## EXPERIENCE

### ENPHASE ENERGY

#### **Product Manager**

**Austin, TX**

*August 2023 – Present*

- Led end-to-end development of quote management platform, driving ~10% revenue growth by enabling new services. Defined and executed a product roadmap, based on market research, increasing service fulfillment efficiency and scale.
- Designed and deployed an AI-Chat to provide seamless access to customer and operations insights, using LangChain, LLMs, RAG, and vector databases. Gathered feedback from alpha users to drive product improvements and optimize adoption.
- Achieved a ~25% increase in CSAT by launching asset introduction service and streamlining transfer experience. Led product discovery, defined user stories, aligned cross-functional teams, and drove go-to-market strategy for user enablement.
- Realized cost savings of ~5% by moving report generation to a serverless AWS Lambda-based architecture. Elevated user experience by introducing intuitive, HTML based service reports to improve clarity, usability, and maintainability.
- Revamped the provider sign-up flow, cutting onboarding time by ~60%. Delivered a personalized experience with interactive tutorials and targeted nudges, empowering new users to quickly engage and realize the platform's value.
- Launched a usability-tested white-label solution with customizable components, enabling seamless integration of core product features into customer applications and driving adoption across multiple enterprise clients.
- Developed APIs to enable service availability checks and service request submissions, expanding partner integration capabilities. Defined data governance and security standards and led UAT to ensure compliance and system reliability.

### ZINGTREE

#### **Product Manager**

**Austin, TX**

*September 2020 – August 2023*

- Achieved ~20% increase in product adoption by launching a new decision tree builder. Developed and executed strategic roadmap for modernizing self-service product and building 0 to 1 features, improving user engagement and user experience.
- Led integration strategy and implementation, driving a ~8% ARR uplift; Cultivated key partnerships with CCaaS and CRM providers (Salesforce, ServiceNow, Zendesk, Five9 etc.) to ensure seamless integrations and optimize customer workflows.
- Reduced report generation times while enhancing data accuracy and UX/UI for users. Led multi-phased implementation of a new Looker based reporting platform with interactive visualizations, developed iteratively based on user feedback loops.
- Drove migration of all customers in record time (~3 Qs) as part of a platform modernization initiative. Built executive consensus, fostered cross-functional collaboration, and ensured smooth transition, resulting in increased user satisfaction.
- Established customer self-serve motion and 'Freemium' plan, resulting in ~10% increase in upgrades. Worked with CRO to develop pricing packages, defined requirements to simplify upgrade paths and drove business enablement.
- Managed security and compliance efforts by collaborating with external consultants to achieve HIPAA, GDPR, and SOC 2 certifications, establishing a strong foundation for data protection, regulatory adherence, and risk mitigation.
- Improved predictability of deliverables by determining the sprint velocity. Transitioned from Waterfall to Agile methodology and ran biweekly sprints and other scrum ceremonies by working with Engineering and Design teams.

### UBER

#### **Product Strategy Consultant – MBA Global Residency**

**Washington, DC**

*January 2020 – May 2020*

- Presented GTM recommendations to Uber Europe Leadership by synthesizing customer and competition research into actionable product strategies and implementation roadmap. Defined scope and success metrics for the POC project.

### INDIEZ

#### **Product Manager – Internship**

**Washington, DC**

*May 2019 – September 2019*

- Reduced drop-off rate in customer funnel by ~20% by launching 'proposal' feature to improve buyer's journey. Executed product release through prioritizing product backlog, creating user stories, and defining user acceptance criteria.
- Grew revenue by ~100K quarterly through product partnerships. Collaborated with the marketing team to identify new user segments, conceptualize channel strategy, and build financial projections to roll out the pilot program.
- Analyzed customer feedback, usage data, and reported bugs to identify patterns and process inefficiencies, providing prioritized recommendations that enhanced feature usability, optimized workflows, and streamlined issue resolution.

## OPTUM - UNITED HEALTH GROUP

**Technical Lead – PBM**

**Bengaluru, India**

*March 2017 – June 2018*

- Led a team of 5 engineers, driving product development, ensuring high code quality, and fostering technical excellence. Optimized platform performance, improved documentation and delivered features on time, aligned with business goals.
- Improved drug dispensation efficiency across provider, payer and PBM workflows by optimizing prior authorization, drug substitution, and auto-refill features, streamlining operations, and ensuring seamless prescription fulfillment.
- Served as a technical liaison across cross-functional teams, gathering requirements, crafting detailed implementation plans, and ensuring seamless deployment of PBM features with robust launch support and proactive post-release monitoring.
- Strengthened disaster recovery and operational resilience plans as a core member of the **BCDR** team, minimizing downtime, enhancing system reliability, and preserving data integrity in critical healthcare and pharmacy platforms.
- Led technical hiring, talent development, and team growth initiatives, conducting technical interviews, onboarding new engineers, mentoring team members, and building a culture of collaboration and technical excellence.

## IBM

**Sr. Software Engineer**

**Bengaluru, India**

*November 2012 – February 2017*

- Developed and optimized airline cargo interfaces for shipping, billing, and booking, enhancing user experience, improving operational efficiency, reducing processing delays, and ensuring seamless data synchronization.
- Designed and implemented RPA solutions to automate supply-chain compliance workflows, reducing manual effort, minimizing errors, cutting operational costs for client portfolios, and improving process efficiency.
- Trained graduate hires and co-created technical training guides, streamlining onboarding, improving knowledge retention, and increasing team productivity. Promoted continuous learning initiatives in line with company standards to enhance skills.
- Resolved critical system bugs within SLAs by performing root cause analysis, collaborating with cross-functional teams, and gathering inputs from customers. Implemented long-term fixes and optimized error handling, ensuring system stability.
- Improved development workflows by introducing automation, enforcing best practices in debugging, code reviews, documentation, and deployment - accelerating release cycles, reducing technical debt, and minimizing downtime.

## Swathi Engineers

**Presales & Marketing Associate**

**Bengaluru, India**

*August 2011 – September 2012*

- Managed relationships with 15+ construction companies, driving adoption of new online customer-support features, optimizing issue resolution, and ensuring SLA compliance for improved user experience.
- Increased client engagement and accelerated sales pipeline by creating marketing materials and sales presentations, collaborating with teams to generate leads, and enhancing brand visibility for construction solutions.

---

## **EDUCATION & SKILLS**

**GEORGETOWN UNIVERSITY, McDonough School of Business**

**Master of Business Administration, Merit Scholarship Recipient**

**Washington, DC**

*July 2018 – May 2020*

**VISVESVARAYA TECHNOLOGICAL UNIVERSITY, NMIT**

**Bachelor of Technology, Electronics and Communication**

**Bengaluru, India**

*August 2007 – June 2011*

## **CERTIFICATION**

- **AI Agents Fundamentals**  
By Hugging Face – Covers core principles of AI-driven autonomous agents.
- **IBM Design Thinking**  
By IBM – Focuses on user-centric design methodologies for innovation.
- **Certified Scrum Product Owner (CSPO)**  
By Scrum Alliance – Covers agile product development, backlog management, and iterative delivery to maximize value.

## **TECH SKILLS**

**Product & Development**

Jira, Figma, Miro, Confluence, Pendo, Postman, APIs, AWS, Windsurf, Python, JavaScript

**Artificial Intelligence**

LangChain frameworks, LLMs, Prompt Engineering, AI Agents, Vector DBs, RAG concepts

**Data Analysis & Visualization**

SQL, A/B Testing, Looker, Amplitude, Tableau, Excel, Airflow, Power BI
