Forney, TX 75126 | +1 206-395-9422 | snatnael116@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Database Administrator with 10+ years of experience managing enterprise SQL Server environments across finance, airlines, healthcare, and manufacturing. Specializes in high availability, disaster recovery, performance tuning, and secure migrations to AWS and Azure. Skilled in automation with PowerShell and T-SQL, monitoring with enterprise tools, and enforcing compliance controls. Recognized for delivering cost savings, improving service resilience, and supporting mission-critical applications with optimized database solutions.

SKILLS

Database Platforms & Tools: SQL Server (2008–2022), MySQL, Oracle basics, PostgreSQL, SQL Profiler, SSMS, Azure Data Studio, SQL Developer

Cloud & Virtualization: AWS (EC2, RDS, RDS-Custom, S3, CloudWatch), Azure SQL DB, Azure Managed Instance, Azure Virtual Machines, VMware, Hyper-V, Docker, Kubernetes (for DB containers)

High Availability & Disaster Recovery: Always On Availability Groups, Windows Server Failover Clustering (WSFC), Database Mirroring, Log Shipping, Replication (Transactional, Merge, Snapshot), Backup/Restore Strategies, Commvault, Veeam

Performance Monitoring & Tuning: SolarWinds DPA, SQL Sentry, IDERA, Redgate, Query Store, Extended Events, Execution Plans, Index Optimization, Wait Statistics, Performance Baselines

Scripting & Automation: T-SQL, PowerShell, Python, Bash, Automation Runbooks, CI/CD Pipelines (Azure DevOps, Jenkins), Git, Ansible (DB automation)

BI, ETL & Reporting: SSRS, SSIS, Power BI, Tableau, Cognos, Informatica, Data Warehousing, Data Modeling (ERWIN, Lucidchart), ETL Pipeline Design

Collaboration & ITSM: ServiceNow, JIRA, Confluence, Trello, Slack, Microsoft Teams, Agile/Scrum Methodologies, ITIL Framework, Documentation & Knowledge Management

EXPERIENCE

Sr. Infrastructure Engineer / Senior Database Administrator

Tyson Foods – Springdale, AR | Mar 2023 – Aug 2025

- Designed and maintained Always On Availability Groups and multi-node Windows Failover Clustering to ensure 99.99% uptime for mission-critical applications.
- Led data center exit project by migrating on-premise SQL workloads to AWS RDS, RDS-Custom, and Azure SQL Managed Instance, reducing infrastructure costs and improving scalability.
- Automated SQL Server installations, patching, and maintenance jobs using PowerShell, lowering manual effort by 40 percent and ensuring consistent deployments.
- Implemented Group Managed Service Accounts (GMSA) and Managed Service Accounts (MSA) to strengthen security and streamline identity management.
- Consolidated SQL Servers by decommissioning legacy systems and migrating databases to optimized clusters, reducing hardware footprint by 25 percent.
- Created partitioning and archiving solutions for large data tables, improving query performance by 30 percent and optimizing storage utilization.
- Developed real-time dashboards in Power BI integrated with ServiceNow to track performance, incidents, and KPIs for IT leadership.
- Monitored performance with SQL Sentry, SolarWinds DPA, and Redgate to proactively address deadlocks, blocking, and plan regressions before service impact.
- Standardized Commvault backup and recovery strategies with routine testing, achieving strict RPO and RTO compliance across environments.

Senior Database Administrator

U.S. Bank – Minneapolis, MN | Dec 2019 – Dec 2022

- Engineered multi-availability zone SQL Server 2019 Always On deployments in AWS, achieving high availability and disaster recovery readiness.
- Automated maintenance routines and backup verification with PowerShell and T-SQL scripts, improving reliability and reducing operational errors.
- Implemented transactional replication to support reporting environments, offloading analytical queries without impacting OLTP performance.
- Managed SQL Server upgrades from 2014 to 2019 with minimal downtime, ensuring data integrity and business continuity.

- Enforced security through role-based access control, encryption, and auditing, aligning with SOX compliance requirements.
- Improved query performance by analyzing execution plans, indexing strategies, and query store insights, reducing execution times by 40 percent.
- Configured log shipping and database mirroring to extend disaster recovery coverage, validating failover and fallback through regular DR exercises.
- Built standardized maintenance plans for backups, index optimization, and consistency checks across all environments.
- Integrated monitoring alerts into ServiceNow for real-time incident management and faster MTTR.

Senior Database Administrator

Delta Air Lines – Atlanta, GA | Jan 2017 – Nov 2019

- Managed SQL Server Always On Availability Groups and multi-node failover clustering for airline reservation and operational systems, maintaining business continuity.
- Designed disaster recovery strategies with full, differential, and transaction log backups, tested point-in-time restores, and documented recovery procedures.
- Created stored procedures, triggers, and functions to standardize application logic and improve developer efficiency.
- Implemented database mirroring and log shipping to ensure redundancy and reduce risk of data loss.
- Enhanced system performance by restructuring indexes, applying filtered indexes, and optimizing query logic, improving response times by 30 percent.
- Administered security at instance and database level with audits, encryption, and compliance-driven access reviews.
- Conducted proactive space and capacity planning for database growth, optimizing file placement and minimizing autogrowth events.
- Coordinated quarterly failover tests with cross-functional teams, validating readiness and identifying gaps in recovery processes.
- Tuned workload performance using SQL Profiler and Extended Events to detect bottlenecks and blocking chains.

Junior Database Administrator

Universal Health Services – King of Prussia, PA | Sep 2014 – Jan 2017

- Upgraded legacy SQL Server environments from 2005/2008 R2 to 2012/2014, modernizing hospital IT infrastructure.
- Designed ER models and physical data structures to support application enhancements and reporting.
- Automated backups, DBCC checks, and health reports, reducing manual tasks and ensuring 24x7 uptime.
- Collaborated with developers to optimize T-SQL queries, implementing indexing and query rewrites for faster execution.
- Built and deployed SSRS reports and ad-hoc queries, improving visibility into healthcare operations.
- Implemented disaster recovery solutions with Commvault and point-in-time restores to safeguard patient data.
- Detected and resolved blocking and deadlock issues, enhancing overall system stability.
- Supported HIPAA compliance by securing sensitive databases with auditing, access restrictions, and encryption.
- Assisted with performance monitoring and system tuning for clinical applications.

EDUCATION

Southern New Hampshire University (SNHU) – Online

Certificate, Data Analytics | May 2025

Addis Ababa University – Addis Ababa, Ethiopia

B.S., Mechanical Engineering | Jul 2016

CERTIFICATIONS

- Microsoft Certified (Exam 70-462): Administering Microsoft SQL Server Databases
- Microsoft Azure Administrator (AZ-300)
