Location: Hartford, CT, USA | **Email:** poojadonuru10@gmail.com | **Phone:** 475-320-9795 | LinkedIn

SUMMARY

- Cybersecurity Engineer with 4 years of experience in cloud security, network defence, and threat detection across AWS, Azure, and Google Cloud.
- Proficient in Identity & Access Management (IAM), Zero Trust Architecture, and endpoint security solutions (EDR/XDR, CrowdStrike, Microsoft Defender).
- Skilled in securing APIs with OAuth 2.0, JWT, and API Gateway policies, ensuring protection against OWASP Top 10 vulnerabilities.
- Strong background in SIEM implementation (Splunk, QRadar), incident response, and threat intelligence analysis to detect and mitigate cyber threats.
- Hands-on experience with DevSecOps security integration, CI/CD pipeline security (GitHub Actions, Jenkins), and container security (Docker, Kubernetes).
- Expertise in compliance frameworks (NIST, ISO 27001, GDPR, HIPAA) and automated security audits to ensure regulatory adherence.
- Developed Python and PowerShell-based security automation tools to streamline compliance monitoring and vulnerability management.
- Collaborative team player with a problem-solving mindset, ensuring continuous improvement of security postures in enterprise environments.

SKILLS

- **Network Security:** Firewalls (Palo Alto, Fortinet), IDS/IPS (Snort), VPNs, Zero Trust Architecture, Network Protocols (TCP/IP, DNS, HTTP)
- **Cloud Security:** AWS Security, Azure Security, Google Cloud Security, Identity & Access Management (IAM), Cloud Security Posture Management (CSPM)
- **Endpoint Security:** EDR/XDR (CrowdStrike, Microsoft Defender), Mobile Device Management (Intune, Jamf)
- **Application Security:** OWASP Top 10, Secure Coding (Python, Java), API Security (OAuth, JWT)
- **Data Security:** Encryption (AES, RSA), Data Loss Prevention (DLP), Public Key Infrastructure (PKI)
- **Identity & Access Management (IAM):** Multi-Factor Authentication (MFA), Single Sign-On (SSO), Privileged Access Management (PAM), Okta Identity Management, SailPoint Identity Governance & Administration
- **Threat Detection & Incident Response:** SIEM (Splunk, QRadar), Incident Response (NIST Framework), Threat Intelligence
- **Vulnerability Management:** Nessus, Qualys, Penetration Testing (Burp Suite, Nmap)
- **Compliance & Governance:** NIST, ISO 27001, GDPR, HIPAA
- **DevSecOps:** CI/CD Security (GitHub Actions, Jenkins), Container Security (Docker, Kubernetes)
- **Scripting & Automation:** Python, PowerShell, Bash
- **Other Tools:** Wireshark, ServiceNow, Jira, Microsoft Visio, ChatGPT

WORK EXPERIENCE

DXC Technologies

July 2024 – Present

Cybersecurity Engineer

- Conducted a comprehensive cloud security assessment across AWS, Azure, and Google Cloud, identifying vulnerabilities and ensuring compliance with industry standards.
- Evaluated IAM policies, encryption protocols, and network security controls, ensuring adherence to NIST, ISO 27001, and GDPR guidelines.
- Automated compliance monitoring and risk assessment processes using Python scripts, improving visibility into cloud security risks.
- Strengthened cloud security posture by remediating misconfigurations, reducing security risks by 35%.
- Collaborated with cross-functional teams to enhance cloud security frameworks, aligning with evolving cybersecurity and regulatory requirements.

DXC Technologies

January 2024 – May 2024

Cybersecurity Engineer – Intern

- Designed and implemented a real-time compliance monitoring system, integrating security metrics, compliance checks, and policy violation alerts to enhance regulatory adherence.
- Engineered Python-based automation scripts to collect, analyse, and visualize compliance data, streamlining auditing processes and improving efficiency.
- Collaborated with security teams and stakeholders to refine dashboard insights, ensuring alignment with ISO 27001, GDPR, and NIST standards.
- Utilized SailPoint Identity Governance to automate user access reviews, certifications, and ensure compliance with internal security policies.

Infosys

January 2021 – July 2022

Cybersecurity Engineer

- Architected secure authentication mechanisms using OAuth 2.0 and JWT to enhance API security and prevent unauthorized access.
- Established API Gateway security policies to regulate traffic, enforce rate limiting, and monitor requests for anomalies.
- Performed automated penetration testing with Burp Suite and Postman, identifying and remediating API security vulnerabilities.
- Reinforced role-based access control (RBAC) and privilege escalation prevention to limit sensitive banking data exposure.
- Deployed TLS encryption and HSTS policies to protect API communications from man-in-the-middle (MITM) attacks.
- Created Python-based security testing scripts, reducing manual API security validation time by 35% and improving compliance.
- Integrated API security checks into CI/CD pipelines, ensuring automated vulnerability scanning and policy enforcement.
- Partnered with cross-functional teams to align API security practices with industry standards and banking compliance requirements.
- Integrated Okta Identity Governance features to automate user access provisioning, deprovisioning, and role-based permissions across enterprise systems.

Trigent

October 2019 – December 2020

Cybersecurity Engineer

- Implemented AWS Identity & Access Management (IAM), CloudTrail monitoring, and encryption standards to secure cloud infrastructure.
- Configured AWS Security Groups, Network ACLs, and VPC Peering to enforce secure communication between cloud resources.
- Deployed AWS Key Management Service (KMS) and applied AES-256 encryption for securing sensitive data at rest and in transit.
- Integrated AWS Security Hub and Guard Duty for real-time threat detection, anomaly monitoring, and automated security compliance checks.
- Conducted cloud vulnerability assessments using Nessus and AWS Inspector, identifying misconfigurations and remediating security gaps.
- Enforced least privilege access policies (IAM Roles & Policies), reducing unauthorized access risks and enhancing zero-trust security architecture.
- Developed automated security scripts in Python, reducing manual security auditing time by 40% and improving compliance monitoring.

PROJECTS

Cloud Infrastructure Security Enhancement

- Designed and implemented AWS IAM policies, security groups, and encryption standards to ensure a secure cloud environment.
- Integrated AWS Security Hub and Guard Duty to monitor real-time threats, automate compliance checks, and enhance security visibility.

Automated Threat Intelligence System

- Developed a Python-based automation tool to aggregate and analyse security logs, improving threat detection and response times.
- Configured SIEM (Splunk) and threat intelligence feeds to correlate security events, reducing incident investigation time and false positives.

EDUCATION

- **Master of Science in Computer Science**
University of New Haven | **CGPA: 3.78 / 4.0**

August 2022 – May 2024

- **Bachelor of Technology**
Vardhaman college of engineering | **CGPA: 3.7 / 4.0**

June 2017 – May 2021
