SUMMARY

- Over 3 years of experience as a Software Engineer specializing in the design, development, testing, and deployment of object-oriented and web-based applications using technologies such as React, Node.js, Express, and Java/J2EE.
- Proficient in various software development methodologies, including Agile and Waterfall, with a focus on all phases of the development lifecycle: requirement analysis, design, coding, testing, and deployment.
- Designed and implemented custom API solutions with the Spring framework to meet specific business requirements and improve user interaction.
- Experienced in developing and integrating RESTful Web Services and APIs, with familiarity in MVC architecture and Redux-Promise for efficient data handling.
- Actively participated in daily stand-ups and technical meetings to review product updates, address customer feedback, and provide troubleshooting solutions.

SKILLS

- **Programming Languages:** Java, JavaScript, Python, C++
- **Web Technologies:** HTML5, CSS3, JavaScript (AJAX, JSON, jQuery), RESTful APIs and Services, Figma
- **Frameworks:** React.JS, Node.JS, Bootstrap, Express.JS, Spring, Spring Boot, Hibernate
- **Cloud Technologies:** Amazon Web Service (EC2, S3, RDS, Lambda)
- **Database:** MySQL, MongoDB, PostgreSQL, Redis
- **Software Tools:** JUnit, Mockito, Git, Jira, Docker, Postman, GitHub, Docker & Kubernetes
- **Methodologies:** Agile, Waterfall, SDLC

RELEVANT EXPERIENCE

- **Metlife, USA | Software Engineer** Sept. 2023 - Current
 - Developed application service components and configured beans using Spring; created Hibernate mapping files and generated database schema.
 - Utilized React hooks in function components to optimize code efficiency and improve application performance.
 - Upgraded a critical server-side solution through automation and code optimization, achieving a 27% improvement in process speed and security.
 - Developed and integrated action classes, form beans, and JSP pages to facilitate seamless interaction within the application.
 - Enhanced MySQL database performance by modifying queries, functions, triggers, and stored procedures, leading to more efficient data processing.
 - Achieved cost savings of over \$200,000 by streamlining the development process, automating unit testing, and refactoring code, contributing to overall project efficiency.
- **Magna Infotech, India | Software Engineer** Oct. 2019 - Dec. 2021
 - Developed the presentation layer and GUI framework using JSP, HTML, and JavaScript, implementing client-side validations to enhance user experience.
 - Modeled JSON data from the database and created request handlers to efficiently parse and transmit relevant data to the client side.
 - Optimized web applications and participated in troubleshooting and debugging to resolve issues and improve performance.
 - Designed and implemented various front-end screens using React.js, incorporating components from NPM and utilizing the Redux library for state management.
 - Gained experience in AWS and Kubernetes for container deployments, creating isolated environments for development teams.
 - Developed the backend using Node.js and Express.js, integrating Axios to retrieve results from multiple search APIs.
 - Conducted extensive code reviews through GitHub pull requests, enhancing code quality and facilitating peer meetings for collaborative improvements.

EDUCATION

- **Virginia Polytechnic Institute and State University** Jan. 2022 - Dec. 2023
Masters in Computer Science and Application Blacksburg, USA
- **Gujarat Technological University** Aug. 2017 - May 2021
Bachelors in Information Technology Surat, India
