

Full Stack Developer

Name: Poojitha Ch

Phone: +1(916)-857-9616 | Email: Poojithareddy1031@gmail.com | LinkedIn: [PoojithaCh](#)

SUMMARY

Full Stack Java Developer with 5+ years of expertise in designing, developing, and deploying scalable web applications and enterprise solutions. Specialized in **Java 17 Python, Spring Boot, Microservices**, and Cloud Computing (**AWS, Azure, GCP**) with a deep understanding of **front-end frameworks** such as **ReactJS, Angular, TypeScript, and JavaScript**. Adept at **building high-performance applications** using **RESTful APIs, GraphQL, Hibernate**, and **database technologies** like **MySQL, PostgreSQL, and MongoDB**. Strong experience in **DevOps** tools such as **Docker, Kubernetes, Jenkins, Terraform**, and **CI/CD pipelines** for seamless deployment automation. Passionate about developing scalable, **high-availability architectures** while following best practices in security, performance optimization, and **Agile methodologies (Scrum, TDD, and Kanban)**.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C#, C
Web Development: HTML, CSS, JavaScript, TypeScript, JSON, jQuery
Frameworks: Spring Boot, Hibernate, Django, ReactJS, AngularJS, NodeJS
API Expertise: RESTful API's, Microservices, GraphQL Maven, Gradle
Databases: SQL Server, MYSQL, PostgreSQL, MongoDB
Devops &Version Control: Docker, Jenkins, Kubernetes, Git, GitHub, CI/CD Pipelines
Cloud Platforms: AWS, Microsoft Azure, Google Cloud Platform
Testing: Junit, Postman, Selenium, TestNG, Automation testing, Functional testing, API testing, Developing test plan

PROFESSIONAL EXPERIENCE

Java full stack developer | Humana Inc| Westchester, IL Sep 2024 - Present

- Designed and developed scalable **microservices** using **Spring Boot, Java 17**, and integrated advanced **API security** (OAuth 2.0, JWT) for seamless authentication.
- Led **ReactJS** front-end development, integrating **Redux** for state management, **HTML5, CSS3**, and **JavaScript** for styling and interactivity, and improving client-side routing with **React Router** for a smoother navigation experience.
- Built and deployed **AWS** cloud-based applications using **EC2, S3, RDS, Lambda, API Gateway**, and **Kubernetes**, with **Terraform** for infrastructure **automation** and enabling zero-downtime deployments.
- Developed and maintained **CI/CD** pipelines with **Jenkins** and **GitHub** Actions, **automating testing** and deployment processes, reducing manual intervention and increasing deployment efficiency.

Java full stack developer | Nationwide | Columbus, OH Feb 2024 - Sep 2024

- Developed **RESTful APIs** using **Java, Spring Boot** for backend services that handled millions of secure banking transactions, ensuring high availability, and zero-downtime updates.
- Automated **containerized** deployments using **Docker** and **Kubernetes**, improving scalability, reducing operational costs, and ensuring consistent production environments.
- Created **unit tests** with **JUnit** and integrated **BDD** tests using **Cucumber** to ensure quality in a continuous delivery environment
- Optimized **SQL** queries and ensured efficient database management with **PostgreSQL** and **MySQL**.
- Optimized and integrated **Apache Kafka** message brokers, ensuring seamless communication between microservices.

Software Developer | DXC Technology | India July 2020 - Aug 2023

- Developed **Java-based microservices** and **RESTful APIs** using **Spring Boot** and **Hibernate**.
- Built front-end applications using **ReactJS** and **Angular**, integrating with backend services.
- Designed and deployed **AI-powered chatbots** using **Python** and **Azure AI**, integrated with backend systems to handle dynamic queries and retrieve data in real time.
- Proficient in **Agile** methodologies **SCRUM, TDD** enhancing team collaboration and delivering high-quality code
- Designed and implemented an advanced **automation** testing framework using **Selenium WebDriver, Java**, and **TestNG**, with seamless integration into **Jenkins** pipelines for **continuous** testing and comprehensive test result generation using **Extent Reports**.
- Experienced **insurance** professional with a comprehensive understanding of **insurance operations**, Life Insurance, Annuities and claims management across diverse insurance product lines.

Software developer | Cigna | India Feb 2019 - July 2020

- Developed **single-page applications** (SPA) using **AngularJS, Bootstrap**, and **JavaScript**, implementing reusable UI components to enhance front-end performance and maintainability.
- Designed and built **Spring MVC** and **Spring Boot** RESTful APIs that connected with **Oracle 12c** and **MongoDB**, integrating **Spring Data JPA** to optimize database interactions and ensure efficient transaction processing.
- Experienced in **build** automation with **Maven** and **Gradle**, optimizing development workflows.

PROJECTS

PANO App | Insurance Web Application | Java, Spring Boot, React, Hibernate, JavaScript, HTML, CSS, SQL, Selenium

- Developed a web application for the insurance domain to manage customer policies and claims.
- Ensured scalability and optimized API performance, resulting in reliable and efficient application performance in production, by overseeing deployment across multiple environments.

AI-Powered Customer Support System | Python, RESTful APIs, AWS, ReactJS, Docker, JavaScript

- Developed a chatbot using Python and ReactJS, integrated with RESTful APIs to automate responses and improve customer interaction.

EDUCATION EXPERIENCE

Masters: University: Kent State University, Computer Science, Kent, Ohio - 2024
Bachelors: University: CVR College of Engineering, Information Technology, India – 2020

Achievements

- Won DXC Q4 champs award in the year 2022.
- Organized a college-level hackathon, "Code Sprint," with 200+ participants, focusing on AI and web development.
