedded System, Web Development, Computer Architecture, Operating Systems and Networking, Artificial Intelligence, Machine Learning, Cybersecurity, Database Management System, Cloud Computing, System Infrastructure

## Work Experience

### Sun Life Financial

Jun 2025 - Present

*IT Delivery Intern*

- Developed and optimized Robotic Process Automation (RPA) workflows using Power Automate Desktop (PAD) and API integrations, enhancing the efficiency of claim processing and data validation tasks.
- Designed and deployed a software bot with Power Automate to process Explanation of Benefits (EOB) documents, saving over 13 hours of manual processing per week.
- Collaborated with teammates to transition automation workflows from development to production, ensuring smooth deployment and minimal business disruption.
- Monitored, troubleshooted, and resolved production bot errors, improving overall reliability and maintaining compliance with business workflows.
- Partnered with business stakeholders to analyze requirements and recommend automation solutions, thereby reducing manual workloads and bolstering efficiency.

### SEO Tech Company

Jul 2023 - Aug 2023

*Intern - Web development*

*New York, Remote*

- Developed responsive web interfaces using HTML, CSS, JavaScript, and integrated initial React components to enhance UI/UX consistency.
- Demonstrated proficiency in code testing and quality assurance within an Agile and Scrum environment.
- Engineered a custom application leveraging Google's API to integrate dynamic movie quotes streaming and sharing functionality across multiple platforms and devices.

## Projects

### Python projects

- Developed currency conversion application utilizing Python GUI, seamlessly integrating current exchange rates sourced from authoritative websites.
- Collaborated with a partner to engineer "Meteor Blasts," a stress-relief game for students, utilizing Python's GUI and object-oriented programming paradigms.

### React Project

- Developed and implemented a financial management app using Plaid's API, enabling secure bank authentication and real-time transaction fetching.
- Designed and optimized a PostgreSQL database hosted on Azure, ensuring efficient data storage and retrieval for financial analysis.
- Built dynamic budgeting features with categorized spendings, personalized goals, and smart alerts to help users track and manage their finances.

### AI Project

- Developed and implemented a classifier utilizing TensorFlow and Keras frameworks to accurately identify letters within textual data for a competition in Kaggle.

### C++ Project

- Developed a generic, dynamic array class in C++ that mimics Python's list functionalities, including dynamic resizing, element access via indexing (supporting negatives), appending, inserting, removing, slicing (partial), and operator overloading for list concatenation and output formatting.

## Skills/Qualification

- **Skills & Tools:** Python, Microsoft 365 Office, R., JavaScript, C++, Java, Ruby, Ada, Clojure, HTML, CSS, SQL, React, Flask, Azure, Postgresql, GraphQL, TypeScript
- **Quantitative Coursework:** Data Structures & Algorithm, Embedded System, Web Development, Computer Architecture, Operating Systems and Networking, Artificial Intelligence, Machine Learning, Cybersecurity, Database Management System, Cloud Computing, System Infrastructure
- **Soft Skills:** Curious, Proactive

## **CERTIFICATIONS:**

---

- .Net Full Stack Foundation
- Introduction to Agile and Scrum Methodologies

## **Leadership Experience**

---

### **African Student Association**

**Aug 2023 - Present**

#### *President*

- Led a team of executive board members to plan and execute cultural events, networking nights, and community-building initiatives for African students.
- Facilitated collaboration with other student organizations to promote diversity, inclusion, and cultural awareness on campus.
- Resolved internal team conflicts and strengthened leadership structure, ensuring effective communication and a positive team environment.
