

Manipriya Panduri

Senior Cloud/DevOps Engineer

manipriyapanduri@gmail.com | +1 (469)-927-2655 | linkedin.com/in/manipriyapanduri

Professional Summary:

Highly skilled **Senior Cloud & DevOps Engineer** with over 7+ years of experience in designing and automating scalable cloud infrastructures across **AWS, Azure**, and hybrid environments. Adept at leveraging cutting-edge technologies like **Terraform, Kubernetes**, and **Ansible** to streamline deployments, optimize resource management, and improve system reliability. Proven track record of reducing deployment cycles, enhancing monitoring systems, and implementing secure, compliant cloud architectures. Passionate about fostering innovation and mentoring teams to adopt best practices in DevOps and cloud engineering.

Education

Master of Computer Science

Texas A&M University Kingsville, 2019

Bachelor of Computer Science

JNTUK, 2014

Skills

- **Cloud Platforms:** AWS, Azure, GCP
 - **Infrastructure Automation:** Terraform, Ansible, CloudFormation, ARM Templates.
 - **CI/CD Tools:** Jenkins, GitLab, Azure DevOps, GitHub Actions, VSTS (Azure Devops).
 - **Containerization & Orchestration:** Kubernetes, Docker, Helm, AKS, EKS, OpenShift.
 - **Programming/Scripting Languages:** Python, Bash, PowerShell, YAML.
 - **Monitoring & Logging:** Prometheus, Grafana, ELK Stack, Splunk, CloudWatch, Dynatrace.
 - **Security & Compliance:** Hashi Corp Vault, SOC 2 Implementation, OAuth, JWT.
 - **Version Control:** Git, GitHub, Bitbucket.
 - **Database Management:** AWS RDS, Azure SQL.
 - **Build tools:** Ant, maven, GRADLE.
 - **Web servers:** Apache, Tomcat, JBoss, Nginx.
 - **Operating Systems:** Linux, Windows.
-

Professional Experience

Senior Kubernetes/Linux Deployment Engineer

Google-WWT (Worldwide Technology), Dallas, TX | August 2024 – Present

- Deployed and managed **on-prem Kubernetes clusters**, ensuring high availability and fault tolerance for mission-critical applications.
- Deployed and configured **Bootstrapper** servers for initializing **on-prem Kubernetes clusters** and facilitating multi-zone bootstrapping.
- Integrated and managed hardware solutions, including **NTAP (NetApp), Cisco, Thales, and PAN (Palo Alto Networks)**, to meet complex enterprise requirements.
- Developed automated solutions for common **development and operational tasks**, enhancing efficiency and reducing manual interventions.
- Implemented robust monitoring frameworks using **Prometheus and Grafana**, ensuring proactive system performance tracking and issue remediation.
- Worked closely with software and data engineering teams to implement sustainable solutions and streamline **DevOps workflows**.
- Deployed and managed containerized applications using **Docker, Kubernetes, and Helm**, enabling consistent and scalable environments.
- Created end-to-end **CI/CD pipelines** leveraging **Jenkins, ArgoCD, and GitOps** practices to promote seamless integration and deployment.

Senior Cloud/DevOps Engineer

AT&T, Dallas, TX | May 2024 – August 2024

- Architected and deployed robust **Kubernetes (AKS/EKS)** environments, leveraging **NGINX Ingress** for seamless routing and scalability.
- Automated multi-cloud infrastructure provisioning using **Terraform**, improving deployment efficiency by 35%.
- Developed and maintained scalable **CI/CD pipelines** with **Azure DevOps**, reducing deployment cycles by 30%.
- Enhanced operational monitoring with **Prometheus** and **Grafana**, reducing mean time to resolution (MTTR) by 40%.
- Collaborated with cross-functional teams to ensure secure and compliant **cloud architectures** aligned with business goals.

Senior DevOps Engineer/Site Reliability Engineer

Deloitte, Remote | October 2023 – April 2024

- Designed and implemented **GitOps workflows** using **ArgoCD**, ensuring automated and consistent application deployments.
- Designed and operated applications in public cloud environments, focusing on scalability and security with AWS services like EKS, RDS, and CloudWatch.
- Migrated on-premises legacy systems to **Azure Private Cloud**, reducing costs by 20% and improving scalability.
- Built custom **Prometheus metrics** and interactive **Grafana dashboards**, enhancing system reliability and monitoring.
- Streamlined API deployment pipelines with secure **Apigee** configurations, improving interoperability.
-

Software (Azure Cloud) Engineer

U.S. Bancorp Investments Inc., Minnesota, MN | November 2022 – October 2023

- Automated deployment of microservices with **Terraform** and **Azure Pipelines**, reducing deployment effort by 40%.
- Secured data with **Azure Private Endpoints** and network security policies, achieving SOC 2 compliance.
- Optimized application performance monitoring with **App Insights**, **Azure Monitor**, and **Log Analytics** dashboards.
- Created Clusters using **Kubernetes** and worked on creating many pods, replication controllers, replica sets, services, deployments, labels, health checks and ingress by writing **YAML files**.
- Developed **Python Modules** for **Ansible** Customizations.
-

Azure DevOps Engineer

Commonwealth Wealth Financial, Waltham, MA | July 2021 – November 2022

- Automated infrastructure deployment using **Terraform** and **Ansible**, ensuring zero-configuration drift.
- Created multi-staged **CI/CD pipelines** in **Azure DevOps**, optimizing release cycles.
- Developed Grafana dashboards for resource monitoring, providing real-time visibility into system health.
- Primarily responsible for implementing containerized based applications on Azure Kubernetes by using **Azure Kubernetes service (AKS) Kubernetes Cluster**, which are responsible for cluster management.
- Responsible for monitoring the health and performance of the **CI/CD pipelines**, as well as providing the support for the infrastructure
- Implemented **Ansible** to manage all existing servers and automate the **build/configuration** of new servers.

Azure Cloud Engineer

Optum, Hartford, CT | August 2020 – July 2021

- **Designed** scalable Azure Databricks pipelines for big data analytics, integrating with **Azure Storage and SQL Databases**.
- Worked on **Jenkins CI/CD pipelines**, automated application related data in docker images, versioned docker images in **Jfrog docker** registry using JQL, deployed services to **AKS using helm**, groovy scripts, and Jenkins files.
- Automated work process using **CI/CD tools Jenkins, Docker, JFrog Artifactory, git hub**.

- Managed **AKS** cluster node pools, based on different client loads, used **Splunk, Datadog** and app insights for alerts, reports, synthetics and infrastructure metrics.
- Written automation scripts in **Groovy, Python, Bash and PowerShell**.
- **Implemented** Keda functionality through azure functions and azure blob storage to auto trigger and redeploy applications in **Kubernetes** based on custom client requirements

DevOps/Cloud Engineer

Microsoft, Redmond, WA | February 2020 – August 2020

- Automated CI/CD pipelines with **Jenkins**, integrating build, test, and deployment processes across environments.
- Conducted stress tests for **ARO (Azure Red Hat OpenShift)** and **AKS clusters**, leveraging **Python** and **PowerShell scripts**.
- Migrated on-prem applications to **Azure Cloud**, configuring secure VNets and subnets.
- Implemented real-time monitoring solutions with **Prometheus** and **Grafana** for infrastructure health insights.

Linux/DevOps Engineer

AXIS Bank Pvt Limited, Hyderabad, India | May 2014 – December 2015

- Deployed and managed applications in the **AWS environment**, leveraging services like **EC2, S3**, and **RDS**.
- Automated configurations using **Ansible playbooks**, reducing deployment time by 25%.
- Built CI/CD pipelines with **Jenkins**, integrating **Maven** for build automation and deployment.
- Developed custom monitoring solutions using **Nagios** for proactive resource management.

Certifications

- AWS Certified Solutions Architect – Associate | 2022
 - Azure Certified Solutions Architect – Expert | 2023
 - Certified Kubernetes Applications – Developer | 2024
 - Azure Administrator Associate | 2024
-

Projects:

Hybrid Cloud Automation:

- Automated multi-cloud infrastructure provisioning using **Terraform**, reducing provisioning time by 50%.
- Deployed scalable and secure Kubernetes environments tailored to client-specific needs.

Kubernetes Monitoring System:

- Designed a real-time monitoring stack with **Prometheus** and **Grafana**, enhancing uptime and reducing response time by 25%.
-

Highlights

- Proven ability to deliver projects under tight deadlines while maintaining operational excellence.
- Strong mentorship capabilities, having trained junior engineers in DevOps best practices.
- Recognized for innovative solutions that reduced operational costs by 20%.
