

RAMYA THOTTEMPUDI

Phone: 2512669256

Email: ramyathottempudi@gmail.com

Professional Summary

- Experienced .NET Core Developer with 8+ years of experience in designing, developing, and deploying high-performance, scalable applications using .NET Core, ASP.NET Core, and associated technologies.
- Proven expertise in utilizing Azure DevOps for CI/CD pipeline development, enabling automated build, test, and deployment processes, significantly improving development workflows and delivery cycles.
- Hands-on experience in DevOps practices, including version control with Git, continuous integration, and deployment automation for .NET Core applications, reducing manual intervention and enhancing team collaboration.
- Strong proficiency in SQL Server, Azure SQL Database, and PostgreSQL, designing efficient database schemas, writing optimized queries, and leveraging Entity Framework Core for seamless data interaction.
- Skilled in database performance optimization, identifying and resolving issues related to query performance, indexing, and transaction management, ensuring high availability and low latency in SQL-based applications.
- Expertise in building microservices architectures with .NET Core, deploying containerized applications using Docker, and orchestrating them in cloud environments with Kubernetes for seamless scalability and reliability.
- Extensive experience in Azure cloud services, including deploying and managing .NET Core applications using Azure App Services, Azure Functions, Azure Kubernetes Service (AKS), and Azure SQL Database for secure, scalable cloud solutions.
- Deep understanding of Azure DevOps pipelines, enabling efficient management of build, release, and deployment processes while integrating unit tests, integration tests, and static code analysis to maintain high-quality standards.
- Expertise in developing RESTful APIs and Web APIs using ASP.NET Core and integrating with databases, ensuring secure, high-performing interactions with external services and clients.
- Strong background in designing and implementing data models, creating stored procedures, triggers, and optimizing SQL queries to ensure efficient data retrieval and reporting for enterprise-level applications.

Technical Skills

Programming Languages	C, C#, .NET.
.NET Technologies	.NET Core, ASP.NET, ASP.NET MVC, ADO.NET, VB.NET, Web Services, Windows Forms, Web Forms, WCF, WPF.
Database	MSSQL Server, MySQL, SQLite, Oracle.
Development Tools	Visual Studio, SQL Server Management Studio Express, MSSQL Server, MySQL.
Scripting	HTML/DHTML, HTML5, XHTML, XML, JavaScript, VueJS, JQuery, CSS, React JS and Bootstrap, Angular, Angular JS
Tools	Visual Studio, AJAX, GitHub, Git, Excel, Word, Jira, Postman, CodeIgniter, MS Visio, MS Office, MS Project Management.
Services	Web Services, Web API

Operating System	Windows Family.
Application Servers	IIS 5.0/6.0/7.0
Cloud Computing	Azure, CI/CD, ENTRA
Source Controls	GIT.

Work Experience:

BLUE CROSS BLUE SHEILD, FL
Role: Senior .Net developer

December 2023 – Till Now

BCBS is a health insurance company which deals with different hospitals, doctors, patients, MNCs and coverage plans. The insurance company offers multiple insurance plans for people based on their age, race, income etc. BCBS works with different MNCs to get their annual coverage for all their employees.

Responsibilities:

- Design, develop, and maintain scalable web applications using .NET technologies such as [ASP.NET](#) Core, MVC, and Web API, while incorporating cloud platforms like Microsoft Azure or AWS.
- Implement front-end solutions with HTML5, CSS3, JavaScript, and frameworks like React, Angular, or Vue.js. Develop back-end services with .NET Core, C#, and Entity Framework, ensuring code is optimized and scalable.
- Design and implement database schemas, write complex SQL queries, and integrate with SQL Server or NoSQL databases like MongoDB.
- Integrate cloud services such as Azure App Services, Azure Functions, AWS Lambda, and storage solutions like Azure Blob Storage or Amazon S3 to deploy and scale applications.
- Use cloud-native technologies like Kubernetes, Docker, and Azure DevOps for continuous integration and deployment (CI/CD) pipelines, automating deployment and testing processes.
- Implement cloud security measures such as encryption, secure access, and identity management (Azure Active Directory, AWS IAM).
- Collaborate with UI/UX designers, front-end developers, product managers, and QA teams in an Agile environment to deliver high-quality applications. Participate in sprint planning, stand-ups, and code reviews, while following DevOps principles for automation and efficiency.
- Ensure application security by integrating OAuth, JWT, and other security protocols for user authentication and authorization.
- Write unit and integration tests using testing frameworks like xUnit, MSTest, or NUnit. Debug and troubleshoot both front-end and back-end issues, optimizing performance and reducing bottlenecks.
- Use version control systems like Git and collaborate on GitHub, GitLab, or Bitbucket to manage code versions. Create documentation for API services, database schemas, and technical decisions for stakeholders.
- Work with cloud services like Azure Key Vault or AWS Secrets Manager to securely store sensitive data such as API keys or database credentials.
- Optimize application performance and reduce costs by utilizing cloud scaling features, monitoring tools like Azure Monitor or AWS CloudWatch, and applying best practices for cloud resource usage.
- Implement cloud-based caching with Azure Redis or Amazon ElastiCache.

Environment: Visual studio 2022, C#, .NET Core, Angular 16, Dev Extream, Web API, HTML5, CSS3, AZURE, CI/CD, JIRA, PostgreSQL, GitLab, JavaScript, Entity Framework 6, VS Code, VS 2022, Cloudwatch, Lambda, SNS, SQS, Docker, CI/CD.

Credit Suisse, NYC

October 2020 – December 2023

Role: Full Stack Engineering Senior Analyst

Credit Suisse Group is a leading financial services company, advising clients in all aspects of finance, across the globe and around the clock. Their entire infrastructure is highly regulated and completely secure in all possible ways. They deal with multiple dimensions of a financial institution.

Responsibilities:

- Worked on multiple applications in Credit Suisse.
- Successfully onboarded services onto the Web Application, garnering acclaim from clients for enhanced accessibility and efficiency
- Enforced role-based authorization for all backend API calls, ensuring data security and integrity across the platform, resulting in a 40% increase in data security.
- Conducted comprehensive unit testing using NUnit, upholding stringent code quality standards, and ensuring functional robustness, resulting in a 40% reduction in post-release defects and a 35% improvement in code reliability.
- Identified and remediated security vulnerabilities, diligently addressing defects to uphold project integrity and security standards, resulting in a 45% reduction in security incidents and a 50% increase in overall system stability.
- Collaborated closely with 10+ cross-functional teams to analyze requirements and deliver scalable, tailored solutions that align with client needs and project objectives
- Implemented visually engaging and responsive frontend designs using HTML5, CSS, and Angular, optimizing user experiences across various devices and platforms.

Environment: C#, ASP. NET, ASP.NET MVC, ADO. NET, .NET Core, Web API, HTML5, CSS3, Entity Framework 6, JavaScript, Vue JS, JIRA, ORACLE 13G, SQL Server 2022, VS 2019, JIRA.

Sprint, OH

July 2017 – September 2020

Role: dot net developer

Sprint is one of the leading telecom providers in the US. They work with telecom , mobiles and internet. I have worked in the mobile bundles team in handling multiple applications which deal with the mobile, calls and internet bundles containing multiple plans for different periods of time.

Responsibilities:

- Developed, tested, deployed, and maintained web applications in .NET Core using MVC.
- Have worked in Angular 14 for creating User Interface.
- Have worked in Web Services and Windows Services Have worked in Azure Devops TFS for creating repos, creating build and release pipelines Have worked in performance tuning activities for SQL procedures
- Have worked extensively in SQL and other SQL tools like SSIS, SSRS and profilers.
- Developed web applications and windows applications from gathering requirements, developing the code, performing unit testing and deploying the code.

Environment: Visual Studio 2017, ASP.NET MVC, WPF, Entity Framework, HTML, CSS, JavaScript, Vue JS, jQuery, Bootstrap 4, MYSQL, Azure, React JS, Node JS.

Educational Qualification

JNTU, Kakinada ***B.Tech***

GPA: 7.8
