### **Summary**

- Lead .NET Developer with 19+ years of hands-on experience with managing scrum teams and business initiatives for successful completion.
- Technical expertise combining C#, .NET Core, REST API, Microservices, AWS Cloud with good object oriented and SOLID skills.
- Extensive experience with various AWS Cloud services such as Lambda, Batch, SNS, SQS, ALB, API Gateway, Route 53, S3, Aurora Serverless, EC2, EKS, ECS.
- Worked with design patterns such as strategy, command, generic repository, unit of work, pipeline, adapter, specification, and builder with good knowledge of other GOF design patterns.
- Strong experience in Aurora RDS, Elastic Cache, Redis, Entity framework and Microsoft SQL Server.
- Good exposure to web technologies including Kendo UI and Angular.

### **Professional Experience**

#### **Verisk Analytics**

**April 2020 – June 2024**

Technology Lead

- Managed multiple scrum teams to support and deliver business initiatives.
- Head scrum ceremonies, backlog grooming and planning activities with various tech teams and product owners.
- Worked with business teams to define road maps, project planning and estimations.
- Identify budgeting and staffing needs to meet required road maps.
- Successfully executed migration of legacy mainframe applications to AWS cloud.
- Designed and architected generic ETL platform using RESTful microservices to enrich various data ingestion activities.
- Executed DR, Chaos and outage resiliency strategies to reduce downtime.
- Provide design guidance and oversight across teams for effective implementations focused on DRY, separation of concerns, single responsibility and extensibility aligned with best practices and principles.

Environment / Tools: C#, .NET Core, REST API, Redis, Elastic Cache, AWS S3, AWS Lambda, AWS batch, CloudWatch, Splunk, Aurora Postgres, New Relic, Hashi Corp Vault

#### **Brillio LLC.**

**Feb 2013 – April 2020**

Technology Lead

- Requirements gathering, analysis with product owners to aid in necessary Scrum activities.
- Provided design guidance to align best practices and design patterns during code reviews.

- Designed high data volume processes using Pipeline, Adapter, Specification and Builder design patterns utilizing TPL capabilities.
- Worked extensively on store procedure optimizations using DB statistics for IO, time, execution plan analysis and index reorganization.
- Designed data models, and services using entity framework and asp.net web API.
- Created UI screens using Kendo UI MVC, jQuery and prototypical JavaScript classes.
- Setup unit testing framework using Autofac and Moq integration library.

Environment / Tools: C#, ASP.NET MVC 5, Web API, Autofac, Moq, Orchard CMS, Generic Repository, Unit of Work, Entity Framework, Kendo UI MVC, RabbitMQ, AngularJS, jQuery, MS SQL, TFS, TeamCity.

**Citibank**  
Consultant

**May 2012 – Jan 2013**

**Infosys Ltd**  
Senior Software Engineer

**Dec 2010 – May 2012**

**Merrill Lynch**  
Consultant

**May 2009 – May 2010**

**Mphasis, an HP company**  
Senior Software Engineer

**April 2008 – Sep 2008**

**Bitstream Computer Systems**  
Programmer Analyst

**Feb 2005 – Oct 2007**

**Y on Earth Interactive**  
Developer

**May 2003 – Aug 2004**

### **Education**

Full Time Post Graduate Diploma in Software Technology, N.C.S.T.  
Bachelor of Commerce, Mumbai University.
