

Pavani Vempati
Full Stack Java Developer
vempatipavanijava@gmail.com
+1 512-417-0593
Immediately Available.

PROFESSIONAL SUMMARY:

- ❖ Proficient in designing, developing, and deploying web applications using **Angular, Java, Spring Boot, JPA**, and **Oracle** databases.
- ❖ Expertise in building interactive and reusable UI components with **Angular**, implementing modular application structures with lazy loading and route guards, and utilizing RxJS for seamless communication between frontend and backend.
- ❖ Skilled in developing secure applications with **Spring Security** and managing the persistence layer using **Spring Data JPA**.
- ❖ Expertise in designing and developing large scale enterprise applications using **Spring Boot and Web Services for SOAP and RESTful API development**, creating robust and scalable applications.
- ❖ Expertise in utilizing **Angular** for front-end development, leveraging **TypeScript** for efficient and Demonstrated proficiency in utilizing Angular's comprehensive features, including **data binding techniques such as interpolation, property binding, event binding, and two-way data binding** and implementing various Angular directives, including component and structural directives.
- ❖ Well-versed with **core Java** concepts like **collections, multithreading, Exceptions and Generics**. Worked extensively with **JAVA 8** features like **Stream API, Date and Time API, Lambda Expressions, Functional Interfaces, Predicates, Functions, and Default methods**.
- ❖ Extensive experience in utilizing various Spring modules including **Spring Core, Spring MVC, Spring Boot, Spring Data, Spring AOP, Spring mail, Spring Batch, Spring Cloud and Spring Security** to develop robust and scalable enterprise applications with streamlined workflows and enhanced security features.
- ❖ Proficient in message queuing using **Apache Kafka** to enhance asynchronous communication between distributed systems.
- ❖ Experience with Relational Database Management System (RDBMS) using **MySQL and Oracle**, and NoSQL Database using **MongoDB and Cassandra**.
- ❖ Experienced in utilizing monitoring tools like **Prometheus** and **Grafana** to ensure application health and reliability.
- ❖ Proficient in utilizing a range of CI/CD tools, including **Git and GitHub** for version control, **Jenkins** for continuous integration and continuous deployment (CI/CD) pipelines, **Kubernetes** for container orchestration **Docker** for containerization, along with a comprehensive understanding of Jenkins Pipeline.
- ❖ Extensive hands-on experience in **front-end web development** using **HTML5, CSS, JavaScript, TypeScript, React, and Angular**.
- ❖ Skilled in developing unit and integration tests using **JUnit, Mockito**, and **Cucumber** to ensure application quality and stability.
- ❖ Familiar with cloud technologies, including AWS services like **EKS, S3**, and **CloudWatch**, as well as implementing infrastructure-as-code using **Terraform**.
- ❖ Experienced in project management using **Jira** and documenting workflows and processes in **Confluence**.
- ❖ Experience working with persistence frameworks like **Hibernate/JPA** for mapping Java classes with databases and using **Hibernate Query Language (HQL)**.
- ❖ Performed Unit testing on **Angular** applications using tools like **Karma, Jasmine**.
- ❖ Experience working with devops using **Bitbucket, Jenkins, Terraform, AWS** and **OCI** cloud services.
- ❖ Excellent **team player, quick learner** and **self-starter** with effective communication, motivation and organizational skills combined with attention to details and business process improvements.

TECHNICAL SKILLS:

Programming Languages	JAVA, SQL, JavaScript, Python, PL/SQL, Type Script.
Test Approaches	SDLC, Waterfall, Agile/Scrum.
Frameworks	React, Angular, Spring Boot, Drop Wizard.
Version Control/ Dev Tools	GIT, Maven, Gradle, Ant, Jenkins, CI/CD, Docker, Visual Studio, IntelliJ IDE, GitHub, Eclipse, Kafka, RabbitMQ.
Web Technologies	HTML 5, CSS 3, SOAP XML, AJAX, JSP, JavaScript, Python, REST, jQuery
AWS Cloud Services	Amazon EC2, RDS, AWS S3, Elastic Load Balancing (ELB), AWS Lambda, Cloud Watch, AWS EKS.
Database / DB Tools	Oracle, SQL Server, NoSQL, MongoDB, MySQL, CouchDB.
Operating Systems	Windows, Linux, Mac.
Angular Testing	Junit, Mockito, Cucumber, Jasmine, Karma.

PROFESSIONAL EXPERIENCE:

Client: Safeway, Dallas, Texas.

Apr 2022-Present

Role: Senior Software Engineer

Responsibilities:

- ❖ Developed full-stack web applications using **Angular, Java, Spring Boot, Spring Data JPA**, and **Oracle Database**.
- ❖ Designed and implemented **interactive web interfaces** using **Angular**, creating reusable components with **Generics, TypeScript, Bootstrap**, and **Angular Material**.
- ❖ Utilized **NgRx** and **RxJS** to build reactive service layers and establish efficient communication between front-end and back-end components.
- ❖ Implemented **route guards** for secure navigation and modularized Angular applications using **lazy-loaded modules** for improved performance and maintainability.
- ❖ Developed centralized error handling mechanisms and loading indicators using **Angular interceptors**.
- ❖ Secured **RESTful** web services with **Spring Security** and implemented batch processes using **Spring Batch**.
- ❖ Built scalable RESTful APIs for web and mobile applications using **Spring Boot** with **Tomcat**.
- ❖ Managed JSON document storage and retrieval using **CouchDB** for NoSQL database solutions.
- ❖ Automated ETL job scheduling and monitoring with **Control-M**.
- ❖ Created complex **SQL queries, packages, stored procedures, views, triggers**, and optimized database performance in **Oracle**.
- ❖ Integrated **Apache Kafka** for reliable message queuing, delivery acknowledgments, and flexible routing mechanisms.
- ❖ Designed and executed **unit, functional, and integration tests** using **JUnit, Mockito, Cucumber, Jasmine, Karma**, and **Protractor** frameworks.
- ❖ Monitored application performance using **Splunk**, analyzed logs, and resolved production issues promptly.
- ❖ Developed and visualized metrics and alerts using **Prometheus** and **Grafana** for real-time monitoring.
- ❖ Built **CI/CD pipelines** using **Git, Bitbucket**, and **Jenkins declarative pipelines** for automated builds and deployments.
- ❖ Utilized **Maven** for build management, **Docker** for containerization, and **Kubernetes** for orchestration.
- ❖ Automated infrastructure provisioning and deployment using **Terraform** with **AWS S3, AWS EKS**, and **AWS CloudWatch**.
- ❖ Acted as an on-call engineer, providing rotational support for production systems, ensuring uptime and reliability.
- ❖ Documented features and processes using **Confluence**, and managed tasks and progress via **Jira**.

Client : Tata Consultancy Services, India

June 2019- Dec 2021

Role: Full Stack Developer.

Responsibilities:

- ❖ Developed **server-side applications** using **Spring Boot** and **Hibernate** for seamless interaction with relational databases, ensuring efficient data management.
- ❖ Built and deployed **RESTful Web Services** using **Spring Boot** to serve client-side requests with structured **JSON data**.
- ❖ Tested and validated REST APIs using tools such as **Postman**, ensuring compliance with functional and performance requirements.
- ❖ Designed and developed **responsive web applications** using **Angular, Bootstrap 5**, and **Angular Material** for an intuitive user experience.
- ❖ Implemented dynamic form validations, reusable components, and route management using **TypeScript** and Angular's core libraries.
- ❖ Created custom Angular **directives, pipes**, and **services** to modularize and enhance application functionality.
- ❖ Integrated backend services with Angular applications using **RxJS** for reactive programming and efficient state management.
- ❖ Automated containerization processes by creating and managing **Docker Images** and deploying scalable **Docker Container Services**.
- ❖ Utilized **Kubernetes** for orchestration and management of Dockerized applications in development and production environments.
- ❖ Ensured API security by implementing **OAuth2** and **JWT** token-based authentication in **Spring Boot** applications.
- ❖ Designed and executed **unit tests** using **JUnit** and **Mockito**, achieving high code coverage and reliability.
- ❖ Collaborated on **CI/CD pipelines** using **Jenkins** to automate the build, test, and deployment processes.
- ❖ Developed and maintained complex database schemas, stored procedures, and optimized SQL queries in **MySQL** and **PostgreSQL**.
- ❖ Monitored application logs using **Splunk** and conducted root cause analysis to resolve production issues efficiently.
- ❖ Documented project workflows and technical solutions using **Confluence** and tracked progress through **Jira** to ensure timely delivery.
