

JOHN ROBERTSON

Sr. Software Engineer | ASP.NET, React, Angular, Cloud

Melissa, TX US • +1 (469) 656-4374 • johnxrobertsonxten@gmail.com • [linkedin.com/in/john-robertson-bb4694314/](https://www.linkedin.com/in/john-robertson-bb4694314/)

SUMMARY

Senior Full Stack Engineer with over 8 years of professional experience in software development mainly using **ASP.NET, C#, React** and **Angular** stack, with a strong foundation in cloud technologies like Azure and AWS. Delivered more than 15 applications.

SKILL SET

- C#, Python, Javascript, Typescript, C++, T-SQL, HTML, CSS
- ASP.NET Core, .NET Core, Entity Framework, MediatR, Blazor, React, Next.js, Redux, Angular, RxJS
- Azure: Azure Functions, Azure Application Insights, Azure API Management, Azure Data Factory
- AWS: AWS Lambda, AWS Step Functions, AWS S3, AWS CloudWatch, AWS EKS
- SQL Server, MongoDB, Redis, DynamoDB, Cosmos DB, Elastic Search
- Jenkins, Azure DevOps, GitHub Actions, AWS CloudFormation, AWS CodePipeline, CircleCI
- ASP.NET Core Identity, Okta (SSO, MFA), AWS Cognito
- NUnit, XUnit, MSTest, Mocha, Jest, Cypress, Postman, JMeter, SonarQube
- Agile Methodology, Scrum, JIRA, Confluence, Trello
- Terraform, Docker, Kubernetes, Rabbit MQ, Apache Kafka

PROFESSIONAL EXPERIENCE

WestWood, Remote

July 2021 – December 2024

Senior Full Stack Engineer | .NET Core Web API 6, Node.js, Angular, Typescript, Microservice, Agile

- Established a **Microservices** architecture with **.NET Core** and **Node.js**, elevating 20% of the reliability, and boosting maintainability of the application
- Architected and developed a scalable web application using **Angular** and **NgRx**, enhancing data flow management and reducing state-related bugs by 30%, while achieving a 50% improvement in application load time through lazy loading and efficient component design
- Incorporated **Entity Framework Core 6** to streamline database operations, resulting in a 30% reduction in query response time
- Shortened response time with efficient caching techniques in **Node.js**, achieved a 25% reduction in average response time, enhancing user satisfaction and improving overall system performance
- Strengthened web application security and access control using **ASP.NET Core Identity**, leading to a 30% reduction in security incidents
- Introduced a **RabbitMQ** messaging system that reduced message delivery latency by 25% and enhanced overall system performance by 15%
- Exploited **Docker** and **Kubernetes** for **Microservices**, reducing deployment times by 50% and facilitating consistent, daily production updates, 70% upgraded developer productivity, enabling faster feature delivery
- Decreased delivery costs by 25% and increased efficiency by 20% through **Azure Functions** and **Azure Maps**
- Leveraged **ADO.NET** to develop and deploy data-intensive applications on **Azure**, utilizing cloud-based services such as **Azure SQL Database** and **Azure Data Factory** increased efficiency by 10% in data processing

- Built advanced monitoring solutions using **Datadog APM**, **Open Telemetry**, and **Azure Monitor**, implementing distributed tracing for microservices, identifying bottlenecks, and achieving a 25% performance improvement
- Developed secure and scalable infrastructure using **Terraform** for provisioning, resource management, and creating custom IAM roles and policies to ensure robust access control for cloud-based services
- Led API integrations with third-party logistics systems through **Azure API Management**, implementing rate limiting API versioning, and caching to improve scalability and reliability
- Conducted in Unit Testing using **NUnit** in development environment and ensuring application is according to specifications; elevated code quality by 30% and decreased bug resolution time by 40%
- Managed source code with Git version control, integrated **Git** with **Jenkins** to set up **CI/CD** pipelines, and integrated with **JIRA** to monitor commits boosting the speed of deployment 20%
- Mentored 8 junior front-end developers on team in expanding **C#**, **JavaScript**, **React**, and **Angular** skillset

Spiral Scout, San Francisco, CA

February 2017 – May 2021

Software Engineer | ASP.NET, Node.js, React, Angular 6, Next.js, Microservices

- Co-ordinated to 7 projects of varying scales and industries using JavaScript-based frameworks and **ASP.NET Core** for devices including mobile, tablet, and PC
- Converted **AWS** infrastructure to a serverless architecture (**AWS Lambda**) decreasing the cost more than 20%
- Implemented **gRPC** services to enhance inter-service communication, resulting in a 30% increase in system performance and reduced latency in data transfer across microservices
- Led the development of a dynamic e-commerce platform using **React** and **Redux**, implementing a custom state management solution that reduced page load times by 40% and improved overall user experience, resulting in a 15% increase in conversion rates
- Optimized data storage in **AWS DynamoDB**, reducing latency by 50% and improving performance for an e-commerce application with over 1 million daily users
- Designed and implemented a **GraphQL** API for a client project, improving performance and reducing data transfer requirements by up to 50% compared to a traditional **RESTful API** approach
- Configured the application to use **AWS Cognito** for user authentication, leading to a 30% reduction in login time and a 25% reduction in the risk of brute force and **denial-of-service** attacks
- Facilitated in evaluating **Agile SCRUM** and **Test-driven development** methodologies to ensure efficient software development

Aspired, West Palm Beach, FL

March 2015 – February 2017

Backend Engineer | .NET Core, ASP.NET, ADO.NET, Node.js

- Facilitated in developing backend for 2 large-scale projects from scratch and rebuilding 8 projects using **ASP.NET**
- Influenced to developing backend for a large-scale project that work seamlessly across different platforms, including Windows, Mac, and Linux, using **.NET Core** brought more than 300k benefit to the company
- Collaborated with cross-functional teams to ensure seamless integration of the backend with the frontend for all projects, creating **RESTful APIs** using ASP.NET Web API increasing expandability more than 15%
- Executed **unit** and **E2E** testing to ensure quality, resulting in a 25% reduction in post-release issues and a 15% improvement in overall customer satisfaction

EDUCATION

Southern Oregon University

September 2010 – September 2014

Bachelor's degree, Computer Science
