PROFESSIONAL SUMMARY

- **9+ years** of experience in Information Technology with good skills in Reasoning & Analysis, Development, Testing, and Implementation of **JAVA/J2EE Applications**
- **7+ years** of experience in developing microservices using **SpringBoot**, spring JPA, MVC, OpenFeign technologies
- Experience in **core JAVA, Multithreading, Java 8, Collections, Servlets and JDBC**
- Use expertise in Software Development Life Cycle (**SDLC**) and Java technologies to meet the client requirements
- Used **Orchestration container Kubernetes** for load balancing and to schedule the tasks across the computer cluster
- and load balancers for backend API services.
- Good Experience in software configuration management using **SVN, Bitbucket, GitLab** and **Git**
- Good understanding of **SQL, MySQL database**
- Experience working in **Agile-Scrum** methodologies
- Good experience in conducting **proof-of-concept** and developing **prototypes**
- Experience in delivering web solutions for several domains like **Insurance, Banking and PLM**
- Responsible for Analysis discussions with the business, getting signoff, plan, lead, manage and execute a conversion process to move the requirement to development, UAT and Production deployment
- Excellent technical Communication and Interpersonal skills with **strong client facing experience**
- Excellent team player with good analytical, strategic planning and interpersonal communication skills. Highly motivated, enthusiastic and self-starter
- Experienced in **remote collaboration**, working effectively across multiple time zones using Microsoft Teams, Zoom, and other virtual communication tools.

TECHNICAL SKILLS

- **Languages:** Core Java, Java 1.8, Shell Scripting, PowerShell, Servlet, JSP, JSTL, XML, XSD, XSLT, XQuery, YML, JSON, HTML5, CSS3, ReactJs
- **Frameworks:** JDBC, Spring, Spring JPA, Spring Data JPA, Spring Cloud, Spring MVC, Spring Boot, Spring Security, Microservices, Hibernate, RESTful API, OAuth, JUnit, Mockito, Eureka, Hystrix, Feign, Resilience4j, Kafka
- **Web/Application Server:** Apache Tomcat, WebLogic 12 C
- **Tools:** IntelliJ, Eclipse, STS, WINSCP, Putty, Visual Studio, MySQL Workbench, Postman, Swagger, Maven, Mercurial, SVN, GIT, Jenkins, ANT, Maven, TeamCity, Docker, Kubernetes.
- **Databases:** MYSQL, SQL, PL/SQL, Oracle 11g
- **Cloud:** OpenShift, PCF, GCP, AWS
- **Remote Work:** Virtual collaboration via Microsoft Teams and Zoom, Time Management, Document Management, Adaptability to time zones, Remote onboarding & Training

WORK EXPERIENCE

1. Capgemini

Feb 2024 – Dec 2024

Role: Senior Consultant

Project: Client Assets Sourcebook (CASS) Services

Client: Barclays

- Led the migration of 6-7 application from Java 8 to Java 21, optimizing performance, security, and compatibility with modern frameworks and execution speed by 32%
- Designed and implemented scalable application and database components, improving system efficiency and maintainability
- Conducted thorough code reviews and testing, identifying and resolving defects to enhance software reliability
- Refactored legacy codebase, increasing SonarQube code coverage from 30% to 95% and reducing technical debt
- Worked with Apache Kafka for event-driven architecture, including basic setup and integration with microservices
- Managed and tracked Jira tickets, ensuring timely progress and alignment with project timelines
- Facilitated regular team discussions to address challenges and streamline the development process
- Collaborated with cross-functional teams to define system requirements and deliver solutions that exceeded customer expectations, leading to increase in customer satisfaction
- Monitored project milestones and provided updates to stakeholders virtually to maintain alignment on deliverables

2. Synechron

Dec 2022 – Jan 2024

Role: Tech Lead

Project: InView Services

Client: Citi Bank

- Spearheaded the migration of legacy Spring applications to the latest Spring Boot versions
- Architected different project modules from MVC Spring framework to Microservices using Spring boot
- Led the migration of applications from java 8 to java 21, ensuring compatibility and leveraging new features for improved performance by 20%
- Implemented TDD principles, improving unit test coverage and ensuring robust application performance
- Mentored a team of 5 junior developers, promoting best practices in coding, testing, and deployment, which increased team productivity and enhanced code quality
- Designed and optimized RESTful APIs, incorporating modern authentication mechanisms using Spring Security and OAuth 2.0

3. Coforge

Apr 2021 – Nov 2022

Role: Technical Analyst

Project: Regulatory Data Service (RDS)

Client: HSBC Bank

- Development of UI and Backend logic as per client's requirement and integration of APIs with the microservices
- Gained hands-on experience with React.js for building and integrating UI components in full-stack applications.
- Optimized cloud deployment processes using Docker and Kubernetes, reducing deployment time and increasing system scalability

4. Dassault Systemes

Aug 2017 – Apr 2021

Role: Software Developer

Project: TestCenter - Migration of Java Monolithic Project to Spring, Microservice

- Spearheaded the project definition, requirement, analysis, and implementation for the new project design
- Enhanced database performance by optimizing SQL queries and indexing, resulting in a 10% improvement in query response times in large-scale Oracle RDBMS
- Enhanced the applications for using ORM tools such as Hibernate

5. L&T Infotech

Oct 2017 – Jul 2017

Role: Software Developer

Project: MMC Velocity Service Centre

Client: Marsh McLennan

- Coordinating with Clients for Requirement gathering and detail analysis and creation of technical documentation
- Implementation the actual requirements to its full functionality. This includes designing User interface, integrating with the backend databases and integrating with API's
- Analyzing and fixing any QA, UAT, Production issues

EDUCATION

B.E, Information Technology, Savitribai Phule University of Pune, India, 2015
