

Monika Gunasekhar

Java Full Stack Developer

☎ (513) 372-5266

✉ monikagunasekhar1220@gmail.com

Experienced **Full Stack Developer** with over **6 years** of expertise in **Java, Spring Boot, Angular, AWS, and microservices architecture**. Skilled in building scalable, cloud-based applications and implementing **CI/CD** pipelines using **Docker, Kubernetes, and Jenkins**. Strong background in **Test Driven Development (TDD)** and delivering high-quality, maintainable software solutions in **Agile** environments. Passionate about integrating front-end and back-end technologies to create seamless user experiences.

Education

Master of science- Computer Engineering
Wright State University, Ohio, USA

Professional Summary

- Over **6+ years** of experience in **Full Stack Development**, specializing in **Java, Spring Boot, Angular, AWS, Hibernate, and Microservices**.
- Proficient in building **cloud-based solutions** with AWS services like **Lambda, S3, RDS, DynamoDB, and CloudFormation**.
- Extensive experience in **microservices architecture**, building scalable and performant applications with **Spring Boot** and **Hibernate**.
- Strong expertise in **CI/CD** pipelines using **Jenkins, Git, Docker, and Kubernetes** for automated deployments and containerization.
- Skilled in **Angular** for front-end development, integrating with backend services through **RESTful APIs**.
- Adept at **Test-Driven Development (TDD)** and delivering high-quality software through automated testing and continuous integration practices.
- Excellent collaboration skills and ability to work effectively in **Agile** environments, delivering solutions with multiple stakeholders.
- Passionate about mentoring junior developers and ensuring continuous learning and team growth.

Technical Skills

- **Languages:** Java 8/11, TypeScript, HTML5, CSS3, JavaScript
- **Frameworks & Libraries:** Spring Boot, Angular, Hibernate, RESTful APIs, Microservices, Spring Security
- **Cloud Technologies:** AWS (Lambda, S3, RDS, DynamoDB, CloudFormation, EventBridge)
- **Databases:** MySQL, PostgreSQL, MongoDB, DynamoDB, JPA
- **DevOps & CI/CD:** Jenkins, Docker, Kubernetes, Git, GitHub Actions, Maven, Gradle
- **Tools:** Postman, IntelliJ IDEA, VS Code, JUnit, Mockito, Gradle, Maven
- **Development Practices:** Test Driven Development (TDD), Agile/Scrum
- **Version Control & Collaboration:** Git, GitHub, Bitbucket, Jira

Professional experience

Java Full Stack Developer

Bath and Body works, Inc., Columbus, OH | Apr 2024 – Dec 2024

- Developed **microservices** using **Spring Boot** and **Java 11** to support the platform's growing needs and scalability.
- Integrated front-end interfaces with backend services using **Angular** and **REST APIs** for dynamic web applications.
- Implemented cloud solutions with AWS services, including **Lambda, S3, and RDS**, to provide a scalable, secure, and high-performance infrastructure.
- Led **CI/CD** pipelines using **Jenkins** and **Docker**, ensuring seamless deployment of services to production.
- Participated in **Agile** methodologies, collaborating with cross-functional teams for efficient product development and delivery.
- Led discussions on architecture design decisions, explaining technical concepts to non-technical stakeholders and ensuring alignment with business operations.

Java Full Stack Developer

Huntington Bancshares., Columbus, OH | May 2023 – Mar 2024

- Designed and developed **microservices** using **Spring Boot** and **Java 11** for a scalable and maintainable application architecture.
- Built dynamic web interfaces using **Angular** and integrated them with backend APIs to ensure a responsive and user-friendly experience.
- Worked on AWS cloud services like **S3, CloudFormation, and DynamoDB** to enhance system performance and reduce costs.
- Developed and maintained **CI/CD** pipelines for continuous delivery using **GitHub Actions** and **Jenkins**.

- Performed **TDD** to ensure code quality, unit testing, and smooth integration with the development environment. Designed and maintained **CI/CD pipelines** using **GitHub Actions**, ensuring efficient delivery pipelines and automated deployments.
- Delivered production-level solutions in collaboration with cross-functional teams, adhering to **Agile** methodologies and best practices.
- Conducted code reviews, ensuring the adoption of best practices and design standards for secure, scalable cloud applications.

Java Full Stack Developer

Accenture (Client: ALDI), Mumbai, India | Nov 2021 – Nov 2022

- Developed cloud-based **microservices** with **Java Spring Boot**, incorporating **AWS services** such as **S3**, **DynamoDB**, and **Lambda** for scalable architectures.
- Integrated **Angular** with **Spring Boot** APIs, improving the user experience and ensuring seamless communication between front-end and back-end.
- Worked with **AWS** services, including **RDS**, **Lambda**, and **S3**, to optimize cloud infrastructure and scale applications.
- Led **CI/CD** efforts using **Docker** and **Kubernetes**, automating the deployment and scaling of microservices.
- Mentored junior developers and conducted **code reviews** to ensure high standards of software development.
- Collaborated in **Agile** sprints, translating business requirements into technical solutions and ensuring deliverables met client expectations.
- Communicated technical decisions effectively to non-technical stakeholders, ensuring transparency in the development process.

Senior Developer

Wipro (Client: Lloyds Banking Group), Mumbai, India | Jun 2019 – Nov 2021

- Developed robust **Java** and **Spring Boot** microservices to handle high-performance and scalable business processes.
- Worked with **Hibernate** for ORM-based data access and optimized database interactions for high-volume transaction systems.
- Designed and implemented **RESTful APIs** for communication between microservices and external systems.
- Integrated **AWS** services like **CloudFormation** and **S3** to automate infrastructure provisioning and deployment.
- Participated in **Agile** sprints, collaborating with cross-functional teams to meet project milestones and client requirements.
- Integrated **Git** and **GitHub Actions** to create automated workflows for **CI/CD**, improving efficiency in development and deployment processes.
- Collaborated with cross-functional teams in **Agile** frameworks, ensuring smooth communication and timely delivery of projects.

Java Developer

Nicholas Piramal India Ltd., Mumbai, India | Jun 2017 – May 2019

- Developed backend services using **Java** and **Spring Boot** to create business logic for internal applications.
- Integrated **RESTful APIs** with external systems, enabling seamless data exchange between services.
- Contributed to **Hibernate** ORM configurations and database optimization for improved system performance.
- Worked closely with the DevOps team to implement **CI/CD** practices using **Jenkins** and **Git** for streamlined development workflows.
- Participated in **code reviews** and maintained high-quality code standards across the development team. Worked with **Git** for version control and **GitHub Actions** to automate deployment pipelines, ensuring continuous integration.
- Assisted in the design and implementation of **REST APIs**, ensuring smooth integration with external applications.
- Conducted thorough **unit and integration testing** to ensure code quality, using tools like **Postman** for API testing.
- Collaborated closely with team members to troubleshoot and resolve technical challenges, ensuring high-quality software delivery.
