

Bhavesh Raval

Full Stack Developer (.Net Core + Angular) – 6+ Years of Experience

(+91) 9714620362

ravalbhavesh61@gmail.com

Professional Summary:

- Experienced C# developer skilled in crafting efficient software solutions with the .NET framework.
- Proficient problem solver with a strong grasp of object-oriented programming principles.
- Committed to delivering high-quality code within project deadlines and budget constraints.
- Excellent communicator and collaborator, adept at working in team environments.
- Passionate about staying updated with emerging technologies and continuously improving skills.

Skills & Expertise:

Programming Languages	<u>C#, Typescript, Javascript</u>
Database	<u>MSSQL Server, PostgreSQL, MYSQL, ORACLE</u>
Framework	<u>Entity Framework, Angular Framework</u>
Technologies	• Angular 6.0, 7.0,13,14,15,17 • Angular JS • React JS • Java Script • AJAX • jQuery • HTML5 • CSS3 • Bootstrap • .net Core 5/6/7 • MVC • ASP.NET
Tools	• Azure • MicroServices • SQL Server Management Studio • Visual Studio 2015,2017,2022 • Visual Code • Source Tree • SVN

	• GIT • Azure
Other	<u>UI Framework: Kendo UI, Terra UI, NGRX</u>

Projects:

1. Project Title: Online Insurance and Financial Product Marketplace

Position: Full stack Developer

Company: Epistic Technologies Pvt. Ltd

Tool & Technologies: Angular 6/7, Typescript, ASP.NET MVC, Web API, SQL Server 2017

Domain: Insurance and Financial Services

Duration: Sep & 2018 – April-2020.

Description:

It is an online insurance and financial product marketplace aimed at providing affordable and high-quality insurance and personal finance products in the UAE market.

The platform simplifies financial decision-making for consumers, offering easy access to borrowing and insurance from leading banks and insurers with just a few clicks.

Insurance offerings include car, medical, life, home, and travel insurance.

Roles & Responsibilities:

Developed admin panel and website functionality.

Designed and implemented database tables and developed SQL/PLSQL queries.

Conducted unit testing for developed features.

Created frontend applications.

Overview: Insurance Quote is an online insurance marketplace catering to the UAE market, offering affordable and convenient insurance and financial products.

2. Project Title: Respond Trauma Management Portal

Position: Full Stack Developer

Company: Epistic Technologies Pvt. Ltd

Tool & Technologies: ASP.NET, MVC, C#.NET, Angular JS, React JS, JavaScript, jQuery, Entity Framework, LINQ, Micro-services.

Domain: Healthcare

Duration: April-2020 – May 2021

Description:

Respond Trauma Management Portal serves as a critical care unit for patients, ensuring timely staff assignment upon patient arrival.

Frontend development implemented using Angular 4 with Typescript.

Backend development utilized WebAPI.

Involved in creating and optimizing stored procedures and SQL queries.

Responsible for application development, maintenance, and unit testing.

Roles & Responsibilities:

Designed and coded various modules using ASP.NET MVC and C#.NET.

Implemented LINQ queries and utilized Entity Framework for data access.

Developed frontend functionalities with AngularJS, JavaScript, and jQuery.

Collaborated on backend development using WebAPI for seamless communication.

Conducted unit testing to ensure robustness and reliability of developed features.

Respond Trauma Registry (REACT JS APPS)

The Respond Trauma Registry Portal serves as a critical care unit for patients, storing all relevant details about past patient visits.

Frontend development was implemented using React JS, while the backend utilized WebAPI. I was responsible for creating and optimizing stored procedures and SQL queries. Additionally, I contributed to application development, maintenance, and unit testing.

Roles & Responsibilities:

- Designed and developed various modules using React JS, utilizing Redux for state management.
- Implemented LINQ queries and used Entity Framework for data access.
- Developed frontend functionalities with React JS.
- Collaborated on backend development using WebAPI for seamless communication between the frontend and backend.
- Conducted unit testing to ensure the robustness and reliability of the developed features.

3. Project Title: Indo Property World Portal

Position: .NET MVC Developer

Company: Epistic Technologies Pvt.Ltd

Tool & Technologies: ASP.NET MVC, JavaScript, jQuery, LINQ, Ajax, Web API, SQL Server 2017

Domain: Real Estate

Duration: May-2021 & Oct-2021

Description:

Indo Property World Portal addresses the challenges of fraudulent and illegal property listings often found on popular real estate websites.

The portal serves as a comprehensive platform for buying, selling, and renting properties, providing secure transactions and financial management services.

Modules worked on include user management, site visits, site visit feedback, automated notifications via SMS and email, and follow-up procedures.

Roles & Responsibilities:

Designed and developed various modules of the Indo Property World Portal using ASP.NET MVC and C#.

Implemented LINQ queries and optimized database interactions for improved performance.

Collaborated with the team to integrate frontend functionalities using JavaScript, jQuery, and Ajax.

Developed backend APIs using Web API for smooth data transfer and processing.

Responsible for designing and coding database structures and writing SQL queries for data management.

4. Project Title: Energy Consumption Reduction Solution

Position: Full Stack Developer

Company: Zealous System Pvt.Ltd

Tool & Technologies: ASP.NET Core 6, C#.NET, Angular 14, JavaScript, Entity Framework, LINQ Micro Services and Azure.

Domain: Energy Management

Duration: Oct-2021 – Sep-2022

Description:

EP&T Global provides a unique solution for reducing energy consumption in large commercial buildings worldwide, combining cutting-edge technology, performance management processes, and expert engineering.

Backend development conducted using WebAPI .Net Core 6 to facilitate seamless communication between frontend and backend systems.

Responsible for designing and optimizing stored procedures and SQL queries to enhance database performance.

Involved in application development, maintenance, and rigorous unit testing to ensure reliability and functionality.

Responsibilities:

Designed and coded frontend components using Angular and TypeScript.

Implemented backend functionalities using ASP.NET Core 6 and C#.

Developed and optimized LINQ queries and Entity Framework for data access and manipulation.

Collaborated with the team for application maintenance and unit testing to ensure robustness and reliability.

5. Project Title: MFSS Application and Portal

Position: Developer

Company: Softweb Solutions Pvt.Ltd

Tool & Technologies: ASP.NET, Web Form, C#.NET, Entity Framework, LINQ and Azure Blob Storage and Cosmos database, MicroServices

Domain: Customer Management

Duration: Sep-2022 & March-2023

Description:

The project aims to provide a comprehensive solution for different customer administrations, enabling them to manage services and product calls efficiently.

Consists of three web applications: customer portal, management console, and MFSS iPad API, catering to various user needs.

Backend development conducted using WebAPI and Web Form (ASPX), ensuring seamless data flow and functionality.

Involved in designing and optimizing stored procedures and SQL queries to enhance database performance.

Responsible for application development, maintenance, and rigorous unit testing to ensure reliability and functionality.

Responsibilities:

Designed and coded frontend components using Angular for enhanced user experience.
Implemented backend functionalities using ASP.NET and C#, ensuring scalability and performance.
Developed and optimized LINQ queries and Entity Framework for efficient data retrieval and manipulation.
Collaborated with the team for application maintenance and unit testing to ensure high-quality deliverables.

6. Project Title: BCS and Data Intelligence**Position:** .Net Developer**Company:** Softweb Solutions Pvt.Ltd**Tool & Technologies:** ASP.NET Core, C#.NET, Entity Framework, and Cosmos DB and Azure**Domain:** Data Intelligence, Business Application Development**Duration:** March-2023 & Feb-2024**Description:**

The project aims to provide a comprehensive solution for creating various business applications with seamless integration of SAP data in both frontend and backend systems.

Involves creating Cron Jobs to pull data from SAP tables and migrate it into PostgreSQL tables for further processing and analysis.

Implementation of different calculations based on the migrated data and presenting results in the frontend.

Additionally, integrates DATA API BUILDER for building APIs using COSMOS DB REST and GraphQL.

Responsibilities:

Designing and coding frontend components using Angular for a dynamic and responsive user interface.

Developing backend functionalities using ASP.NET Core and C#, ensuring smooth data integration and processing.

Writing LINQ queries and utilizing Entity Framework for efficient data retrieval and manipulation.

Collaborating with the team for application development, maintenance, and rigorous unit testing to ensure high-quality deliverables.

7. Project Title: ILM F68 Data & File Extract**Position:** Lead I - Software Engineering**Company:** USTechnology International Pvt Ltd**Tool & Technologies:** ASP.NET, C#.NET, SQL**Domain:** Data Migration and Defect & Feature, Business Application Development**Duration:** May-2024 & Sep-2024**Description:**

The project aims to provide a comprehensive solution for creating various business applications with seamless integration of SQL data in both frontend and backend systems. It involves developing a .NET executable application to pull data from SQL tables and migrate it for further processing and analysis.

The implementation includes retrieving binary image data from SQL and creating a dynamic query to extract all rich text field values, convert them into their original image forms, and download them into a specified event folder with appropriately named identifiers. The application will also allow for modifications: updating and removing images from specific folders based on UI changes, while tracking all logs within the application.

Responsibilities:

Resolved Designing Defect.

Developing backend functionalities using ASP.NET and C#, ensuring smooth data integration and processing.

Writing SQL queries, view, and store procedure for efficient data retrieval and manipulation.

Collaborating with the team for application development, maintenance, and rigorous unit testing to ensure high-quality deliverables.

Employments History:

- ❖ Epistic Technologies Pvt.Ltd – Full stack Developer (Ahmadabad)
 - April 2018 – September 2022
- ❖ Coode IT Solution Pvt. Ltd – Full stack Developer (Ahmadabad)
 - October 2022 – February 2023
- ❖ Soft web Solution Pvt. Ltd – Full stack Developer (Ahmadabad)
 - April 2023 - February 2024
- ❖ US Technology International Pvt Ltd– Lead I - Software Engineering (Bangalore)
 - May 2024 – Nov 2024

Education:

Course / Degree	College / University	Year of Passing (Month & Year)
MCA	Department of computer science Maharaja Krishnakumarsinhji Bhavnagar University	June-2018
BCA	(College SVCCS) -Maharaja Krishnakumarsinhji Bhavnagar University	June-2015
