

EXPERIENCE

Charles Schwab – Tampa, USA

Software Developer

May 2023 – Current

- Worked on sprint planning and execution using Agile methodology in Jira. Developed RESTful microservices with FastAPI, integrated AWS RDS and S3 for data storage, and automated documentation generation using OpenAPI.
- Architected and deployed scalable microservices on AWS, utilizing Kafka for real-time data streaming, and built CI/CD pipelines with GitHub, Jenkins, and AWS, resulting in a **30%** improvement in deployment efficiency.
- Designed reusable Angular 10 components and integrated with REST APIs, improving front-end performance. Developed Spark applications on AWS EMR for big data analytics, loading results into Redshift to enhance insights and analytics.
- Enhanced web application performance by **50%** using Django, MongoDB, and advanced data analytics with machine learning models and dynamic dashboards.
- Executed seamless integration of ReactJS front-end with Python back-end, reducing report generation time by **40%** and improving user engagement by **25%**.

OPTUM(United Health Group) – Hyderabad, India

Software Developer

Jul 2020 – Jul 2022

- Engineered and optimized high-performance RESTful APIs using Python (FastAPI/Django), improving data access speed by **40%** and supporting a global user base of over 1 million customers.
- Optimized SQL and NoSQL database queries (PostgreSQL, DynamoDB), resulting in a **20%** performance boost and significantly faster data retrieval.
- Reduced customer-reported bugs by **35%** through robust testing frameworks (Pytest, unittest) and automated bug detection and resolution processes.
- Developed a comprehensive logging and alert system using AWS CloudWatch and Python logging modules, reducing task completion time by **20%** by efficiently capturing and reporting system activities.
- Enhanced onboarding documentation and automated setup scripts, accelerating new developer onboarding by **30%** and improving overall team productivity.
- Led the design and implementation of innovative software features in Python, resulting in a **20%** increase in user satisfaction.
- Collaborated with cross-functional teams and business stakeholders, aligning development efforts with strategic objectives, which significantly improved overall product quality.

Technical Skills

Programming Languages: Python, JavaScript, HTML, CSS, Java, .NET

Databases: MongoDB, PostgreSQL, MySQL, DynamoDB

Cloud: AWS (Lambda, EC2, S3, RDS, CloudWatch, DynamoDB, API Gateway)

Tools/Frameworks: FastAPI, Django, Flask, ReactJS, NodeJS, Docker, Git, Linux, JIRA, Rally

Certifications & Training: AWS Certified Cloud Practitioner

EDUCATION

University Of South Florida - Tampa, USA

May 2024

M.S in Computer Science : GPA: **3.83**

Coursework: Machine Learning, Data Mining, Algorithms, Operating systems, Computer Architecture, Security and Privacy in ML, Human-Computer Interaction

Osmania University - Hyderabad, India

July 2020

B.E in Computer Science : GPA: **3.8**

ACADEMIC PROJECTS

XV6- Operating Systems Project

- Enhanced the xv6 operating system by implementing advanced schedulers and filesystem features such as lseek, symbolic links, double indirect blocks, and extent-based files, improving system efficiency and functionality.
