

Ashutosh Das

(347) 475-6913 | dev.ashutoshdas@gmail.com | www.linkedin.com/in/liveashutosh/

SUMMARY

Dedicated Full Stack Developer with a strong foundation in software development and a passion for delivering high-quality solutions. Experienced in collaborating with cross-functional teams to enhance productivity throughout the software development life cycle.

PROFESSIONAL EXPERIENCE

Michigan Health Information Network, Health IT Intern | Lansing, MI

June 2024 – August 2025

- Designed Java Spring Boot microservices with REST APIs to unify healthcare and payment data across 10+ hospital systems.
- Built ReactJS interfaces for clinicians to securely access and update records, cutting lookup times by 30%.
- Integrated Kafka pipelines to process millions of healthcare/payment transactions monthly, reducing latency by 40%.
- Deployed secure workloads on AWS (EC2, IAM, S3) with monitoring, achieving 99.9% uptime and HIPAA compliance.
- Partnered with product managers and QA teams to translate complex requirements into actionable development tasks.

Knorex, Software Engineer | Pune, India

February 2021 - August 2023

- Developed and maintained ReactJS components and workflows for campaign management and reporting features, supporting 10,000+ concurrent ad campaigns.
- Worked on frontend integrations with GraphQL APIs, improving reporting speed by 30%.
- Contributed to Java microservices for ad billing and payment workflows, ensuring accurate processing of high-volume transactions.
- Built Kafka event pipelines processing 100,000+ daily campaign and payment events, improving real-time accuracy.
- Improved engineering velocity by creating reusable ReactJS component libraries used across the ad-tech platform.

IBM, Systems Engineer | Mumbai, India

April 2019 - November 2020

- Developed JVM-based microservices (Java) for insurance and payment workflows handling millions of weekly transactions.
- Implemented ReactJS user interfaces for claims processing, reducing agent onboarding and training time by 20%.
- Automated ETL pipelines with SQL and Kafka streams, improving data reconciliation throughput by 25%.
- Enhanced system reliability with error-handling improvements, reducing downtime by 30%.
- Collaborated with banking clients to validate requirements and integrate compliance workflows.

PROJECT EXPERIENCE

Infrastructure Automation Tool

- Developed a self-service automation tool to streamline internal processes, reducing manual intervention.
- Implemented RESTful APIs using Python and Flask, facilitating seamless integration with existing systems.
- Achieved a 40% increase in team productivity by automating routine tasks and enhancing workflow efficiency.

Data Pipeline Optimization

- Designed a data pipeline solution to manage and analyze large datasets for real-time insights.
- Utilized SQLAlchemy and Python to build efficient data processing modules, ensuring high performance.
- Improved data processing speed by 30%, enabling faster decision-making for business operations.

Cloud-Based Monitoring System

- Created a monitoring system for cloud infrastructure to enhance operational visibility and reliability.
- Leveraged Terraform for Infrastructure as Code, automating the deployment of monitoring configurations.
- Increased system uptime by 25% through proactive alerts and automated recovery processes.

EDUCATION

SUNY Binghamton, Master of Science in Information Systems (Applied Data Science) (3.59)

Fall 2025

University of Pune, Bachelor of Computer Science

June 2018

TECHNICAL SKILLS

Python, SQL, SQLAlchemy, Flask, Terraform, Java, React.js, Kafka, AWS (EC2, S3, IAM), Docker, Postgres, Redis, Agile Scrum, CI/CD pipelines, Git, Linux Command Line
