

NEHALI CHALODIYA

Java Full Stack Developer

Phone: +1(469)386-9302 | Email: nehalichalodiya1@gmail.com | Dallas, Texas.

SUMMARY:

- 7+ years of experience in software development, developing and deploying distributed object applications, **web-based multi-tier enterprise solutions, and client-server applications** using **JakartaEE** technologies. Throughout my career, I have been involved in all phases of the **Software Development Life Cycle (SDLC)**, utilizing methodologies such as **Agile, TDD, and Waterfall**.
- I bring significant expertise in **front-end** and **back-end** development, including extensive work with **HTML/HTML5, CSS/CSS3, JavaScript, jQuery, AngularJS, ReactJS, and Microservices**.
- I am also experienced in configuring and managing version control with tools like **GitHub, Gitlab, Bitbucket and Git**.
- My proficiency extends to databases such as **Oracle, MySQL, DB2, MS-SQL, and PostgreSQL**, where I have **utilized JDBC, SQL, and HQL for CRUD** operations.
- I have deep expertise in **JakartaEE**, including **Java, Servlets, JSP, Spring Framework, Spring Frame Boot Web Services, RESTful Web Services, gRPC, and JAX-WS**, along with the Spring ecosystem (**Spring MVC, Spring Boot, Spring Cloud, Spring Security, etc.**).
- I am well-versed in **Object-Oriented Programming (OOP) principles**, with hands-on experience in **UML design**, and have worked extensively with **ORM frameworks** like **Hibernate and JPA, Spring IOC and AOP**.
- I am also highly proficient in developing cloud-based solutions, specifically with **AWS** services like **EC2, S3, AMI, CloudWatch, and Faregate**.
- Additionally, I have worked with various application servers such as **AWS Lambda, Google Cloud Functions, Docker, Kubernetes**, and have been a key player in **delivering scalable, component-based, and test-driven enterprise applications**.

Technical Skills.

Programming Language	Java, C++, Python, SQL and PL/SQL.
Java Technologies	JSE, Spring Data JPA, Hibernate, Thymeleaf, RESTful APIs, JSF, Axios, Quarkus, Micronaut, RabbitMQ, JSTL, HashiCorp Consul.
Web Technologies	HTML5, CSS3, JavaScript, Angular, Node JS, React JS, Bootstrap, JSON, GraphQL, JSON Schema, Fetch API, jQuery, JSON, Typescript, VueJS.
Webservices	GraphQL, Spring WebFlux, Quarkus, JAX-WS, OpenAPI, gRPC, SAAJ, Jackson, Gson, StAX, Cloud-Native Microservices with Kubernetes, Docker, Spring Cloud, Istio, Helm, Jakarta XML Binding.
Web Servers/Application	Kubernetes, Docker, WebSphere, Kubernetes, Docker, JBoss, Spring Boot, Quarkus, PostgreSQL, MySQL 8+, MariaDB, Amazon Aurora, Google Cloud SQL, Cassandra.
Application Frameworks and modules	Spring WebFlux, Angular, VueJS, Spring Framework, MVC, Spring Boot, Spring Cloud, Batch, Core, Hibernate, Spring JDBC, Spring Security.
Database	Oracle, MySQL, SQL Server, MongoDB, Cassandra DB, Couch DB, Postgres DB.
IDEs	NetBeans, Eclipse, IntelliJ, RAD. Xcode, BlueJ.
Version Control System	CVS, SVN, Bamboo, GIT, Fossil, Mercurial, Microsoft Azure Repos.
Tools Viewer	Junit, Log4J, DOM, Selenium, Arquillian, Cucumber.

Cloud Technologies	AWS (Elastic Search, EC2, S3, EMI, ELB, Dynamo DB), Docker, RabbitMQ, PCF, IBM Cloud, Red Hat OpenShift, GCP.
Other Tools	MS Vision Professional, StarUML, Code Quality, Code Coverage, API Management and Testing,

Educational Qualification:

Bachelor of Business Administration (BBA) Sarvepalli Radhakrishnan University (2015-2018)

EXPERIENCE:

LIGER INFOTECH, Surat, Gujarat.

May 2024 – Till Date

Role: Sr. Java Developer

Responsibilities:

- Led the design, development, and optimization of core **Java and J2EE applications**. Utilized Agile methodologies for software development life cycle (SDLC), covering requirements gathering, analysis, development, and testing.
- Developed web-based applications using **Angular 8/9, Node.js, Typescript, JSP, HTML5, CSS3, JavaScript, jQuery, and Bootstrap**.
- Implemented single-page applications (SPAs) with **Angular 8/9** and leveraged **Covalent** for UI frameworks.
- reusable Angular components, directives, and services for a scalable, maintainable architecture.
- Developed and maintained **RESTful** and **SOAP** web services using **Spring Boot, Spring MVC, JAX-WS, and JAX-RS**.
- Leveraged **Java 8/11** features like **Lambda Expressions, Stream API, and Method References** for efficient code.
- Implemented **Microservices** architecture using **Spring Boot**, integrating **RabbitMQ, Kafka, and JMS** for asynchronous communication.
- Migrated monolithic applications to microservices and serverless architecture on **AWS, Google Cloud Platform (GCP), and PCF**. Designed and deployed serverless applications using **AWS Lambda, API Gateway, S3, and DynamoDB**.
- Utilized **Docker** and **Kubernetes** for containerization and orchestration of microservices, ensuring smooth deployment pipelines.
- Managed databases like **Oracle 11g/12c, PostgreSQL, MongoDB, and DynamoDB** for CRUD operations and integrations.
- **Utilized Apache JMeter** for load testing, identifying performance bottlenecks, and conducting stress and scalability tests.
- Enhanced application performance and scalability by configuring **Nginx, Apache Tomcat, and WildFly** (formerly JBoss) servers for optimized resource management and high availability in cloud-native environments.
- Applied modern load-balancing techniques and fine-tuned server configurations to ensure efficient utilization of system resources under heavy traffic. Integrated **Jenkins, Git, and Maven** for **Continuous Integration and Continuous Deployment (CI/CD)**. Automated deployment pipelines and utilized **OpenShift** and **Kubernetes** for container orchestration.
- Applied security measures like **OAuth 2.0** and **JWT** for **RESTful API authentication**.
- Developed secure solutions for data handling and access control using **Spring Security**.
- Wrote extensive unit and integration tests using **JUnit, Mockito, Jest, and Cucumber**.
- Followed **Test Driven Development (TDD)** methodology for robust software design and testing.
- Developed **Python** code for REST API consumption using **Flask**.
- Designed, developed, and documented **RESTful APIs** using **Swagger** for efficient, standardized API development and testing.
- Significant expertise in all phases of complex Web UI using **HTML/HTML5, JavaScript, CSS/CSS3, XML, jQuery, Angular JS, React JS, Microservices**.
- Integrated **GraphQL** for optimized data querying and backend-to-frontend communication.
- Worked in cross-functional **Agile** teams, participating in sprint planning, retrospectives, and code reviews.
- Applied **Scrum** practices for efficient project management and timely delivery.
- Knowledge of security protocols like **OAuth2, JWT, SSL, ASP** and how to implement them in Java-based applications.

- Familiarity with **OWASP** security best practices, **SQL injection prevention**, and securing applications against common vulnerabilities.
- Knowledge of essential libraries such as **Apache Commons**, **Guava**, and logging frameworks like **SLF4J** and **Logback**.
- Experienced in **AWS** Cloud platform and its features which includes **EC2, S3, AMI, AWS CloudWatch, AWS Fargate**.
- Also, worked on End-to-end deployment ownership for projects on Amazon AWS.
- **Kafka/RabbitMQ** Involved in integrating **messaging systems**, ensuring the flow of messages between services and handling **asynchronous** processing.
- **Infrastructure as Code (IaC)** Experience with tools like **Terraform, Ansible, or CloudFormation** to manage cloud infrastructure.
- Experience using **Spring MVC, Spring Boot, Spring Cloud, Spring DAO, Spring Data, Spring IOC, Spring Annotations, Spring AOP, Spring Transactions and Spring Security**.
- Implemented core Java code with Data Structure and Algorithms to the back end.
- Responsible for developing Python code for consuming **RESTful** using Flask.
- Created **camel Routes** to transfer data from one End point to another End Point.
- Converting existing AWS infrastructure to serverless architecture (AWS Lambda) deployed in AWS Cloud Formation.
- Used multithreading on **UI** as well as on backend side.
- Programming on the core application development using **multi-threading** that combines **Hibernate** and **Spring**.
- Developed **Object-Relational (O/R) mapping** using **Hibernate**.
- Writing Unit Test **Cases using Junit, Jest, and Cucumber**. Responsible for Load Testing using **Apache JMeter**.
- Designed and developed Maven scripts to build and deploy the application in **JBoss**.
- Involved in Load **balancing/Tuning/Clustering** for **IBM WebSphere** Application Server using Deployment Manager Network Deployment.
- Installed application on AWS EC2 instances and configured the storage on S3 buckets.
- Worked closely with **risk management, compliance, and IT security** teams to align Actimize solutions with regulatory requirements and organizational security policies.
- Migrating application functionality in sending emails from **MySQL** to **NoSQL** database implemented by **Google Cloud Platform (GCP)** which handles Big Data.
- Highly proficient in using frameworks like **Hibernate, Spring** and **Design Patterns** such as **Front Controller, Data Access Object (DAO), and Singleton** for executing multi-tier, highly scalable, component-based, services-driven, test-driven enterprise applications.

Technologies Used: Java (8/11), JavaScript (ES6+), TypeScript, Python, SQL, NoSQL, Shell, Scripting, Angular 8/9, React JS, jQuery, Bootstrap, HTML5, CSS3, AJAX, Node.js, Spring Boot, Spring MVC, J2EE, Flask, Hibernate, AWS (EC2, Lambda, S3, DynamoDB, API Gateway), GCP, Kubernetes, Docker, PCF, Oracle, PostgreSQL, MongoDB, Cassandra, DynamoDB, Jenkins, Maven, Gradle, Docker, Kubernetes, OpenShift, AWS CloudFormation RabbitMQ, Kafka, JMS, AMQP, Git, SVN, ClearCase.

TECHNOAPP SOLUTION PVT. LTD. Surat, Gujarat.

July 2018 – April

2024

Role: Java Developer

Responsibilities:

- Utilized **Node.js** (Express JS) for improved code organization and efficiency.
- Implemented **JEE standards** and **MVC architecture** with **Spring Framework** for seamless application structure.
- Developed **cross-browser/platform HTML, CSS, and JavaScript** to ensure responsive, well-structured UIs.
- Created **Spring MVC controllers** and **REST services** to integrate with internal and external APIs.
- Built a **customized ETL tool** to migrate data from MS SQL Server to Couchbase, transforming data into JSON format for web services.
- Implemented **form validation** using **JavaScript** and **jQuery**, including custom validation controls.
- Applied **multi-threading** for efficient data posting from files to tables, including format transformation.

- Enhanced application features by dynamically changing **role-based HTML navigation menus** using **Node.js** and data from databases in XML format.
 - Developed front-end interfaces using **JSP, JavaScript, HTML, and CSS** to manipulate, validate, and customize UI elements.
 - Employed **Microservices** and **HTTP/REST** protocols for seamless communication and implemented **SOAP** for specific tasks.
 - Established **Spring Boot Data Microservices** deployment standards and patterns for **PCF** (Pivotal Cloud Foundry).
 - Configured **PCF config-server** for managing application properties across environments in the cloud.
 - Created dynamic JavaScript codes for form-building and client-side process simulation.
 - Utilized **Java Multi-threading** for efficient file downloads from URLs.
 - Generated **UML sequence diagrams** and translated them into corresponding classes and interfaces.
 - Developed user interfaces for the **policy owner module** using **JSPs, Struts Tag Library, and Tiles framework**.
 - Created **Data Access Objects (DAOs)** and implemented the **Struts framework** for MVC-based development.
 - Developed **Single Page Applications (SPA)** by integrating with **RESTful Web Services**.
 - Utilized **Struts Validator** for client-side and server-side validations and created **Action Form beans** for data validation.
 - Wrote SQL queries and procedures for efficient data retrieval from databases.
 - Configured **Dispatch Action** in **Struts** for grouping related actions.
 - Conducted **unit testing** using **JUnit** and played an active role in debugging and deploying the application to **WebLogic Application Server**.
 - **SQL** Ability to interact with relational databases, write **SQL queries**, and perform basic database operations.
 - Responsible for implementation of java integration components for **JBPM** and **DROOLS**.
 - Technically guide the installation and testing of new products and improvements to **SOA** Components.
 - Developed SOAP services and clients using **Apache AXIS2, JAX-WS, WSDL, XML, XSD, JAXB framework**.
 - Migrated individual components and services of this application from **Angular JS to Angular 2**, one module at a time. Used Tiles framework with struts to reduce the redundancy between **JSP** pages.
 - **ORM (Object-Relational Mapping)** Familiarity with **Hibernate** or **JPA** to **map Java objects** to database tables and perform database operations.
 - **JUnit** Proficiency in writing unit tests with **JUnit**, an **essential skill** for ensuring your code is correct and maintainable.
 - **Mockito** Familiarity with mocking dependencies for unit testing using Mockito to test Java applications.
 - Knowledge of key data structures such as **arrays, linked lists, stacks, queues, hash maps, trees, and graphs**.
 - Understanding common algorithms, like sorting algorithms (**quick sort, bubble sort**), searching algorithms (**binary search**), and understanding time and space complexity (**Big O notation**).
 - Familiarity with Agile practices like **Scrum** or **Kanban** and working in sprints to deliver software iteratively.
 - Basic Cloud Knowledge with cloud platforms like **AWS, Azure, or Google Cloud** and Basic understanding of **Docker** for containerizing Java applications for easy deployment.
 - **SLF4J, Logback** Acquaintanceship with logging frameworks for tracking and managing logs in Java applications.
- Technologies Used:** Java, Core Java, Spring MVC, Spring Boot, JakartaEE, Thymeleaf, JSF, ReactJS, HTML5, Tailwind CSS, JavaScript, TypeScript, Deno, Spring Boot, Kubernetes, Docker, OpenShift, PostgreSQL, MySQL 8+, Amazon Aurora, Junit 5, TestNG, Mockito, PostgreSQL, MySQL, Amazon RDS, RESTful Web Services, Microservices.
